Rethinking Language Pedagogy From A Corpus Perspective:

Rethinking Language Pedagogy from a Corpus Perspective Lou Burnard, 2000 This selection of edited papers from the third international conference on Teaching and Language Corpora held at Keble College Oxford in 1998 bears witness to the continued expansion of this interdisciplinary field The use of computer corpora is no longer seen as an end in itself but rather as an indispensable tool in language pedagogy both by providing better grounded decisions about the topics to be taught and by facilitating the production of better teaching materials Computer corpora also encourage a shift towards learner centred exploratory teaching practice which are shown to be effective in a wide variety of contexts

Using Corpora in the Language Classroom Randi Reppen, 2010-03-22 Explains and illustrates how teachers can use corpora to create classroom materials and activities to address specific class needs Using Corpora in the Language Classroom shows teachers how to use corpora and corpus tools to expand student learning Together with its companion website this teacher friendly book demystifies corpus linguistics with clear explanations instructions and examples It provides the essential knowledge tools and skills teachers need to enable students to discover how language is really used Clear and concise this volume provides An overview of corpus linguistics Clear explanations of terminology Tasks and activities that invite readers to interact with the material Principled instructions for creating classroom materials and activities including how to create corpora to address specific class needs

How to Use Corpora in Language Teaching John McHardy Sinclair, 2004-01-01 After decades of being overlooked corpus evidence is becoming an important component of the teaching and learning of languages Above all the profession needs guidance in the practicalities of using corpora interpreting the results and applying them to the problems and opportunities of the classroom This book is intensely practical written mainly by a new generation of language teachers who are acknowledged experts in central aspects of the discipline It offers advice on what to do in the classroom how to cope with teachers queries about language what corpora to use including learner corpora and spoken corpora and how to handle the variability of language it reports on some current research and explains how the access software is constructed including an opportunity for the practitioner to write small but useful programs and it takes a look into the future of corpora in language teaching

Digital Literary Studies David L. Hoover, Jonathan Culpeper, Kieran O'Halloran, 2014-02-05 Digital Literary Studies presents a broad and varied picture of the promise and potential of methods and approaches that are crucially dependent upon the digital nature of the literary texts it studies and the texts and collections of texts with which they are compared It focuses on style diction characterization and interpretation of single works and across larger groups of texts using both huge natural language corpora and smaller more specialized collections of texts created for specific tasks and applies statistical techniques used in the narrower confines of authorship attribution to broader stylistic questions It addresses important issues in each of the three major literary genres and intentionally applies different techniques and concepts to poetry prose and drama It aims to present a provocative and

suggestive sample intended to encourage the application of these and other methods to literary studies Hoover Culpeper and O Halloran push the methods techniques and concepts in new directions apply them to new groups of texts or to new questions modify their nature or method of application and combine them in innovative ways **The NNEST Lens** Ahmar Mahboob, 2010-02-19 The NNEST Lens invites you to imagine how the field of TESOL and applied linguistics can develop if we use the multilingual multicultural and multinational perspectives of a NNEST Non Native English Speakers in TESOL lens to re examine our assumptions practices and theories in the field The NNEST lens as described in and developed through this volume is a lens of multilingualism multinationalism and multiculturalism through which NNESTs and NESTs as classroom practitioners researchers and teacher educators take diversity as a starting point in their understanding and practice of their profession The 16 original contributions to this volume include chapters that question theoretical frameworks and research approaches used in studies in applied linguistics and TESOL as well as chapters that share strategies and approaches to classroom teaching teacher education and education management and policy As such this volume will be of interest to a wide range of students practitioners researchers and academics in the fields of education and linguistics **The Handbook of English Linguistics** Bas Aarts, April McMahon, 2008-04-15 The Handbook of English Linguistics is a collection of articles written by leading specialists on all core areas of English linguistics that provides a state of the art account of research in the field Brings together articles from the core areas of English linguistics including syntax phonetics phonology morphology as well as variation discourse stylistics and usage Written by specialists from around the world Provides an introduction to a key area of English Linguistics and includes a discussion of the most recent theoretical and descriptive research as well as extensive bibliographic references **Corpus-based Analyses of the Problem-Solution Pattern** Lynne Flowerdew, 2008-02-06 This book reports research on the Problem Solution rhetorical pattern which has to date received very little attention in corpus based studies Insights from genre analysis and systemic functional grammar are also applied to the analysis of the Problem Solution pattern thus moving towards a more multi faceted analysis of corpus data The pattern is investigated in two specialized corpora of technically oriented report writing a professional corpus and a student corpus using a key word and key key word analysis Phraseological analyses of key words in both corpora are presented Data show that students writing lacks a range of lexico grammatical patternings for expressing the Problem and Solution elements of the pattern The book concludes with some pedagogic implications and applications of the findings Suggested concordancing activities are discussed within the context of key issues in the field of data driven learning *Forum* , 1982 **English Teaching Forum** , 2007 **Corpora in ESP/EAP Writing Instruction** Maggie Charles, Ana Frankenberg-Garcia, 2021-03-29 This collection showcases the latest innovations in research on the application of corpora and corpus based methods in ESP EAP writing instruction and the many ways in which corpora can be successfully and practically integrated in ESP EAP programmes While previous work has discussed the successful use of corpora in teaching

writing in the areas of ESP EAP this book is the first of its kind to bring the most up to date research on the topic together in one place The volume s unique structure mirrors the key stages of the writing instruction process from preparation to exploitation to analysis The book begins by showing how corpora can be used to prepare materials moving into an exploration of how students in ESP EAP programmes use corpora in practice before bringing the discussion full circle to the ways in which corpus based approaches might be implemented to analyse ESP EAP student writing This approach presents readers with insights into how corpora can be effectively integrated into ESP EAP writing instruction at every step of the process and opens the way for future areas of study This book will be of particular interest to students and researchers in applied corpus linguistics English for Specific Purposes and English for Academic Purposes as well as active practitioners in ESP EAP writing instruction English as a Lingua Franca: Perspectives and Prospects Marie-Luise Pitzl,Ruth

A Comparative Study of Wh-Words in Chinese Efl Textbooks, Elicited Native and Non-Native Speaker Data and Written Native and Non-Native Speaker Corpora Feifei Zhang, 2015-06-24 This study presents a corpus based analysis of the use of wh sentences by language learners in language textbooks and in authentic written discourse It focuses on the polysemous nature of wh words which can be used as interrogatives declaratives and to introduce subordinate clauses The analysis of wh sentences in EFL textbooks showed that there are more prototypical examples at low proficiency levels When teaching the interrogative textbooks focus almost exclusively on grammatical words particularly at the beginners level The analysis of wh sentences elicited from Chinese speaking learners of English and Expert users of English suggested that the prototypical structure is very strong in both sets of data although native speakers tend to use more prefabricated chunks of language The analysis of wh sentences from native speakers and non native speakers written corpora suggested that subordinate clauses are strongly present in both corpora except for the word why in non native speakers data The use of different words occurring immediately after wh words in the two corpora can be explained by 1 the relatively small vocabulary size of the L2 speakers 2 non native speakers lack of awareness of restricted collocations 3 L1 transfer 4 over under generalization of rules and 5 textbooks

Semantic Prosody Dominic Stewart, 2010-03-17 Semantic Prosody is the first full length treatment of semantic prosody a concept akin to connotation but which connects crucially with typical lexical environment For example it has been claimed that the adverb utterly is characterised by an unfavourable semantic prosody on account of its habitual co occurrence with words denoting unfavourable states of affairs such as ridiculous disgraceful and miserable Primarily for this

reason semantic prosody has emerged almost exclusively within the field of corpus linguistics. However, the overall picture is complex and this book offers a much needed review of how semantic prosody has been described and approached in contributions on the subject as well as a critical analysis of those contributions and a number of case studies. It discusses the relevance of the theory of priming in this area and whether semantic prosody has cogency as a theoretical concept. Lastly, it points the way for future research. Since work on semantic prosody so far has been occasional, brief and distributed across a range of monographs, articles and conference papers, this book, which does not assume previous knowledge of the subject, will constitute a fundamental work of reference for scholars, teachers and students alike. At the same time, *Semantic Prosody* goes beyond the central topic of the work with wide reaching implications for both corpus linguistics and linguistics overall. In this sense, the concept of semantic prosody is used as a springboard for investigations into issues of vital importance for corpus studies such as the structuring and presentation of text in a corpus, the varying methodologies adopted by analysts to approach and interpret corpus data as well as broader issues such as the role of intuition, introspection and elicitation in empirical language studies.
