Re Forming The Body Vol 5 Religion Community And Modernity:

Re-Forming the Body MR Philip A Mellor, Philip A. Mellor Chris Shilling, Professor Chris Shilling, 1997-02-14 Enriches the conceptual arsenal for interdisciplinary analysis of political social and cultural change stimulates more nuanced thinking about the cultural and political legacy of the Reformation era manages both to clarify tensions surrounding cultural and social integration in the late 20th century while underscoring the real historical complexity of modern bodies American Journal of Sociology Through an analysis of successive re formations of the body this innovative and penetrating book constructs a fascinating and wide ranging account of how the creation and evolution of different patterns of human community are intimately related to the somatic experience of the sacred The book places the relationship between the embodiment and the sacred at the crux of social theory and casts a fresh light on the emergence and transformation of modernity It critically examines the thesis that the rational projects of modern embodiment have died and gone to cyberspace and suggests that we are witnessing the rise of a virulent effervescent form of the sacred which is changing how people see and keep in touch with the world around them Theorising Religion John Walliss, 2017-10-24 Religion is controversial and challenging Whilst religious forces are powerful in numerous societies they have little or no significance for wide swaths of public or private life in other places The task of theoretical work in the sociology of religion is therefore to make sense of this apparently paradoxical situation in which religion is simultaneously significant and insignificant The chapters of Part One consider the classical roots of ideas about religion that dominated sociological ways of thinking about it for most of the twentieth century Each chapter offers sound reasons for continuing to find theoretical inspiration and challenge in the sociological classics whilst also seeking ways of enhancing and extending their relevance to religion today Part Two contains chapters that open up fresh perspectives on aspects of modern post modern and ultra modern religion without necessarily ignoring the classical legacy The chapters of Part Three chart new directions for the sociological analysis of religion by fundamentally re thinking its theoretical basis by extending its disciplinary boundaries and by examining previously overlooked topics **Identity and Difference** Kathryn Woodward, 1997-05-05 Book on identity **The Mediatization of Religion** Luis Mauro Sa Martino, 2016-03-03 Filling a significant gap in the literature by offering a theoretical framework by which we can understand the issues of media religion and politics Luis Mauro Sa Martino asks how can a religious denomination have any sort of influence on people in a secular age The author presents data which suggests that the presence and influence of religion in public affairs around the world has been strongly supported by the use of media communication and highlights the way some religions have adopted media communication and drawn on popular culture to build their message The use of media enables a religion to reach more people attract more members and generate more income but also increases religious influence on public matters The book offers a number of case studies and contemporary examples to illustrate the theory and will be essential reading for all students and scholars of media politics and all those

interested in the part religion plays in our society

Human Significance in Theology and the Natural Sciences Christopher L. Fisher, 2010-02-03 The medieval worldview that regarded human beings as at the center of God's plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity's place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century Science reveals just the opposite providing solid evidence in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity's indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world's situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history

Secularisation in the Christian World Dr Michael Snape, Professor Callum G Brown, 2013-06-28 The power of modernity to secularise has been a foundational idea of the western world Both social science and church history understood that the Christian religion from 1750 was deeply vulnerable to industrial urbanisation and the Enlightenment But as evidence mounts that countries of the European world experienced secularising forces in different ways at different periods the timing and

causes of de Christianisation are now widely seen as far from straightforward Secularisation in the Christian World brings together leading scholars in the social history of religion and the sociology of religion to explore what we know about the decline of organised Christianity in Britain Europe the United States Canada and Australia The chapters tackle different strands themes comparisons and territories to demonstrate the diversity of approach thinking and evidence that has emerged in the last 30 years of scholarship into the religious past and present The volume includes both new research and essays of theoretical reflection by the most eminent academics It highlights historians and sociologists in both agreement and dispute With contributors from eight countries the volume also brings together many nations for the first consolidated international consideration of recent themes in de Christianisation With church historians and cultural historians and religious sociologists and sociologists of the godless society this book provides a state of the art guide to secularisation studies
