Hellenism and the Primary History Robert Karl Gnuse, 2020-09-30 This collection of essays seeks to demonstrate that many biblical authors deliberately used Classical and Hellenistic Greek texts for inspiration when crafting many of the narratives in the Primary History Through detailed analysis of the text Gnuse contends that there are numerous examples of clear influence from late classical and Hellenistic literature Deconstructing the biblical and Greek works in parallel he argues that there are too many similarities in basic theme meaning and detail for them to be accounted for by coincidence or shared ancient tropes Using this evidence he suggests that although much of the text may originate from the Persian period large parts of its final form likely date from the Hellenistic era With the help of an original introduction and final chapter Gnuse pulls his essays together into a coherent collection for the first time The resultant volume offers a valuable resource for anyone working on the dating of the Hebrew Bible as well as those working on Hellenism in the ancient Levant more broadly

Neubern, 2025-01-23 This book presents a new theoretical framework for the study of hypnosis based on an innovative epistemological approach called De sign This approach transcends the opposition subjectivity objectivity and presents itself as a metaknowledge that integrates design and semiotics and proposes a phenomenological method of inquiry that helps overcome some of the traditional challenges to create theoretical models to explain hypnosis Both hypnosis and De sign are critical practices against absolute notions of reality especially regarding time space and otherness Both of them consider the importance of epistemological notions such as imagination feelings and desire that modern science commonly marginalizes Hypnosis and De sign implicate people in partnership being critical to a dominant notion of control Thus the book presents in depth discussions on major themes of hypnosis bringing clinical practice closer to the reflections brought by De sign Hypnosis in the Realm of De Sign shows how to integrate semiotic systems pragmatism and De sign principles to analyze actual hypnotherapeutic experiences As with every De sign situation each patient requires a unique therapeutic

strategy and approach that is individually appropriate for them The author thereby encourages therapists to become designers working with not for their subjects to create a context within which their subjects can awaken their therapeutic potential By doing so patients can then bring into focus that which could be rather than focusing on that which is

Narcissus and the Invention of Personal History Kenneth J. Knoespel, 2015-08-14 Originally published in 1985 This investigation of Ovid's fable takes a different tack to previous studies of the love lyric or the themes but looks at the creation of narrative strategies to explain Narcissus' experience The story has always been understood as literally impossible but invites readers to ask what is meant by the puzzling tale of deception and death The limits placed on the fable by the commentaries of the medieval period allow us to appreciate the narrative expansion of the fable in twelfth and thirteenth century poetry Themes in this book are the way the fable is used as a means for knowledge of physical nature and the

development of science the importance of language in the fable and in its settings when rewritten in other texts and psychoanalytic aspects of Echo and Narcissus The fable has the capacity to represent mental life and psychological crisis within other narratives and this is also an important discussion point based around the medieval text Roman de la Rose The book also considers the wider Metamorphoses and Ovid's importance for literature **Nature London** ,1873
