Vocabulary in Action Gay Fawcett, 2012-08-14 This book will take you into the classrooms of great literacy teachers from around the United States who have designed successful vocabulary instruction for their grades K-6 classrooms. Each teacher will share vocabulary routines that he or she uses on a regular basis including his or her favorite which you can use as is or adapt for your own classroom. Through their stories you will be encouraged to examine your vocabulary instruction and consider what you can do to help students who have vocabulary gaps and further enrich the vocabulary of those students who don't. *Catalog of Copyright Entries. This practical resource offers a rich array of research-based teaching strategies, activities, and extended lessons focused on the thinking tools employed by experienced readers and writers. It shows teachers how to draw on the natural connections between reading and writing and how cognitive strategies can be embedded into the teaching of narrative, informational, and argumentative texts. Including artifacts and written work produced by students across the grade levels, the authors connect the cognitive and affective domains for full student engagement. This book seamlessly bridges the gap from research to everyday practice. You get an extremely well-organized set of overarching instructional principles that are right for our era and brought to life through well-explained instructional guides and classroom activities. From the Foreword by Judith Langer, University at Albany, SUNY: I have always admired Carol Booth Olson's work with secondary students and teachers. She now applies those essential principles and practices to elementary and middle school students. Bravo! P.
