

INTRODUCTION

- ❑ The Rational Interaction for Moral Sensitivity (RIMS) approach is designed as a decision-making strategy that can be used for both social and personal ethical dilemmas in the workplace.
- ❑ Social dilemmas arise when different people make conflicting judgments on what is considered to be morally right with regard to a specific situation.
- ❑ Personal dilemmas occur when a person becomes uncertain about what the most appropriate moral decision should be in a specific situation

Rational Interaction:

Knowledge, Belief, and Strategic Interaction Cristina Bicchieri, Maria Luisa Dalla Chiara, 1992-08-28 A group of pre eminent figures offer a conspectus of the interaction of game theory logic and epistemology in the formal models of knowledge belief deliberation and learning

Internal Auditing Richard Cascarino, 2007-04 Book CD This book is designed primarily for undergraduate and postgraduate students intending to pursue a career in internal auditing as well as those chartered accountants with a specialist interest in governance and control issues This book covers the basic concepts philosophy and principles underlying the practice of internal auditing the relationships between the internal auditor management and the external auditor In addition the student will gain a knowledge and understanding of the nature of an organisation Risk management and the role of internal auditing in managing organisational risks in the context of current developments in corporate governance in both the public and private sectors are dealt with The book is now prescribed for those studying for the Certified Internal Auditor professional qualification since it addresses the syllabus requirements of the Institute of Internal Auditors IIA and the Standards for the Professional Practice of Internal Auditing and Competency Framework for Internal Auditors This book represents a practical integrated approach to the Institute of Internal Auditors recommended internal audit approach and may be implemented within an internal audit department in a cost effective manner Accordingly the text may be useful as a reference manual for internal audits in practice

The Limits of Hobbesian Contractarianism Jody S. Kraus, 2002 This book is the most comprehensive rigorous critique of contemporary Hobbesian contractarianism as expounded in the work of Jean Hampton Gregory Kavka and David Gauthier Professor Kraus argues that the attempts by these three philosophers to use Hobbes to answer current political and moral questions fail The reasons why they fail are related to fundamental problems intrinsic to Hobbesian contractarianism first the problem of collective action arising out of the tension in Hobbes theory between individual and collective rationality second the classical problem of explaining the normative force of hypothetical action a problem that can be traced to the conflicting strategies of hypothetical justification found in Rawls and Hobbes theories Given the deep interest in Hobbesian contractarianism among philosophers political theorists game theorists in economics and political science and legal theorists this book is likely to attract wide attention and infuse new life into the contractarian debate

Foundations and Applications of Decision Theory C.A. Hooker, J.J. Leach, E.F. McClennen, 2012-12-06 1 INTRODUCTION In the Spring of 1975 we held an international workshop on the Foundations and Application of Decision Theory at the University of Western Ontario To help structure the workshop into ordered and manageable sessions we distributed the following statement of our goals to all invited participants They in turn responded with useful revisions and suggested their own areas of interest Since this procedure provided the eventual format of the sessions we include it here as the most appropriate introduction to these collected papers resulting from the workshop The reader can readily gauge the approximation to our mutual goals 2 STATEMENT or

OBJECTIVES AND RATIONALE Attached to this statement is a bibliography names of persons cited in the statement and writing in this century will be found referenced in the biblio graphy certain classics aside 2 1 Preamble We understand in the following the Theory of Decisions in a broader sense than is presently customary construing it to embrace a general theory of deciSion making induding social political and economic theory and applica tions Thus we subsume the Theory of Games under the head of Decision Theory regarding it as a particularly clearly formulated version of part of the general theory of decision making

Towards Agamemnon: Totalitarianism Origins & History Benjamin Yang,2023-01-01 One of the most striking phenomena of the 20th century is totalitarianism In both Europe and Asia different types of totalitarian states and political organisations have emerged fomenting global hatred wars and massacres of civilians Nearly 200 million people were killed as a result of totalitarian wars and political cleansing of populations The totalitarian catastrophe of the last century continues to have a profound impact on global politics and economy in the 21st century For politicians business leaders and civilians around the world it is impossible to ignore the many problems caused by totalitarianism The technological revolutions cultural expressions and changes in business models that we are experiencing are all closely related to it This book traces the origins of totalitarianism from ancient literature to events in the last century About the Author Benjamin Yang was born in China in 1972 A long time resident in Southeast Asia he has work experience in broadcasting research and teaching at Central South University and Hainan University primarily in philosophy and dramaturgy He has published more than 20 academic papers and his major publications include The Cat in the Closed Chamber The Concept of Time and Space and the Collective Subconscious 2013 which discusses how different human communities often have different conceptions of space and time and Drama and the Rise of Great Powers 2017 which points out that the birth of every modern western power has been accompanied by the emergence of an iconic theatre master This book Towards Agamemnon Totalitarianism Origins History is the result of his years of research and study in philosophy history politics and literature of both the Western and Eastern worlds Author s words I lived in Phnom Penh Cambodia during the Covid 19 pandemic It is a beautiful and romantic city in the Far East But the shadows of death seems to be creating in a hidden cycle of time The S 21 Concentration Camp where tens of thousands of people under the Khmer Rouge s totalitarian rule was just a fraction of the two million Cambodians who were killed in the political cleansing of the population John and I used translation software to exchange views on politics including totalitarianism The Red Revolution of the last century was like a horrific ideological viral outbreak that killed tens of millions of people during the Bolshevik Revolution the Chinese Cultural Revolution and the Khmer Rouge totalitarian rule The recollections of those horrific periods have indeed diverted our anxiety over Covid 19 My colleague Professor K came to join me in Phnom Penh For a fortuitous reason he led me to discover a secret There exists a literary tradition in the history of the West that is 2500 years old a tradition which had produced the world s most famous plays and films The literary tradition contains the source of power of the West s resistance to totalitarianism over the years The Marxist

regime and the Nazi forces created the apocalyptic landscape of the 20th century but they lost out to this tradition in the end This book provides the link between that tradition and causes of totalitarianism through the ages especially those during the 20th century This book traces the origins of totalitarianism from ancient literature to events in the last century Dynamic Formal Epistemology Patrick Girard,Olivier Roy,Mathieu Marion,2011-01-06 This volume is a collation of original contributions from the key actors of a new trend in the contemporary theory of knowledge and belief that we call dynamic epistemology It brings the works of these researchers under a single umbrella by highlighting the coherence of their current themes and by establishing connections between topics that up until now have been investigated independently It also illustrates how the new analytical toolbox unveils questions about the theory of knowledge belief preference action and rationality in a number of central axes in dynamic epistemology temporal social probabilistic and even deontic dynamics

Morals by Agreement David Gauthier,1987-05-21 In this book the author argues that moral principles are principles of rational choice According to the usual view of choice a rational person selects what is likely to give the greatest expectation of value or utility But in many situations if each person chooses in this way everyone will be worse off than need be Instead Professor Gauthier proposes a principle whereby choice is made on an agreed basis of co operation rather than according to what would give the individual the greatest expectation of value He shows that such a principle not only ensures mutual benefit and fairness thus satisfying the standards of morality but also that each person may actually expect greater utility by adhering to morality even though the choice did not have that end primarily in view In resolving what may appear to be a paradox the author establishes morals on the firm foundation of reason *Emerging Theories of Human Communication* Branislav Kovacic,1997-09-25 This book summarizes the important and promising emerging theories of human communication that go beyond received traditions It includes essays on emerging theories of communication and culture relational communicative competence conflict communication communication and peace agenda setting and the role of mass media in democratic political processes new rhetoric and new social movements and communication and management of public sector competitiveness Contributors to this volume include Deborah Blood Dudley D Cahn Donal Carbaugh Ron B Cullen Donald P Cushman William A Donohue Timothy Gibson Gerard A Hauser Trudy Milburn Hiroshi Ota Jiro Takai Susan Whalen John M Wiemann Mary O Weimann and Jian H Zhu Post-transcendental Communication Colin B. Grant,2008 Compared with other human and social sciences communication theory appears to be of recent origin Appearances deceive however for the antecedents of this growing field of work can be found in the classic philosophical treatises of western and non western thinkers including Plato Sextus Empiricus and Laozi reaching forward through the theolinguistic tradition of St Augustine Boethius Averro s and Ockham before arriving at the modern age Following Wittgenstein s linguistic turn and Husserl s phenomenology in the early decades of the twentieth century we arrive at the fertile plains of semiotics information theory pragmatics and dialogism out of which communication theory has grown And yet an unresolved and historically non

coincidental tension remains between the implicit transcendental claims of much of communication theory and our experiences of risk uncertainty and dissolution in what Zygmunt Bauman has described as our liquid age As communication theory matures it is an opportune moment to reflect on what form a detranscendentalised theory of communication might take In bringing intentions understandings meanings and interactions down to earth this book invites its readers to account for the complex communications between communications actors and social processes without recourse to transcendental theories of understanding

The Morality of Economic Behaviour Vangelis Chiotis, 2020-05-25 The links between self interest and morality have been examined in moral philosophy since Plato Economics is a mostly value free discipline having lost its original ethical dimension as described by Adam Smith Examining moral philosophy through the framework provided by economics offers new insights into both disciplines and the discussion on the origins and nature of morality The Morality of Economic Behaviour Economics as Ethics argues that moral behaviour does not need to be exogenously encouraged or enforced because morality is a side effect of interactions between self interested agents The argument relies on two important parameters behaviour in a social environment and the effects of intertemporal choice on rational behaviour Considering social structures and repeated interactions on rational maximisation allows an argument for the morality of economic behaviour Amoral agents interacting within society can reach moral outcomes Thus economics becomes a synthesis of moral and rational choice theory bypassing the problems of ethics in economic behaviour whilst promoting moral behaviour and ethical outcomes This approach sheds new light on practical issues such as economic policy business ethics and social responsibility This book is of interest primarily to students of politics economics and philosophy but will also appeal to anyone who is interested in morality and ethics and their relationship with self interest

Rights, Bodies and Recognition Daniel Breazeale, 2019-03-29 The German philosopher Johann Gottlieb Fichte 1762 1814 has long been recognized as an important and original figure in the history of philosophy and Western thought and as a seminal influence upon the Romantic tradition The essays in this book focus on Fichte s contributions in political theory as set out in his Foundations of Natural Right Fichte was notorious as a political radical and his ideas in in political theory proved to be decisive influences upon his contemporaries and of striking relevance to current political dispute This volume of essays which examine such issues as Fichte as a social contract theorist his theory of gender relations and his theories on punishment and the criminal law among many other topics remedies what has been a striking lacuna in the existing scholarly literature

Cosmopolitan Liberalism M. Sánchez-Flores, 2010-09-13 Cosmopolitanism in the contemporary debate is firmly based in the western tradition of liberal thought which is culturally situated The liberal conception of self alienates nature and childhood and its internal logic justifies colonialism and carries patriarchal and racialized baggage Cosmopolitan Liberalism is a critique of the western tradition of liberal thought and an effort to overcome the philosophical boundaries of individualism towards a more inclusive and open conception It seeks to expand the theoretical basis of individuality beyond its own limitations towards the ideal of universal love and the moral principle of compassion which are compatible with all world cosmologies liberal and non liberal Cosmopolitan Liberalism is a reflection on what it is that all human beings owe one another in spite of the many humanly created borders that set us apart
