Ingo Schmidt, Carlo Fanelli, 2017 150 years after the publication of Marx's Capital this edited collection explores the book's relevance today **Reading Capital** Louis Althusser, 2016-07-12 A classic work of Marxist analysis available unabridged for the first time Originally published in 1965 Reading Capital is a landmark of French thought and radical theory reconstructing Western Marxism from its foundations Louis Althusser the French Marxist philosopher maintained that Marx's project could only be revived if its scientific and revolutionary novelty was thoroughly divested of all traces of humanism idealism Hegelianism and historicism In order to complete this critical rereading Althusser and his students at the cole normale sup rieure ran a seminar on Capital re examining its arguments strengths and weaknesses in detail and it was out of those discussions that this book was born Previously only available in English in highly abridged form this edition appearing fifty years after its original publication in France restores chapters by Roger Establet Pierre Macherey and Jacques Ranciere It includes a major new introduction by Etienne Balibar [The Political Philosophy of Poststructuralist Anarchism](#)

Todd May, 1994-07-29 The political writings of the French poststructuralists have eluded articulation in the broader framework of general political philosophy primarily because of the pervasive tendency to define politics along a single parameter the balance between state power and individual rights in liberalism and the focus on economic justice as a goal in Marxism What poststructuralists like Michel Foucault Gilles Deleuze and Jean-Francois Lyotard offer instead is a

political philosophy that can be called tactical it emphasizes that power emerges from many different sources and operates along many different registers This approach has roots in traditional anarchist thought which sees the social and political field as a network of intertwined practices with overlapping political effects The poststructuralist approach however eschews two questionable assumptions of anarchism that human beings have an essentially benign essence and that power is always repressive never productive After positioning poststructuralist political thought against the background of Marxism and the traditional anarchism of Bakunin Kropotkin and Proudhon Todd May shows what a tactical political philosophy like anarchism looks like shorn of its humanist commitments namely a poststructuralist anarchism The book concludes with a defense contra Habermas and Critical Theory of poststructuralist political thought as having a metaethical structure allowing for positive ethical commitments

Reading Capital's Materialist Dialectic Nick Nesbitt, 2024-05-27 While the explicit Althusserian engagement with Marx's Capital remained largely limited to Reading Capital after 1968 Nick Nesbitt argues this theoretical intervention remained insistent adopting the form of a general theory of materialist dialectic The book thus analyzes the Althusserianist theory of a materialist dialectic across diverse sites including Althusser's unpublished archive Macherey's exposition of Spinoza's Ethics and Badiou's Logics of Worlds while simultaneously bringing this fully developed theory of materialist dialectic to bear anew on the reading of Capital itself to show that Spinoza's influence on Marx is far greater and that of Hegel increasingly diminishing than has been previously thought

How to Read Marx's Capital Stephen Shapiro, 2008-03-20 Capital Volume I is essential reading on many undergraduate courses but the structure and style of the book can be confusing for students leading them to abandon the text This book is a clear guide to reading Marx's classic text which explains the reasoning behind the book's structure and provides help with the more technical aspects that non-economists may find taxing Students are urged to think for themselves and engage with Marx's powerful methods of argument and explanation Shapiro shows that Capital is key to understanding critical theory and cultural production This highly focused book will prove invaluable to students of politics cultural studies and literary theory

Cyberboss Craig Gent, 2024-08-27 How technologies of organization are redrawing the lines of class struggle Across the world algorithms are changing the nature of work Nowhere is this clearer than in the logistics and distribution sectors where workers are instructed tracked and monitored by increasingly dystopian management technologies In Cyberboss Craig Gent takes us into workplaces where algorithms rule to excavate the politics behind the newest form of managerial power Combining worker testimony and original research on companies such as Amazon Uber and Deliveroo the cutting edge of algorithmic management technology this book reveals the sometimes unexpected effects these new techniques have on work workers and managers Gent advances an alternative politics of resistance in the face of digital control

Literature and the Creative Economy Sarah Brouillette, 2014-04-15 This book contends that mainstream considerations of the economic and social force of culture including theories of the creative class and of cognitive and immaterial labor are indebted to historic conceptions

of the art of literary authorship It shows how contemporary literature has been involved in and has responded to creative economy phenomena including the presentation of artists as models of contentedly flexible and self managed work the treatment of training in and exposure to art as a pathway to social inclusion the use of culture and cultural institutions to increase property values and support for cultural diversity as a means of growing cultural markets Contemporary writers have tended to explore how their own critical capacities have become compatible with or even essential to a neoliberal economy that has embraced art s autonomous gestures as proof that authentic self articulation and social engagement can and should occur within capitalism Taking a sociological approach to literary criticism Sarah Brouillette interprets major works of contemporary fiction by Monica Ali Aravind Adiga Daljit Nagra and Ian McEwan alongside government policy social science and theoretical explorations of creative work and immaterial labor

Marx's Capital, Method and Revolutionary Subjectivity Guido Starosta, 2015-11-24 In Marx s Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i e capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content

The Value of Marx Alfredo Saad Filho, 2001-11-29 This book constitutes an overview of recent developments in political economy in general and Marxist value theory in particular The implications of value theory for bank credit inflation and deflation are fully explored

Contemporary Readings in Marxism Ravi Kumar, 2022-10-06 This volume straddles between being a compilation of chapters exploring the fundamental conceptual categories within Marxism while engaging with those categories at the same time demonstrating the dynamic ability of the Marxian theoretical paradigm to evolve Challenging the misinterpretation of Marxian theory as rigid deterministic and outdated it shows how the concepts used by the framework become relevant tools for understanding and analysing society Divided across two parts the volume grounds the Marxian concepts in a concrete historico material context of India It will be an important source for any student interested in social theory in general and Marxism in particular

The Logic of Marx's Capital Tony Smith, 1990-01-01 Beginning with value and commodity at the start of Volume I in Marx s major work and progressing step by step to the end of Volume III Smith establishes in detail that Capital is a systematic theory of socio economic categories ordered according to dialectical logic At each stage in his analysis of the theory Smith makes Marx s arguments more accessible He also considers in depth the objections to Marx s employment of dialectical logic that have been formulated by Hegelians especially those presented in Klaus Hartmann s Die Marxsche Theorie Smith presents a persuasive case against this whole range of Marx

criticisms many of which have also been proposed from non Hegelian standpoints *Rethinking Race, Politics, and Poetics* Brett St Louis, 2007-12-12 *Rethinking Race Politics and Poetics* offers a critical appraisal of C L R James as a major twentieth century activist intellectual exploring his prolific output spanning decades within genres as diverse as history philosophy sociology literary and cultural criticism prose fiction and reportage The book also analyzes some of the flaws and contradictions that surfaced within James writings as a consequence of the difficult circumstances in which he worked and lived as an itinerant migrant intellectual invariably involved with fringe political groups Assessing James as a lifelong committed Marxist and humanist the book argues that his core concern with racial political and cultural questions as central to human and social understanding led him to develop a distinctive critique of the modern world *A Companion to Marx's Capital, Volume 2* David Harvey, 2013-09-10 The biggest financial crisis since the Great Depression shows no sign of ending and Marx's work remains key to any attempt to understand the ebb and flow of capitalist economies For nearly forty years David Harvey has written and lectured on *Capital* becoming one of the world's foremost Marx scholars Based on his recent lectures and following the success of his companion to the first volume of *Capital* Harvey turns his attention to Volume 2 aiming to bring his depth of learning to a broader audience guiding first time readers through a fascinating and often neglected text Whereas Volume 1 focuses on production Volume 2 looks at how value comes into being through the buying and selling of goods Harvey also introduces elements from Volume 3 on credit and finance to help illustrate aspects of the contemporary crisis **A Companion To Marx's Capital** David Harvey, 2018-11-06 The radical geographer guides us through the classic text of political economy In recent years we have witnessed a surge of interest in Marx's work in an effort to understand the origins of our current political and economic crisis For nearly forty years David Harvey has written and lectured on *Capital* becoming one of the world's foremost Marx scholars Based on his recent lectures this current volume finally bringing together his guides to volumes I II and much of III presents this depth of learning to a broader audience guiding first time readers through a fascinating and deeply rewarding text *A Companion to Marx's Capital* offers fresh original and sometimes critical interpretations of a book that changed the course of history and as Harvey intimates may do so again *The Rise of Critical Animal Studies* Nik Taylor, Richard Twine, 2014-04-16 As the scholarly and interdisciplinary study of human animal relations becomes crucial to the urgent questions of our time notably in relation to environmental crisis this collection explores the inner tensions within the relatively new and broad field of animal studies This provides a platform for the latest critical thinking on the condition and experience of animals The volume is structured around four sections engaging theory doing critical animal studies critical animal studies and anti capitalism contesting the human liberating the animal veganism and activism *The Rise of Critical Animal Studies* demonstrates the centrality of the contribution of critical animal studies to vitally important contemporary debates and considers future directions for the field This edited collection will be useful for students and scholars of sociology gender studies psychology geography and social

work **Marx's Concept of Money** Anitra Nelson, 2012-11-12 This work relates Marx's theory of money to his overall political economy and places it firmly within the wider context of his political and philosophical thought. It has for some time been held that there exists an epistemological break between the early humanist and later scientific Marx. However, in this ground-breaking study, Anitra Nelson links Marx's concept of money to his early key concepts with particular reference to alienation.

Crisis and Class War in Egypt Sean F. McMahon, 2016-10-15 In 2011, capital's crisis erupted in Egyptian society. This eruption and subsequent politics have been misrepresented as revolutionary as the working class was and is increasingly so devalued and disempowered. In *Crisis and Class War in Egypt*, Sean F. McMahon critically analyses Egypt's recent political history. He argues that the so-called revolution was the appearance of capital's destruction of the value of the Egyptian working class and an existential crisis for capital. In response, productive capital in the form of the military used, disposed of, and replaced its junior partners in governing: first the predatory capital of the Mubarak state with the commodity capital of the Muslim Brotherhood, and then commodity capital with the finance capital of the Gulf Cooperation Council. These reconfigurations have been expressed in all manner of reactionary governmental arrangements, including constitutions, legislation, and currency reform. Extending today's analysis into the near future, McMahon sees the war of Egyptian society intensifying and increasingly violent lives for Egyptian workers.
