Pathochemical Markers In Major Psychoses:

Pathochemical Markers in Major Psychoses H. Beckmann, P. Riederer, 2012-12-06 This volume contains the proceedings of the symposium Pathochemical Markers in Major Psychoses held in Vienna in July 1983 The development of biological markers in psychiatric diseases particularly in the field of neurochemistry has made substantial progress during recent years although the multiple mechanisms of mental illness are still not fully understood The greatest contribution has come through the development of new therapeutic agents that not only provide invaluable help for psychiatric patients but also serve as chemical tools for the investigation of the biological mechanisms underlying the disease The catecholamine and serotonin hypotheses for major psychoses have been of particular heuristic value and have stimulated important research However the scope of our scientific endeavours has to be broadened to include other putative biological causes of psychoses e.g. pathomorphological changes aberrations in the metabolism of other amino acids and of lipids or the formation of endogenous toxins This book presents new selected studies of the pathochemical bases of schizophrenia and affective psychoses Although several topics were inevitably not included in this symposium we nevertheless hope that it represents an integration of basic pathomorphological research with current clinical findings in the area of pathochemical markers in psychiatry October 1984 HELMUT BECKMANN PETER RIEDERER Contents Neuromorphological Background of Pathochemical Studies in Major Psychoses K JELLINGER With 1 Figure of Psychopathological Classification The Significance in Interpreting Biochemical Findings E GABRIEL

Biological Psychiatry, Higher Nervous Activity P. Pichot, 2013-06-29 The purpose of the World Psychiatric Association is to coordinate the activities of its Member Societies on a world wide scale and to advance enquiry into the etiology pathology and treatment of mental illness To further this purpose the Association organizes mono or multithematic Regional Symposia in different parts of the world twice a year and World Congresses dealing with all individual fields of psychiatry once every

five or six years Between these meetings the continuation of the Association s scientific work is assured through the activities of its specialty sections each covering an important field of psychiatry The programs of the World Congresses reflect on the one hand the intention to present the coordinating functions of the Association and on the other to open a broad platform for a free exchange of views Thus the VII World Congress of Psychiatry held in Vienna from July 11 to 16 1983 was composed of two types of scientific events those structured by the Association and those left to the initiative of the participants The first type comprised Plenary Sessions planned by the Scientific Program Committee and Section Symposia organized by the WPA sections the second embraced Free Symposia free papers video sessions and poster presentations prepared by the participants Altogether 10 Plenary Sessions 52 Section Symposia and 105 Free Symposia took place and 78 free papers and poster sessions and 10 video sessions were held
