DICTIONARY

LOHREN GREEN

Poetical Dictionary Abridged

RD Boyd

Poetical Dictionary Abridged:

Poetical Dictionary Lohren Green, 2003 Poetry Lohren Green's POETICAL DICTIONARY concludes with chaos and begins with acrobatics. In between these he presents us with both a book of words and a cosmos, a linguistic gas cloud bounded by the universal and the particular. Green's project departs from the traditional dictionary, a peculiar contraption of sense and order. In the preface he reviews the architectures of these teetering, teeming linguistic edifices. His attitude towards words is almost that of a material scientist exploding an individual specimen of language: bulwark, heft, oyster, purple, torpid, foreplay, in order to ascertain its synthesis of body and concept. Organized into SUBJECT, WORD, PRONUNCIATION, ETYMOLOGY, and DEFINITION, each entry in the POETICAL DICTIONARY makes the traditional dictionary hiccup, divulging the stanza within the standard definition and the wiggle of wit in the pronunciation key, addressable, glow unit of information from pixel.

Dictionary Poetics Craig Dworkin, 2020-05-05 The new ways of writing pioneered by the literary avant garde invite new ways of reading commensurate with their modes of composition. Dictionary Poetics examines one of those modes: book-length poems from Louis Zukofsky to Harryette Mullen, all structured by particular editions of specific dictionaries. By reading these poems in tandem with their source texts, Dworkin puts paid to the notion that even the most abstract and fragmentary avant garde literature is nonsensical, meaningless, or impenetrable. When read from the right perspective, passages that at first appear to be discontinuous, irrational, or hopelessly cryptic suddenly appear logically consistent, rationally structured, and thematically coherent. Following a methodology of critical description, Dictionary Poetics maps the material surfaces of poems, tracing the networks of signifiers that undergird the more familiar representational schemes with which conventional readings have been traditionally concerned. In the process, this book demonstrates that new ways of reading can yield significant interpretive payoffs, open otherwise unavailable critical insights into the formal and semantic structures of a composition, and transform our understanding of literary texts at their most fundamental levels.

Notable Encyclopedias of the Seventeenth and Eighteenth Centuries Frank A. Kafker, 1981 General encyclopedias illuminate the culture of an era, but they tend to be neglected as a subject of scholarly research. This is especially true for the period from 1674 to 1750. Of the more than thirty encyclopedias published in those years, the contributors to this book examine nine of the most important, paying particular attention to their publishing history, editing, prose style, political and religious views, and contents as books of knowledge. Seven of them, those either in English or French, went into at least five editions. The other two encyclopedias are Johann Heinrich Zedler's German language Universal lexicon, by far the longest European encyclopedia of the period, and Gianfrancesco Pivati's Nuovo dizionario, the first learned alphabetized Italian encyclopedia to be completed. Also, at least seven of the nine works deserve notice because they served as models or sources for the Encyclopédie. The epilogue of this study compares the Encyclopédie with the nine predecessors so that the renowned work edited by Diderot and D'Alembert can be more accurately evaluated and appreciated once a previously ignored part of its background is clarified.
