Pathways To Social Class A Qualitative Approach To Social Mobility:

Pathways to Social Class Daniel Bertaux, Paul Thompson, 1997-01-16 Calling for a broader new approach to social mobility research Daniel Bertaux and Paul Thompson here move beyond pure statistics to use qualitative techniques such as life stories and family case studies to examine more closely the dynamics of mobility and address more fundamental sociological questions Up to now the extensive sociological literature on mobility has been based around the survey method As a result we have access to abundant statistical data but there is little information available to explain how and why people follow particular life paths To overcome these limitations the authors have developed an alternative complementary approach using life stories case histories of whole families over several generations or case studies of local communities Employing the case study approach does not prevent the identification of structural trends on the contrary it allows us to analyse those collective processes through their local effects restoring the links with the classics of sociological thought The authors together with a group of researchers who have worked closely with them tackle problems such as What exactly is transmitted between generations is it wealth or land occupational models or skills social networks or values and orientations What kind of assets can immigrants draw on How can a social elite survive the upheaval of a popular revolution What is the impact of marriage on the mobility of men and women How far can belonging to one locality rather than another or choosing a particular house shape mobility paths and aspirations Do dreams of mobility matter Pathways to Social Class Paul Richard Thompson, 2023 This text focusing on issues of social class is intended for scholars and students of sociology It covers issues of social stratification and mobility **Migration, Education and Socio-Economic Mobility** Nitya Rao, 2014-06-11 The primacy of education in development agendas is unquestioned With the gradual acknowledgement of the potential benefits that migration can hold for development the relationship between migration and education is a growing area of research Migration Education and Socio Economic Mobility explores how the decisions people make in terms of both their migration choices and educational investments mediated as they are by gender class caste and nationality can potentially contribute to earning incomes building social and symbolic capital or reshaping gender relations all elements contributing to the process of economic and social mobility Much of the existing literature examining the links between migration and education focuses either on the investment of migrant remittances in the education of their children back home or on brain drain that refers to the migration of skilled workers from the developing to the developed world Most of these discussions are firmly rooted in materialist arguments and while undeniably important tend to underplay the social processes through which migration and education interact to shape people's lives identities and status in society Along with economic security people also aspire to social mobility and status enhancement The ideas presented in this book take a more varied and nuanced view of the relationship between education and migration This book was originally published as a special issue of Compare A Journal of Comparative and International Education Living Through the Soviet System Leo

Lowenthal,2017-07-05 For a period of over seventy years after the 1917 revolutions in Russia talking about the past either political or personal became dangerous The situation changed dramatically with the new policy of glasnost at the end of the 1980s The result was a flood of reminiscence almost nightly on television and more formally collected by new Russian oral history groups and also by Western researchers Daniel Bertaux and Paul Thompson both began collecting life story and family history interview material in the early 1990s and this book is the outcome of their initiative Living Through the Soviet System analyzes through personal accounts how Russian society operated on a day to day level It contrasts the integration of different social groups the descendents of the pre revolutionary upper classes the new industrial working class or the ethnically marginalized Russian Jews It examines in turn the implications of family relationships working mothers absent fathers and caretaking grandmothers patterns of eating together and of housing the secrecy of sex the suppression of religion and the small freedoms of growing vegetables on weekends on a dacha plot Because of its basis in direct testimonies the book reveals in a highly readable and direct style the meaning for ordinary men and women of living through those seven dark decades of a great European nation Because of the centrality of Soviet Russia to the history of the twentieth century world this book will be of interest to a wide range of readers It will be of importance to students researchers and teachers of history and sociology as well as specialists in East European and other communist societies Inequity in the Technopolis

Joseph Straubhaar,Jeremiah Spence,Zeynep Tufekci,Roberta G. Lentz,2012-03-15 Over the past few decades Austin Texas has made a concerted effort to develop into a technopolis becoming home to companies such as Dell and numerous start ups in the 1990s It has been a model for other cities across the nation that wish to become high tech centers while still retaining the livability to attract residents Nevertheless this expansion and boom left poorer residents behind many of them African American or Latino despite local and federal efforts to increase lower income and minority access to technology This book was born of a ten year longitudinal study of the digital divide in Austin a study that gradually evolved into a broader inquiry into Austin s history as a segregated city its turn toward becoming a technopolis what the city and various groups did to address the digital divide and how the most disadvantaged groups and individuals were affected by those programs The editors examine the impact of national and statewide digital inclusion programs created in the 1990s as well as what happened when those programs were gradually cut back by conservative administrations after 2000 They also examine how the city of Austin persisted in its own efforts for digital inclusion by working with its public libraries and a number of local nonprofits and the positive impact those programs had Self-Made Men

Social Beings, Future Belongings Anna Tsalapatanis, Miranda Bruce, David Bissell, Helen Keane, 2019-04-29 Social Beings Future Belongings is a collection of sociological essays that address an increasingly relevant matter what does belonging look like in the twenty first century The book critically explores the concept of belonging and how it can respond to contemporary problems in not only the traditional domains of citizenship and migration but also in detention practices queer and feminist politics Australian literature and fashion technology housing and rituals Drawing on examples from Australia Europe the United Kingdom and the United States each topic is examined as a different kind of problem for the future as a toil an intensity or a promise Ultimately the collection argues that creating new ways to belong in contemporary times means reimagining the traditional terms on which belonging can happen as well as the social itself Read on their own each chapter presents a compelling case study and develops a set of critical tools for encountering the empirical epistemological and ontological challenges we face today Read together they present a diverse imagination that is capable of answering the question of belonging in to and with the future Social Beings Future Belongings shows how belonging is not a static and universal state but a contingent emergent and ongoing future oriented set of practices Balancing empirical and theoretical work this book will appeal to researchers students and practitioners alike
