Re Educating German Women:

Re-educating German Women Denise Tscharntke, 2003 This book examines the influence British women exercised on German women after the Second World War as officers in the Women's Affairs Section of the British Military Government and as Visiting Experts in women's affairs invited by the British Foreign Office The British saw that women were the majority of the German workforce and electorate whose active citizenship and labour was necessary for reestablishing the German economy and introducing democracy A special Women's Affairs Section was established with the task to educate German women accordingly The re education of German women centred more on the fulfillment of civic duties than on the extension of women's civic or social rights Educating the Germans David Phillips, 2018-06-28 *Educating the Germans* examines the role of the British in the reconstruction of education in occupied Germany from 1945 to 1949 It covers war time planning for a future role in overseeing education at all levels in Germany looks at policy and its implementation describes the British personnel involved and their interaction with German authorities and assesses the lasting effects of the British effort in securing the future development of education from Kindergarten to university in the emerging Federal Republic Thoroughly researched and employing a wide range of sources in Britain and Germany this is an important study for anyone looking to further their understanding of Germany and Britain's relationship with Germany in the immediate post war era

Investigating Education in Germany David Phillips, 2015-06-26 This book brings together the work of established researcher Professor David Phillips in one authoritative volume Including key chapters on education in Germany from the last three decades topics range from historical studies of universities and schools to detailed research on the role of the British in reconstructing education in Germany after 1945 and education in post unification Germany Together the body of work draws from a multitude of primary sources and constitutes a comprehensive analysis of educational provision in Germany over a long historical period In addition to 16 chapters spanning Phillips research from 1981 to 2012 the book includes a new introduction bringing his ideas together and demonstrating their continuing relevance to the field *Investigating Education in Germany* will be invaluable reading for academics researchers and postgraduate students in the fields of international and comparative education German studies history of education and sociology Can the Germans be Re-educated? American Historical Association. Historical Service Board, 1945 Female Administrators of the Third Reich Rachel Century, 2017-08-10 This book compares female administrators who specifically chose to serve the Nazi cause in voluntary roles with those who took on such work as a progression of established careers Under the Nazi regime secretaries SS Helferinnen female auxiliaries for the SS and Nachrichtenhelferinnen des Heeres female auxiliaries for the army held similar jobs taking dictation answering telephones sending telegrams Yet their backgrounds and degree of commitment to Nazi ideology differed markedly The author explores their motivations and what they knew about the true nature of their work These women had access to information about the administration of the Holocaust and are a relatively untapped resource

Their recollections shed light on the lives, loves and work of their superiors and the tasks that contributed to the displacement, deportation and death of millions. The question of how gender intersected with Nazism, repression, atrocity and genocide forms the conceptual thread of this book.

Continued Violence and Troublesome Pasts Ville Kivimäki, Petri Karonen, 2017-05-23 In most European countries the horrific legacy of 1939-45 has made it quite difficult to remember the war with much glory. Despite the Anglo-American memory narrative of saving democracy from totalitarianism and the Soviet epic of the Great Patriotic War, the fundamental experience of war for so many Europeans was that of immense personal losses and often meaningless hardships. The anthology at hand focuses on these histories between the victors on the cases of Hungary, Estonia, Poland, Austria, Finland and Germany and on the respective often gendered experiences of defeat. The book's chapters underline the asynchronous transition to peace in individual experiences when compared to the smooth timelines of national and international historiographies. Furthermore, it is important to note that instead of a linear chronology, both personal and collective histories tend to return back to the moments of violence and loss, thus forming continuous cycles of remembrance and forgetting. Several of the authors also pay specific attention to the constructed and contested nature of national histories in these cycles. The role of these in between countries and even more their peoples' multifaceted experiences will add to the widening European history of the aftermath, thereby challenging the conventional dichotomies and periodisations. In the aftermath of the seventieth anniversary of 1945, it is still too early to regard the post-war period as mere history; the memory politics and rhetoric of the Second World War and its aftermath are again being used and abused to serve contemporary power politics in Europe.

Everyday Denazification in Postwar Germany Mikkel Dack, 2023-03-30 In the wake of World War II, the victorious Allied armies implemented a radical program to purge Nazism from Germany and preserve peace in Europe. Between 1945 and 1949, 20 million political questionnaires or Fragebogen were distributed by American, British, French and Soviet armies to anxious Germans who had to prove their non-Nazi status to gain employment. Drafted by university professors and social scientists, these surveys defined much of the denazification experience and were immensely consequential to the material and emotional recovery of Germans. In *Everyday Denazification in Postwar Germany*, Mikkel Dack draws the curtain to reveal what denazification looked like on the ground and in practice and how the highly criticized vetting program impacted the lives of individual Germans and their families as they recovered from the war. Accessing recently declassified documents, this book challenges traditional interpretations by illustrating the positive elements of the denazification campaign and recounting a more comprehensive history of mid-level Allied planners, civil affairs soldiers and regular German citizens. The Fragebogen functions as a window into this everyday history.

GIs and Germans Petra Goedde, Associate Professor of History, Petra Goedde, 2003-01-01 Goedde finds that as American soldiers fraternized with German civilians, particularly as they formed sexual relationships with women, they developed a feminized image of Germany that contrasted sharply with their wartime image of the aggressive Nazi storm trooper. A perception of

German victimhood emerged that was fostered by the German population and adopted by Americans

Gendering Migration Wendy Webster, 2016-12-05 Gendering Migration demonstrates the significance of studying migration through the lens of gender and ethnicity and the contribution this perspective makes to migration histories Through a consideration of the impact of migration on men and masculine identities as well as women and feminine identities it extends our understanding of questions of gender and migration focusing on the history of migration to Britain after the Second World War The volume draws on oral narratives as well as documentary and archival research to demonstrate the important role played by gender and ethnicity both in ideas and images of migrants and in migrants own experiences The contributors consider a range of migrant and refugee groups who came to Britain in the twentieth century Caribbean East African Asian German Greek Irish Kurdish Pakistani Polish and Spanish The fresh interpretations offered here make this an important new book for scholars and students of migration ethnicity gender and modern British history

Modern Hungers Alice Weinreb, 2017-05-01 During World War I and II modern states for the first time experimented with feeding and starving entire populations Within the new globalizing economy food became intimately intertwined with waging war and starvation claimed more lives than any other weapon As Alice Weinreb shows in Modern Hungers nowhere was this new reality more significant than in Germany which struggled through food blockades agricultural crises economic depressions and wartime destruction and occupation at the same time that it asserted itself as a military cultural and economic powerhouse of Europe The end of armed conflict in 1945 did not mean the end of these military strategies involving food Fears of hunger and fantasies of abundance were instead reframed within a new Cold War world During the postwar decades Europeans lived longer possessed more goods and were healthier than ever before This shift was signaled most clearly by the disappearance of famine from the continent So powerful was the experience of post 1945 abundance that it is hard today to imagine a time when the specter of hunger haunted Europe demographers feared that malnutrition would mean the end of whole nations and the primary targets for American food aid were Belgium and Germany rather than Africa Yet under both capitalism and communism economic growth as well as social and political priorities proved inseparable from the modern food system Drawing on sources ranging from military records to cookbooks to economic and nutritional studies from a multitude of archives Modern Hungers reveals similarities and striking ruptures in popular experience and state policy relating to the industrial food economy In so doing it offers historical perspective on contemporary concerns ranging from humanitarian food aid to the gender wage gap to the obesity epidemic

Science, Gender, and Internationalism Christine von Oertzen, 2016-04-30 Founded in 1920 the International Federation of University brought together women committed to promoting higher education across divisions hardened by global conflict Here Christine von Oertzen traces the IFUW s international rise and Cold War decline making a valuable contribution to the cultural diplomatic and intellectual history
