Algorithms for Next-Generation Sequencing Wing-Kin Sung, 2017-05-18 *Advances in sequencing technology* have allowed scientists to study the human genome in greater depth and on a larger scale than ever before as many as hundreds of millions of short reads in the course of a few days But what are the best ways to deal with this flood of data *Algorithms for Next Generation Sequencing* is an invaluable tool for students and researchers in bioinformatics and computational biology biologists seeking to process and manage the data generated by next generation sequencing and as a textbook or a self study resource In addition to offering an in depth description of the algorithms for processing sequencing data it also presents useful case studies describing the applications of this technology

Loop Tiling for Parallelism Jingling Xue, 2000-08-31 Loop tiling as one of the most important compiler optimizations is beneficial for both parallel machines and uniprocessors with a memory hierarchy This book explores the use of loop tiling for reducing communication cost and improving parallelism for distributed memory machines The author provides mathematical foundations investigates loop permutability in the framework of nonsingular loop transformations discusses the necessary

machineries required and presents state of the art results for finding communication and time minimal tiling choices Throughout the book theorems and algorithms are illustrated with numerous examples and diagrams The techniques presented in Loop Tiling for Parallelism can be adapted to work for a cluster of workstations and are also directly applicable to shared memory machines once the machines are modeled as BSP Bulk Synchronous Parallel machines Features and key topics Detailed review of the mathematical foundations including convex polyhedra and cones Self contained treatment of nonsingular loop transformations code generation and full loop permutability Tiling loop nests by rectangles and parallelepipeds including their mathematical definition dependence analysis legality test and code generation A complete suite of techniques for generating SPMD code for a tiled loop nest Up to date results on tile size and shape selection for reducing communication and improving parallelism End of chapter references for further reading Researchers and practitioners involved in optimizing compilers and students in advanced computer architecture studies will find this a lucid and well presented reference work with numerous citations to original sources
