**The Siwash** Joseph Allen Costello, 1895 Critical Norths Sarah Jaquette Ray, Kevin Maier, 2017-05-15 For millennia the North has held a powerful sway in Western culture Long seen through contradictions empty of life yet full of promise populated by indigenous communities yet ripe for conquest pristine yet marked by a long human history it has moved to the foreground of contemporary life as the most dramatic stage for the reality of climate change This book brings together scholars from a range of disciplines to ask key questions about the North and how we've conceived it and how conceiving of it in those terms has caused us to fail the region's human and nonhuman life Engaging questions of space place indigeneity identity nature the environment justice narrative history and more it offers a crucial starting point for an essential rethinking of both the idea and the reality of the North

**Ecopolitics** Gerard

Kuperus,2023-09-01 Against the idea of social contract theories that suggest humans invented the political Gerard Kuperus argues that we have always been political and that our species came into existence in a world that was already political By studying the rich social and political lives of other animals Ecopolitics provides suggestions for how to think and feel differently about ourselves our relationship to other people and the places and beings around us Kuperus suggests we understand ourselves as part of an ecopolitical community consisting of humans and other living beings as well as inanimate objects By recognizing nature itself as utterly political and seeing ourselves as a part of this larger political unity we can come to face the real challenges of our times This means that we are not simply putting ourselves in nature as we are We are also changing who we are

VanStone,2017-07-12 The great expanse of Arctic and Sub Arctic lands that stretch across the northern edge of the American continent is as difficult and demanding to human beings as any in the world The Athapaskan speaking Indians who made it their home never captured the imagination of popular writers as did the Eskimo who lived on their northern borders and the Plains Indians who lived to the south Except to anthropologists the Athapaskans have remained in relative obscurity known intimately only to the missionaries the traders and trappers and the prospectors who invaded their forbidding territory VanStone has captured the elements of the basic adaptive strategy by which these Indians mastered their intransigent environment and made it their home over many centuries and in doing so he has perhaps also found the reasons why they have not had as much impact on Western thought as other Native Americans The Plains Indians with the blood and thunder of their raidings the individual drama of their vision quests appealed to that part of our culture that was forged on the frontier where both action and isolation were primary qualities The Eskimos with their elaborate technology for extracting a livelihood from the Arctic ice appealed to Yankee ingenuity Athapaskan culture was of a different order less dramatic but no less adaptive Northern lands are not richly endowed with sustenance for human life These adaptations have not only required proficiency with tools and techniques for exploiting this difficult habitat but also the creation of institutions for collaboration in these endeavors *Hunters and Fishermen of the Arctic Forests* illuminates this relatively obscure area of the world and brings it and the cultures it supported into the context of modern anthropological research     **Journal of American Folklore** ,1904     *Tsimshian Culture* Jay Miller,2000-10-01 The Tsimshians are a Northwest Coast Native people known for their dazzling works of art and rich array of social religious and oral traditions that have captured the attention of scholars for over a century Jay Miller brings together for the first time a wealth of material about the Tsimshians presenting an unforgettable picture of their cultural universe That universe is built around the metaphor of light which was brought into the world by Raven its refraction forms the chief social religious and symbolic institutions of Tsimshian culture Family heraldic crests express light in one way masks in another Miller argues convincingly that the genius of Tsimshian culture and one of the main reasons for its continuing vitality is that its people are sensitive to different and often creative ways of capturing and embodying light
