The two topics of politics and the economy are interconnected. Economics is mainly concerned with analyzing and influencing the market. The activities involved in running a country or region are referred to as politics, notably the disputes between the parties in control. General Motors said that its 1975 exemplary year automobiles would have an average worth rise of 9.5%, which was bound to lead to increased costs in other sectors (Magoc, 2021). The problem of price rise did not go away. Nixon's strategies were to blame, but he had warned Ford not to make the same blunder again by enforcing wage and price restrictions as he did in 1971. Ford pointed out another factor contributing to the sluggish economy: the lasting effects of the Great
