Toward a Sociology of Education John Beck, Chris Jenks, Nell Keddie, Michael F. D. Young, 2020-03-10 By including material from literary philosophical and anthropological sources and by selecting readings which consider educational practice both within and beyond formal educational contexts this book broadens the character of sociological inquiry in education The editors bring together material they have found valuable when working with students of education and sociology at all levels Many of these articles and extracts are either inaccessible or have not been reprinted The collection should stimulate inquiry about the assumptions underlying current debates on curriculum streaming school organization methods of teaching and preconceived notions of ability *Knowledge, Ideology and the Politics of Schooling* Rachel

Sharp, 2017-04-28 First published in 1980 this book argues that a theory of ideology is essential to a theory of education. It relates developments in the Marxist theory of ideology to the analysis of schooling in a capitalist society. Beginning with an appraisal of the early twentieth century liberal social theorists including Weber, Durkheim, Veblen, and Mannheim, it demonstrates that the weakness of their approaches arose from a failure to comprehend adequately the nature of capitalism. It then outlines the state of the theory of ideology at the time and applies the concept in an analysis of contemporary schooling, concluding with a discussion of its political implications. The application of the theory of ideology offers important possibilities for a radical socialist strategy on education. *Ideology and Curriculum* Michael Apple, 2004-03-01 To celebrate the 25th anniversary of its publication, Michael W. Apple has thoroughly updated his influential text and written a new preface. The new edition also includes an extended interview circa 2001 in which Apple relates the critical agenda outlined in *Ideology and Curriculum* to the more contemporary conservative climate. Finally, a new chapter titled *Pedagogy, Patriotism, and Democracy: Ideology and Education After 9/11* is also included. *Rationality, Education and the Social Organization of Knowledge (RLE Edu L)*. Chris Jenks, *Routledge Library Editions: Education Mini-Set L Sociology of Education* Various, 2021-06-23 Mini set L Sociology of Education re issues 48 volumes originally published between 1928 and 1990. The books in this mini set discuss Teaching and social change, research processes in education, class, race, culture, and education, Marxist perspectives in the sociology of education, the family and education, the sociology of the classroom and school organization. **Globalization of Racism** Donaldo Macedo, Panayota Gounari, 2015-11-17 Addressing ethnic cleansing, culture wars, human sufferings, terrorism, immigration, and intensified xenophobia, *The Globalization of Racism* explains why it is vital that we gain a nuanced understanding of how ideology underlies all social, cultural, and political discourse and racist actions. The book looks at recent developments in France, Germany, Greece, Ireland, Israel, Italy, Portugal, Spain, and the United States and uses examples from the mass media, popular culture, and politics to address the challenges these and other countries face in their democratic institutions. The eminent authors of this important book show how we can educate for critical citizenry in the ever-increasing multicultural and multiracial world of the twenty-first century. Contributors are David Theo Goldberg, Loic Wacquant, Edward W. Said, Zygmunt Bauman, Peter Mayo, and Carmel Borg. Anna Aluffi Pentini and Walter Lorenz. Peter Gsetz. Georgios Tsiakalos. Franz Hamburger. Julio Vargas. Lena de Botton and Ramon Flecha. Concetta Sirna. Jan Fiola. Joao Paraskeva. Henry A. Giroux. It explores new forms of racism in the era of globalization. *Curriculum and the Specialization of Knowledge* Michael Young, Johan Muller, 2015-09-07 This book presents a new way for educators at all levels from early years to university to think about curriculum priorities. It focuses on the curriculum as a form of specialised knowledge optimally designed to enable students to gain access to the best knowledge available in any field. Papers jointly written by the authors over the last eight years are revised for this volume. It draws on the sociology of knowledge and, in particular, the work of Emile Durkheim and Basil Bernstein, opening up the possibilities for collaborative inter-disciplinary

enquiry with historians philosophers and psychologists Although primarily directed to researchers university teachers and graduate students its arguments about specialised knowledge have profound implications for policy makers

Teaching Science Ralph Levinson,2005-08-05 Science education has undergone far reaching changes in the last fifty years The articles collected together in this reader examine how we have reached our present consensus and what theories we now use to explain how children learn science The central sections of the reader examine how all this can be translated into effective and stimulating teaching how learning can be most accurately and fairly assessed and how the impact of gender ethnicity and other factors on children s performance can be addressed in methods of teaching which make science accessible to all The articles in the final section of the book are a reminder that the debate is not finished yet and raise some challenging questions about what science education is and what it is for *Leaders in Curriculum Studies* Leonard J.
