David Jackman Whitin, Sandra Wilde, 1992 Demonstrates the potential for literature in learners in a variety of mathematical investigations *Learning Journals in the K-8 Classroom* Marcia S. Popp, 2012-11-12 Learning Journals in the K 8 Classroom is the first comprehensive presentation of how to use academic journals effectively for elementary level instruction The text outlines the theoretical foundations for using learning journals and provides step by step suggestions for implementing them in every content area and at all levels of elementary instruction Learning journals provide resources and support for reading aloud independent reading mini lessons cooperative study individual research workshops and the portfolio system The type of interactive writing students do in learning journals helps them explore complex ideas in the content areas using their own strengths of analysis and response the journals then become resources for future learning group discussions individual conferences learning assessment reports and progress Four introductory chapters show teachers how to create their own journals introduce journals to students integrate them with cooperative study and use them for assessment Additional chapters focus on the individual curriculum areas of literature writing mathematics science and social studies The text includes sample entries from student journals at all grade levels and in every content area and appendices of annotated resources to support journaling and interviews with teachers who use journals in their classrooms *Engaging Young Children in Mathematics* Douglas H. Clements, Julie Sarama, 2004 Engaging Young Children in Mathematics Standards for Early Childhood Mathematics Education brings together the combined wisdom of a diverse group of experts involved with early childhood mathematics The book originates from the landmark 2000 Conference on Standards for Pre kindergarten and Kindergarten Mathematics Education attended by representatives from almost every state developing standards for young children s mathematics federal government officials mathematicians mathematics educators researchers from mathematics education early childhood education and psychology curriculum developers teachers policymakers and professionals from organizations such as the National Conference of Teachers of Mathematics and the National Association for the Education of Young Children The main goal of the Conference was to work collectively to help those responsible for framing and implementing early childhood mathematics standards Although it has its roots in the Conference the expanded scope of the standards and recommendations covered in this book includes the full range of kindergarten to grade 2 The volume is organized into two main parts and an online appendix <http://www.gse.buffalo.edu/org/conference> Part One Major Themes and Recommendations offers a framework for thinking about pre kindergarten grade 2 mathematics education and specific recommendations Part Two Elaboration of Major Themes and Recommendations provides substantive detail regarding young students understandings of mathematical ideas Each Part includes five parallel subsections Standards in Early Childhood Education Math Standards and Guidelines Curriculum Learning Teaching and Assessment Professional Development and Toward the Future Implementation and Policy As a whole the book presents

comprehensive summaries of research that provide specific guidelines for standards curriculum and teaching takes the recent reports and recommendations for early childhood mathematics education to the next level integrates practical details and research throughout and provides a succinct but thorough review of research on the topics sequences and learning trajectories that children can and should learn at each of their first years of life with specific developmental guidelines that suggest appropriate content for each topic for each year from 2 year olds to 7 year olds This is an indispensable volume for mathematics educators researchers curriculum developers teachers and policymakers including those who create standards scope and sequences and curricula for young children and professional teacher development materials and students in mathematics education early childhood trainers teacher educators and faculty in mathematics education **Teaching**

Young Children Mathematics Sydney L. Schwartz, 2005-09-30 Children learn mathematics most effectively in contexts that are meaningful to them Realizing the potential of these contexts for fostering young children s mathematical learning while nurturing and challenging them requires knowledge of mathematics as well as of child development Avoiding the debates surrounding hands on learning vs direct instruction the author focuses on the value of different contexts for learning and illustrates ways to genuinely engage children as active learners The work is rich with examples of children s interactions with each other and with adults as they utilize and extend their understanding of mathematics Examples and guidelines for developing lessons and activities will be useful to educators and parents Chapters explore how we underestimate young children s mathematical capabilities how appropriate sequencing of learning and building on prior knowledge will enhance understanding what teachers including parent teachers need to know and high stakes testing This is a work that brings together the connections between knowing the basics and constructing knowledge in accessible and practical ways Using
