Re Distribution Of Authority A Cross Regional Perspective:

Re-distribution of Authority Jeanie J. Bukowski, Swarna Rajagopalan, 2000-05-30 Bukowski Rajagopalan and their contributors seek to cross both analytical and geographic boundaries in the study of why and how authority shifts both within and beyond the modern nation state They develop a conceptualization of the re distribution of authority that is when the capacity of governmental and societal units involved in carrying out the tasks and responsibilities of governance change over time relative to each other They argue that this is a more comprehensive alternative to extant conceptualizations used to study the shifting of authority such as decentralization regionalism or federalism Nine diverse cases are then presented Pakistan India Sri Lanka the United States Russia Spain Portugal Senegal and South Africa Each case addresses the questions Which are the factors that explain the re distribution of authority Under what conditions are some of these factors more important than others Despite the diversity of the cases in both geographic location and levels of economic and political development four major explanatory factors emerge as common across all nine cases identity related claims economic imperatives considerations of administrative efficiency and political agency Moreover discerning the complex interaction of these factors is necessary in understanding the re distribution of authority in both its centralizing and decentralizing forms across all levels of governance Of particular interest to scholars students and policy researchers involved with international relations comparative politics public administration political development and state formation and ethnonational politics

The Secular and the Sacred William Safran, 2004-08-02 What is the place of religion in modern political systems This volume addresses that question by focusing on ten countries across several geographic areas Western and East Central Europe North America the Middle East and South Asia These countries are comparable in the sense that they are committed to constitutional rule have embraced a more or less secular culture and have formal guarantees of freedom of religion Yet in all the cases examined here religion impinges on the political system in the form of legal establishment semi legitimation subvention and or selective institutional arrangements and its role is reflected in cultural norms electoral behaviour and public policies The relationship between religion and politics comes in many varieties in differing countries yet all are faced with three major challenges modernity democracy and the increasingly multi ethnic and multi religious nature of their societies

Municipal Reform in Canada Joseph Garcea, Edward C. LeSage, 2005 This book presents an analysis of the purposes processes politics and outcomes of reform for each of the provinces and the northern territories These analyses reveal that reforms during this turn of the millennium period have reconfigured and in some cases re empowered municipal governance and shifted the balance of roles responsibilities and relationships among city and regional municipal governments and between them and their respective provincial and territorial governments The reform process however has not gone so far as to reinvent municipal governance and is not likely to in the foreseeable future Indeed the extent of change in recent years in many jurisdictions has brought about a degree of reform fatigue so that the principle actors in provincial municipal politics may be reticent to pursue new initiatives in the near future **Department of Defense Authorization for**
