Quest For The Real Samoa:

Quest for the Real Samoa Lowell D. Holmes, 1988-03-30 Mr Holmes study is the basic stuff of competent ethnography that combination of science and art in which the details of daily life are systematically observed analyzed and constructed into a cultural account He concludes that Margaret Mead was essentially correct in her depiction of coming of age in Samoa in 1925 concerned as she was to compare it with adolescence in the United States at that time New York Times Book Review Thanks to Holmes compelling review of the great debate we see all these things more clearly because he is acting as more than just an informed guide to the facts and the issues he is providing an insightful exposition on the nature of

anthropological inquiry Science Book Films **Quest For the Real Samoa** Lowell Don Holmes, 1987 Exotics at Home Micaela di Leonardo, 2000-03-16 What is the exotic after all In this study Micaela di Leonardo reveals the face of power within the mask of cultural difference Focusing on the intimate and shifting relations between popular portrayals of exotic Others and the practice of anthropology that profession assumed to be America s Guardian of the Offbeat she casts new light on gender race and the public sphere in America s past and present Chicago s 1893 Columbian World Exposition and today s college town ethnic boutiques frame di Leonardo s century long analysis *Sex and Gender Hierarchies* Barbara D.

Miller, 1993-02-18 This edited collection attempts to revive a unified anthropological approach to the study of sex and gender hierarchies Seventeen distinguished contributors from cultural anthropology physical anthropology archaeology and anthropological linguistics have produced a wealth of fascinating data on human and primate ancient and contemporary and primitive and developed societies covering topics such as mothering and child care work health intrafamily relationships and public power The interdisciplinary approach successfully contributes to the development of better theory and methodology in anthropology **Bordered Bodies, Bothered Voices** Jione Havea, 2022-04-29 Theologies are constructed in and from lived

contexts and contexts are shaped by borders While borders are barriers they are also steppingstones for crossing over and invitations for moving further This book offers theological and cultural reflections from the intersections of borders real and imagined bodies physical cultural religious ideological political and voices that endorse as well as talk back With and in the interests of natives and migrants the authors of this book embrace bordered bodies and stir bothered voices The essays are divided into four overlapping clusters that express the shared drives between the authors Noble borders some borders are not experienced as constricting because they are seen as noble Negotiating bodies bodies constantly negotiate and relocate borders Troubling voices bothered voices cannot be muted or silenced Riotous bodies embracing the wisdom in and of rejected and wounded bodies is a riot that this book invites The authors engage their subjects out of their experiences as migrants and natives This book is thus a step toward and an invitation for more work on migrant and native theologies

Historical Dictionary of Polynesia Robert D. Craig, 2002 Alphabetically arranged entries ranging in length from a paragraph to several pages describe the important people food native animals politics history and culture of Polynesia which

is made up of more than a dozen countries including American Samoa French Polynesia Hawaii New Zealand and Tonga The book includes a four page list of acronyms an extensive chronology and appendices with the names of Polynesian islands and lists of political rulers of the various states through history Author Craig emeritus history Alaska Pacific U has created several other dictionaries on Oceania Polynesian mythology and Hawaii Annotation copyrighted by Book News Inc Portland OR , Historical Dictionary of Polynesia Robert D. Craig,2011 The term Polynesia refers to a cultural and geographical area in the Pacific Ocean bound by what is commonly referred to as the Polynesian Triangle which consists of Hawai i in the north New Zealand in the southwest and Easter Island in the southeast Thousands of islands are scattered throughout this area most of which are currently included in one of the modern island states of American Samoa Cook Islands French Polynesia Hawai i New Zealand Samoa Tonga Tokelau Tuvalu and Wallis and Futuna The third edition of the Historical Dictionary of Polynesia greatly expands on the previous editions through a chronology an introductory essay an expansive bibliography and over 400 cross referenced dictionary entries on significant persons events places organizations and other aspects of Polynesian history from the earliest times to the present Appendixes of the major islands and atolls within Polynesia the rulers and administrators of the 13 major island states and basic demographic information of those states are also included **Islands and the Modernists** Jill Franks,2006-07-25 This study examines five modernists in different disciplines biology painting drama fiction and anthropology whose work on islands made them famous Charles Darwin challenged every presumption of popular science with his theory of evolution by natural selection derived from his study of the Galapagos Islands Paul Gauguin found on Tahiti inspiration enough to break through the inhibiting traditions of the Parisian art world John Millington Synge s experience on the Aran Islands off the coast of Ireland gave birth to a new style of drama that defied classic divisions between tragedy and comedy D H Lawrence s life long search for a utopian community culminated in his famous short story The Man Who Loved Islands that poignantly portrays the tension between idealism and realism solitude and human intimacy Finally Margaret Mead began her career in anthropology by studying the remote South Sea Islands and through her work acquired the sobriquet Mother of the World The text explores the extent to which islands inspired these radical thinkers to perform innovative work Each used islands differently but similar phenomena affected their choice of place and the outcome of their projects Their examples illuminate the relationship of modernism to alienation and insularity Theorizing Self in Samoa Jeannette Marie Mageo,2025-10-01 Theorizing Self in Samoa develops a new theory of the self in culture through a psychological and historical ethnography of Samoa As in many non Western cultures Samoan understandings of the self are more sociocentric accentuating the social roles that people play than egocentric emphasizing individual interior feelings and perceptions Yet in Samoa as in any culture aspects of the self that are not emphasized in cultural explanations of personhood continually reappear and must somehow be accounted for Jeannette Marie Mageo argues that all cultures attempt to encompass these stray experiences of the self within a discursive system She introduces a

way of charting human development through cultural discourses which helps reveal how emotion gender and sexuality are constructed in Samoan society and other cultures including our own The second half of the book explores the effects of cultural contact and colonialization on the innermost experience of cultural subjects With its long ethnographic record Samoa provides a unique opportunity to consider the dialectic between historical change and personal experience opening a perspective on the ways in which cultural history is forever leaving its fingerprints upon human lives *Theorizing Self in Samoa* marks out important territory for psychological anthropology and students of Oceania and will appeal also to students and scholars in cultural studies women s studies and history Jeannette Marie Mageo is Associate Professor of Anthropology Washington State University

Female Adolescence in American Scientific Thought, 1830-1930 Crista DeLuzio, 2007-09-23 In this groundbreaking study Crista DeLuzio asks how scientific experts conceptualized female adolescence in the nineteenth and early twentieth centuries Revisiting figures like G Stanley Hall and Margaret Mead and casting her net across the disciplines of biology psychology and anthropology DeLuzio examines the process by which youthful femininity in America became a contested cultural category Challenging accepted views that professionals invented adolescence during this period to understand the typical experiences of white middle class boys DeLuzio shows how early attempts to reconcile that conceptual category with femininity not only shaped the social science of young women but also forced child development experts and others to reconsider the idea of adolescence itself DeLuzio s provocative work permits a fuller understanding of how adolescence emerged as a crisis in female development and offers insight into why female adolescence remains a social and cultural preoccupation even today

In The Presence of Our Enemies Ellen McClay, 2006-07-10 In the Presence of Our Enemies has been meticulously researched containing facts from years of Congressional investigations as well as authoritative books written by historians and participants alike of the 20 Century's assault on the unique form of government fashioned through as George Washington described a miracle at Philadelphia To achieve this destruction and planned replacement with a socialist society amalgamated into a global government it is first necessary to destroy traditional morality a campaign conducted through every avenue of communication with particular focus on textbooks and schools Their legacy marches relentlessly onward Meet the sociologists the psychiatrists the educators moral degenerates who banded together from countries around the world focusing on the redistribution of American wealth and changing the culture which gave them birth They gained entry into American Schools colleges legislative halls and their descendants still promote a Fabian Socialist World Society supported by American taxes Nothing has changed since Soviet leader Nikita Khrushchev in 1957 told us what was planned I can prophesy that your grandchildren in America will live under socialism Your grandchildren will not understand how their grandparents did not understand the progressive nature of socialist society

Ready or Not Kay S. Hymowitz, 2008-06-30 Children today grow up so fast How often we hear those words uttered both in frustrated good humor and in dumbfounded astonishment Every day the American people hear about kids doing things both good and bad that were once thought to be well beyond their scope flying airplanes running companies committing mass murder Creatures of the information age today's children sometimes seem to know more than their parents They surf the Internet rather than read books they watch South Park instead of The Cosby Show they wear form fitting capri pants and tank tops instead of sundresses in short they are sophisticated beyond their years These facts lead us to wonder Is childhood becoming extinct In Ready or Not Kay S Hymowitz offers a startling new interpretation of what makes our children tick and where the moral anomie of today's children comes from She reveals how our ideas about childrearing itself have been transformed perniciously in response to the theories of various experts educators psychologists lawyers media executives who have encouraged us to view children as small adults autonomous actors who know what is best for themselves and who have no need for adult instruction or supervision Today's children and teenagers have been encouraged by their parents and teachers to function as individuals to such an extent that they make practically every decision on their own what to wear what to study and even what values they will adhere to The idea of childhood as a time of limited competence in which adults prepare the young for maturity has fallen into disrepute independence has become not the reward of time but rather something that our children have come to expect and demand at increasingly younger ages One of the great ironies of turning our children into small adults is that American society has become less successful at producing truly mature men and women When sophisticated children do grow up they often find themselves unable to accept real adult responsibilities Thus we see more people in their twenties and thirties living like children unwilling to embark on careers or to start families Until

we recognize that children are different from grownups and need to be nurtured as such Hymowitz argues our society will be hollow at its core **Treasured Islands** Lowell Don Holmes, 2001 Not only the British writer himself already famous for novels and poems but his family with him took to the sea between 1888 and 1890 to search Polynesia Micronesia and Melanesia for Robert's health and adventure Writer and film maker Holmes emeritus anthropology Wichita State U Kansas has
