Monarchs of the Forest Anne Ensign Brown, 1984 Discusses the three species of redwood trees which now grow naturally only in California Oregon and China The Forest King Carson Clay, 2006-05-05 During the Crusades a family is displaced Fielo the father his wife Elizabeth and young sons Erik Andre and Paul must leave They lead a herd of horses east to find a home in the forest Fie had visited long ago Fielo instructs his sons and friends in archery Skill with bow and arrow is paramount for survival The young people learn the craft of making equipment from materials found in the forest Popularity of archery increases after Erik impresses villagers at a local contest Skill in archery improves to a level previously unsurpassed The Fifth Crusade was to be fought in Egypt Nobles were required to provide many soldiers As a result bandits roam freely With the homeland unprotected Lord Randolph enlists The Order of the Arrow to train as squires if they agree to defend his castle Under tutelage of five knights they gain skill in weaponry horsemanship military tactics and social graces Archery the primary defense from the castle walls is practiced by all Hebron a Comandeur of previous wars sees the countryside ripe for plucking and moves to increase his holdings He enlists bandit chiefs to train an army of over two thousand With the promise of plunder they pillage the land moving ever nearer the forest region Erik leads a band of raiders against them They hide in the forest they attack Hebrons army as it lays siege to the castle Numerous ambushes distract Hebron and he sends men to deal with the raiders Erik is driven farther into the forest Their friends Tierra and Madelyn risk their lives to assist Erik but are captured Another threat is Lockner who is moving toward them from the west to reinforce Hebron Desperate measures are needed or the region will fall under Hebrons control *Forest keep [by A. King]*. Alice King, 1862 **Diana, Princess of the Royal Forest of the Peak; From Domesday to Derbyshire with the Eyres, Fanshawes, Featherstonehaughs, and Fanchers** Patrick Fancher, 2013-03-27 The author draws upon Peak Forest legends to unite readers with Diana Eyre's spirit A phantom wind ushers the memory of Diana into the forest where she recounts her visits to the place of which the King had given authority to her ancestors She shares treading upon thoroughfares carved out by the Romans She recollects walks through the dark canopied forest of Hope Derwent Valley and Sherwood Forest the retreat of Robin Hood She gasps at thoughts of Henry VIII's doings during Reformation She recalls Eyre monuments in Hathersage Churchyard near Little John's grave and foresees Hathersage as the setting for the book *Jane Eyre* As Diana relives history and superstitious tales an elusive wolf lets out a chilling howl The story nears its close as the wolf's distant cry breaks the wind's spell and provokes it into fits of aggravated maneuverings Seemingly at the behest of nature's call the wind having sensed its completed mission takes Diana's memories back to their former hidden realm **The Interrupted Forest** Neil Rolde, 2024-10-01 Add to this the thousands of farms that have grown back to woods since the Civil War and you have the most forested state by percentage in the United States But the uninterrupted forest that Henry David Thoreau first saw in the 1840s was never exactly that Loggers had cut it severely European settlers had gnawed into it and much earlier native people had left their

mark This book takes you deep into the past to understand the present allowing you to hear the stories of the people and events that have shaped the woods and made them what they are today *Conservation's Roots* Abigail P. Dowling, Richard Keyser, 2020-06-11 The ideas and practices that comprise conservation are often assumed to have arisen within the last two centuries However while conservation today has been undeniably entwined with processes of modernity its historical roots run much deeper Considering a variety of preindustrial European settings this book assembles case studies from the medieval and early modern eras to demonstrate that practices like those advocated by modern conservationists were far more widespread and intentional than is widely acknowledged As the first book length treatment of the subject *Conservation's Roots* provides broad social historical and environmental context for the emergence of the nineteenth century conservation movement

The Symbolic Design of Windsor-Forest Pat Rogers, 2004 This is the first detailed exploration of one of the earliest major poems by Alexander Pope *Windsor Forest* 1713 The book reveals how Pope used the artistic conventions of the Stuart court such as masque architecture allegorical painting and heraldry to create the last great Renaissance poem in English A coherent symbolic design is constructed around the themes of the river and the forest Pope organizes the structure and style of the poem to create a prophetic version of nationhood drawing on such sources as the plays of Ben Jonson the Whitehall paintings of Rubens the architecture of Inigo Jones the panegyric work of Dryden and the topographical poetry of Drayton The political dimensions of the poem are considered in relation to the foundation of the South Sea Company in 1711 with its foreshadowing of imperial issues to come The book will spark further interest in a poem that has been gaining increasing attention recently from writers such as E P Thompson and Laura Brown It shows the centrality of *Windsor Forest* in Pope's own career and the centrality of Pope in the debates of his time Pat Rogers is DeBartolo Professor in the Liberal Arts at the University of

Forest Policies and Social Change in England Sylvie Nail, 2008-05-08 Forestry has been witness to some dramatic changes in recent years with several Western countries now moving away from the traditional model of regarding forests merely as sources of wood Rather these countries are increasingly recognizing their forests as multi purpose resources with roles which go far beyond simple economics In this innovative book Sylvie Nail uses England as a case study to explore the relationships between forests society and public perceptions raising important questions about forest policy and management both now and in the future Adopting a sociological approach to forest policy and management the book discusses the current validity of the two principles underlying forestry since the Middle Ages first that forestry should only exist when no better use of the land can be made and second that forestry itself should be profitable The author stresses how values and perceptions shape policies and conversely how policies can modify perceptions and also how policies can fail if they do not take perceptions into account She concludes

that many of the issues facing English forestry in the 21st century from leisure health and amenity provision through education and rural as well as urban regeneration to biodiversity conservation go well beyond both national borders and the scope of forestry Indeed forestry in the 21st century seems to be less about planting and managing trees than about being a vector and a mirror of social change This novel synthesis provides a valuable resource for advanced students and researchers from all areas of natural resource studies including those interested in social history socio economics cultural geography and environmental psychology as well as those studying landscape ecology environmental history policy analysis and natural resource management
