Pavlov A Biography:

Ivan Pavlov Daniel Philip Todes,2014 This is a definitive deeply researched biography of Russian physiologist Ivan Pavlov 1849 1936 and is the first scholarly biography to be published in any language The book is Todes s magnum opus which he has been working on for some twenty years Todes makes use of a wealth of archival material to portray Pavlov s personality life times and scientific work Combining personal documents with a close reading of scientific texts Todes fundamentally reinterprets Pavlov s famous research on conditional reflexes Contrary to legend Pavlov was not a behaviorist a misimpression captured in the false iconic image of his training a dog to salivate to the sound of a bell rather he sought to explain not simply external behaviors but the emotional and intellectual life of animals and humans This iconic objectivist was actually a profoundly anthropomorphic thinker whose science was suffused with his own experiences values and subjective interpretations This book is also a traditional life and times biography that weaves Pavlov into some 100 years of Russian history particularly that of its intelligentsia from the emancipation of the serfs to Stalin s time Pavlov was born to a family of priests in provincial Ryazan before the serfs were emancipated made his home and professional success in the glittering capital of St Petersburg in late imperial Russia suffered the cataclysmic destruction of his world during the Bolshevik seizure of power and civil war of 1917 1921 rebuilt his life in his 70s as a prosperous dissident during the Leninist 1920s and flourished professionally as never before in 1929 1936 during the industrialization revolution and terror of Stalin Todes s story of this powerful personality and extraordinary man is based upon interviews with surviving coworkers and family members along with never before analyzed taped interviews from the 1960s and 1970s examination of hundreds of scientific works *Pavlov* B. Pavlov Boris Peter Babkin,1951 Pavlov Boris Petrovič Babkin,1949 **Ivan Pavlov** Daniel Todes,2000-06-22 Hailed as the Prince of World Physiology Ivan Pavlov continues to influence scientists today His pioneering research on digestion the brain and behavior still provides important insights into the minds of animals including humans and is an inspiring example of imaginative experimental technique Pavlov graduated from the theological seminary in his native Ryazan Russia in 1869 but almost immediately switched to medicine and enrolled at St Petersburg University He became interested in the physiology of circulation and digestion which led him to the study of conditional and unconditional reflexes He conducted thousands of experiments with dogs developing a way to use a dogs salivary glands as a window through which to observe the workings of its brain Pavlov lived through the Russian Revolution and the civil war that followed it Lenin himself recognized his genius and provided financial backing for his research the new Soviet government built a research complex dedicated exclusively to his experiments Pavlov was honored for his contributions to science with the Nobel Prize for

Physiology in 1904 Oxford Portraits in Science is an ongoing series of scientific biographies for young adults Written by top scholars and writers each biography examines the personality of its subject as well as the thought process leading to his or her discoveries These illustrated biographies combine accessible technical information with compelling personal stories to portray the scientists whose work has shaped our understanding of the natural world Ivan Pavlov Charles River Charles River Editors,2019-04-19 Includes pictures Includes online resources and a bibliography for further reading Don't become a mere recorder of facts but try to penetrate the mystery of their origin Pavlov Pavlov's dogs are to Psychology 101 what Rome is to antiquity classes This particular series of experiments and the concept of classical conditioning likely ring a bell for many readers because they have been referenced in countless texts both scientific and otherwise and they have seeped into various forms of pop culture throughout the years More often than not the man behind this universally applicable phenomenon gets mentioned in conjunction with the dogs which only cements his status as a household name over 80 years after his death In the critically acclaimed comedy The Office the resident prankster Jim conditions his coworker Dwight with the default Microsoft jingle that plays when a user unlocks their workstation and some mints For days on end Jim reboots his computer prompting the memorable two note tune and offers his colleague an Altoid each time One day Jim restarts his computer only this time he makes no further movements and without missing a beat Dwight instinctively extends his palm Dwight continued on with his work with an outstretched hand only snapping out of his daze when Jim inquired what it was that his colleague was doing I I don't know a genuinely baffled Dwight admits His face then contorts with disgust and he complains about the unsavory taste in his mouth The concept has also been parodied in animated television shows including the classic Warner Brothers animation Pinky and the Brain In an episode entitled Pavlov's Mice the pair of genetically modified mice are trapped in the cage of none other than a cartoon version of Ivan Pavlov himself When Pavlov strikes a golden gong Brain begins to tap dance and sing a children's nursery rhyme and he is then rewarded with a morsel of cheese Next to him the simple minded Pinky claps giddily and gushes that he could watch Brain sing and dance all day To this a miserable Brain reveals a miniature chalkboard crowded with dozens of tally marks You have watched it all day Pinky says the disgruntled Brain 61 times to be exact It's a conditioned reflex to that infernal gong I'm powerless to stop it The relatability of the classical conditioning experiment is perhaps why it is so often used on the screen both big and small The aforementioned examples of the phenomenon may not have taken place in reality but similar ones manifest can be found in various aspects of daily life When a child is taunted and teased in school they may begin to feign illness and drum up all sorts of excuses to stay home from school for they have now equated the establishment with feelings of terror and dread Similarly children who feel unjustly singled out and penalized by an instructor may begin to despise and resent the given subject Classical conditioning can also be subtle with something as simple as a song being enough to trigger an emotional response Hearing a song that reminds one of their ex may elicit a sense of sorrow or disgust depending on the conditions surrounding

the end of the relationship Conversely a throwback radio station playing a listener s favorite song back in high school might awaken feelings of nostalgic bliss Ivan Pavlov The Life and Legacy of the Famous Russian Psychologist examines the experiments that made Pavlov one of the 20th century s most famous psychologists Along with pictures of important people places and events you will learn about Pavlov like never before
