The U.S. Women's Jury Movements and Strategic Adaptation Holly J. McCammon, 2012-04-30 When women won the vote in the United States in 1920 they were still routinely barred from serving as jurors but some began vigorous campaigns for a place in the jury box This book tells the story of how women mobilized in fifteen states to change jury laws so that women could gain this additional right of citizenship Some campaigns quickly succeeded others took substantially longer The book reveals that when women strategically adapted their tactics to the broader political environment they were able to speed up the pace of jury reform while less strategic movements took longer A comparison of the more strategic women's jury movements with those that were less strategic shows that the former built coalitions with other women's groups took advantage of political opportunities had past experience in seeking legal reforms and confronted tensions and even conflict within their ranks in ways that bolstered their action

The Diffusion of Social Movements Rebecca Kolins Givan, Kenneth M. Roberts, Sarah A. Soule, 2010-07-19 It is widely recognized that social movements may spread or diffuse from one site to another Such diffusion however is a complex and multidimensional process that involves different actors networks and mechanisms This complexity

has spawned a large body of literature on different aspects of the diffusion process yet a comprehensive framework remains an elusive target This book is a response to that need and its framework focuses on three basic analytical questions First what is being diffused Second how does diffusion occur Finally what is the impact of diffusion on organizational development and shifts in the scale of contentious politics This volume suggests that diffusion is not a simple matter of political contagion or imitation rather it is a creative and strategic process marked by political learning adaptation and innovation *Full Spectrum Resistance, Volume One* Aric McBay, 2019-05-28 A guide to direct action for those disillusioned with the posturing of liberal activism The radical left is losing but it doesn't have to be that way Here is the radical's guide to activist work the manual we need at this crucial moment to organize for universal human rights a habitable earth and a more egalitarian society Thoroughly exploring the achievements and failures of radical movements throughout history from 19th century anti colonial rebellions in China and the environmental actions of First Nations and Native American tribes throughout the 20th century to Black Lives Matter and the fight for Gay Liberation the two volumes of Full Spectrum Resistance candidly advocate for direct action not just risk averse models of protest marches and call ins With in depth histories and case studies of social justice and environmental movements noted writer activist and farmer Aric McBay explains why passive resistance alone cannot work and how we must be prepared to do whatever it takes to create substantial social change In Volume 1 Building Movements and Fighting to Win McBay describes the need for resistance movements and paints a portrait of what a thriving resistance movement might look like today Citing successful movements such as the Deacons of Defense of the American Civil Rights Movement the anti colonial revolutions in Guinea and Cape Verde and activist groups like Act UP McBay deftly illustrates how to organize activist groups and encourage enlistment while also noting the necessary precautions one must take to secure these radical circles from infiltration and collapse *Handbook of Politics* Kevin T. Leicht, J. Craig Jenkins, 2009-11-28 Political sociology is the interdisciplinary study of power and the intersection of personality society and politics The field also examines how the political process is affected by major social trends as well as exploring how social policies are altered by various social forces Political sociologists increasingly use a wide variety of relatively new quantitative and qualitative methodologies and incorporate theories and research from other social science cognate disciplines The contributors focus on the current controversies and disagreements surrounding the use of different methodologies for the study of politics and society and discussions of specific applications found in the widely scattered literature where substantive research in the field is published This approach will solidly place the handbook in a market niche that is not occupied by the current volumes while also covering many of the same theoretical and historical developments that the other volumes cover The purpose of this handbook is to summarize state of the art theory research and methods used in the study of politics and society This area of research encompasses a wide variety of perspectives and methods that span social science disciplines The handbook is designed to reflect that diversity in content method and focus

In addition it will cover developments in the developed and underdeveloped worlds Popular Agency and Politicisation in Nineteenth-Century Europe Diego Palacios Cerezales, Oriol Luján, 2022-11-22 This book provides an entry point to the most cutting edge lines of research on popular political mobilisation in Europe It brings together leading scholars from Germany France Britain the Netherlands and Spain The chapters explore the connected dimensions of popular participation within different countries and across borders covering the topics of iconoclasm popular acclamations street politics associations petitions and electoral agitation Focusing on the role of disenfranchised citizens and women this collection broadens the themes of traditional political historical research that has identified political participation with the right to vote and struggles for political inclusion and brings a wide array of formal and informal political practices to the centre of nineteenth century European life A must read for scholars undergraduates and graduate students wishing to explore multiple dimensions of the history of political engagement and politicisation **The SAGE Encyclopedia of Alcohol** Scott C. Martin, 2014-12-16 Alcohol consumption goes to the very roots of nearly all human societies Different countries and regions have become associated with different sorts of alcohol for instance the beer culture of Germany the wine culture of France Japan and saki Russia and vodka the Caribbean and rum or the moonshine culture of Appalachia Wine is used in religious rituals and toasts are used to seal business deals or to celebrate marriages and state dinners However our relation with alcohol is one of love hate We also regulate it and tax it we pass laws about when and where it s appropriate we crack down severely on drunk driving and the United States and other countries tried the failed Noble Experiment of Prohibition While there are many encyclopedias on alcohol nearly all approach it as a substance of abuse taking a clinical medical perspective alcohol alcoholism and treatment The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon as well both for good and for ill from the earliest days of humankind
