Reader In International Relations:

A Reader in International Relations and Political Theory Howard L. Williams, Tony Evans, Moorhead Wright, 1993
This reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects It draws together writings representing two distinct traditions and demonstrates their interconnections In political theory excerpts are drawn from classical texts which have an important bearing on problems of international relations In international relations the collection includes essays which have had a seminal influence on the development of this discipline *International Relations in Uncommon Places* J. Beier, 2005-06-10 The central claim developed in this book is that disciplinary International Relations IR is identifiable as both an advanced colonial practice and a postcolonial subject The starting problematic here issues from disciplinary IR's relative dearth of attention to indigenous peoples their knowledges and the distinctive ways of knowing that underwrite them The book begins by exploring how IR has internalized many of the enabling narratives of colonialism in the Americas evinced most tellingly in its failure to take notice of indigenous peoples More fundamentally IR is read as a conduit for what the author terms the hegemonologue of the dominating society a knowing hegemonic Western voice that owing to its universalist pretensions speaks its knowledge to the exclusion of all others *The Global Resistance Reader* Louise Amoore, 2005 The Global Resistance Reader provides the first comprehensive collection of work on the phenomenal rise of transnational social movements and resistance politics from the visible struggles against the financial economic and political authority of large international organizations such as the World Trade Organization World Bank and International Monetary Fund to the much less visible acts of resistance in everyday life The conceptual debates substantive themes and case studies have been selected to open up the idea of global resistance to interrogation and discussion by students and to provide a one stop orientation for researchers journalists policymakers and activists **International Relations Theories** Peter Lawler, 2024 A comprehensive and accessible introduction to international relations theories with a unique emphasis on positioning IR theories within their social political and historical contexts to help students fully understand IR theories and their influence A comprehensive first introduction to international relations theories which encourages students to fully understand the purpose and function of IR theory Readers are introduced to each IR theory and asked to consider the social political and historical context within which the theory emerged Pedagogical features such as Think Critically and Twisting the lens provide the tools students need to apply IR theory to global issues A comprehensive introduction to mainstream IR theories and critical approaches to IR explained within the social political and historical context to demonstrate that theory does not emerge from a vacuum An expert authorial voice guides students through the

required material in a gentle reassuring pace with an accessible and concise style without shying away from the more complex theories and concepts A clear and consistent structure and pedagogical framework of key terms key concepts key events and key thinkers to enable students with little or no knowledge of theory to develop a strong theoretical understanding supported by easy to navigate points of reference Critical reflection on new theoretical knowledge is encouraged by Think Critically questions that are supported by hints and tips to guide avenues of thought Opportunities to apply theory to today's events and issues and to practise using theory to analyse and interpret important societal concerns Available as an e book enhanced with self assessment activities and multi media content to offer a fully immersive experience and extra learning support

Race and Racism in International Relations Alexander Anievas, Nivi Manchanda, Robbie Shilliam, 2014-10-30 International Relations as a discipline does not grant race and racism explanatory agency in its conventional analyses despite such issues being integral to the birth of the discipline Race and Racism in International Relations seeks to remedy this oversight by acting as a catalyst for remembering exposing and critically re articulating the central importance of race and racism in International Relations Focusing especially on the theoretical and political legacy of W E B Du Bois's concept of the colour line the cutting edge contributions in this text provide an accessible entry point for both International Relations students and scholars into the literature and debates on race and racism by borrowing insights from disciplines such as history anthropology and sociology where race and race theory figures more prominently yet they also suggest that the field of IR is itself an intellectually and strategic field through which to further confront the global colour line Drawing together a wide range of contributors this much needed text will be essential reading
