Psychiatry and Decolonisation in Uganda

Yolana Pringle, 2018-12-06 This open access book investigates psychiatry in Uganda during the years of decolonisation. It examines the challenges facing a new generation of psychiatrists as they took over responsibility for psychiatry at the end of empire and explores the ways psychiatric practices were tied to shifting political and development priorities, periods of instability and a broader context of transnational and international exchange. At its heart is a question that has concerned psychiatrists globally since the mid twentieth century: how to bridge the social and cultural gap between psychiatry and its patients. Bringing together archival research with oral histories, Yolana Pringle traces how this question came to dominate both national and international discussions on mental health care reform, including at the World Health Organization, and helped spur a culture of experimentation and creativity globally. As Pringle shows, however, the history of psychiatry during the years of decolonisation remained one of marginality, and ultimately in the context of war and violence, the decolonisation of psychiatry was incomplete.

The Greenwood Encyclopedia of Children's Issues Worldwide Irving Epstein, 2007-12-30

From the skyrocketing AIDS rate in Haiti to the oppressive pollution in industrial China, from the violent street culture of Nigeria to the crippling poverty in Nicaragua, from child trafficking in Thailand to child marriages in India, this jam-packed six-volume set explores all these issues and more in an unprecedented look at the world's children at the dawn of the 21st century. In recent years, while many countries have enjoyed a higher standard of living and improved working conditions, others have been torn apart by war and incapacitated by famine and are struggling to improve life for their children and their future. Recent concern over the world's children has resulted in a global attempt to define what constitutes an acceptable childhood. New attention has been paid not only to healthcare and secondary education but also to the right to play and increased access to technology. The UN's codification of children's rights has done much to expand our understanding of what is needed for healthy growth and development of children and youth. Organized by region, *The Greenwood Encyclopedia of Children's Issues Worldwide* is the first globally focused set of this magnitude, offering extensive up-to-date coverage of these critical issues. Original chapters accessibly synthesize current data on key topics including education, play and recreation, child labor, family health, laws and legal status, religious life, abuse and neglect, and growing up in the 21st century.

Encyclopedia of Human Rights Edward H. Lawson, 1996 Preface to the first edition

Africa Jeremy I Levitt, 2008-03-31 The principal aim of this work is to provide a forum for leading international lawyers with experience and interest in Africa to address a broad range of intellectual challenges concerning the contribution of African states and peoples to international law As such the volume addresses orthodox topics of international law such as jurisdiction and intervention but tackles them from an African perspective and seeks to ask whether in each case the African perspective is unique or affirms existing arrangements of international law The book cannot come at a more important time While international legal discourse has been captured by the challenge of terrorism since September 11 2001 there are clear signs that other issues are returning to the fore Political interest in Africa has undergone a global revival and the OAU has

been transformed into the African Union Infrastructural challenges along with those taking place in regional contexts have effectively mapped a new politico legal landscape for Africa This and more is explored and the key normative questions are addressed in a series of essays by leading Africanist scholars This is a remarkable collection of essays that clearly and concisely demonstrates that Africa has and will continue to play a major role in fashioning new norms of international law and policy and contribute to its progressive development by affirming existing norms Professor Levitt is to be commended for having the vision leadership and intellectual prowess to produce this excellent text The book signals a major shift from the study of Africa as a basket case to a normative market place Akua Kuenyehia Vice President International Criminal Court Professor Levitt s work Africa Mapping New Boundaries in International Law is pathbreaking in the true sense of that word Through old and new voices it excavates the singular contributions of Africa to a discipline that is marked by Eurocentrism and imperial aspirations The authors taking their cue from the indefatigable and insightful Professor Levitt establish beyond a shadow of a doubt the enormity of the normative contributions that Africa has made to international law The book must therefore be seen as a defining contribution to the multiculturalization of international law It is for this reason that Professor Levitt is among the most important American academics working and thinking in international law today Makau Mutua Interim Dean SUNY Distinguished Professor State University of New York Buffalo Law School Children and War James Marten,2002-08-24 Children have always been involved in warfare This text shows that they have contributed to home front war efforts and that war time experiences have always affected the ways children of war perceive themselves and their societies **The A to Z of Human Rights and Humanitarian Organizations** Robert F. Children and Youth on the Front Line Jo Boyden, Joanna de Berry, 2005-03-01 War leads not just to widespread death but also to extensive displacement overwhelming fear and economic devastation It weakens social ties threatens household survival and undermines the family s capacity to care for its most vulnerable members Every year it kills and maims countless numbers of young people undermines thousands of others psychologically and deprives many of the economic educational health and social opportunities which most of us consider essential for children s effective growth and well being Based on detailed ethnographic description and on young people s own accounts this volume provides insights into children s experiences as both survivors and perpetrators of violence It focuses on girls who have been exposed to sexual exploitation and abuse children who head households or are separated from their families displaced children and young former combatants who are attempting to adjust to their changed circumstances following the cessation of conflict In this sense the volume bears witness to the grim effects of warfare and displacement on the young Nevertheless despite the abundant evidence of suffering it maintains that children are not the passive victims of conflict but engage actively with the conditions of war an outlook that challenges orthodox research perspectives that rely heavily on medicalized notions of victim and trauma
