Late Bloomers Rich Karlgaard, 2021-01-19 A groundbreaking exploration of how finding one's way later in life can be an advantage to long term achievement and happiness What Yogi Berra observed about a baseball game it ain't over till it's over is true about life and *Late Bloomers* is the ultimate proof of this It's a keeper Forbes We live in a society where kids and parents are obsessed with early achievement from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing job at Google or Facebook or even better creating a start up with the potential to be the next Google Facebook or Uber We see coders and entrepreneurs become millionaires or billionaires before age thirty and feel we are failing if we are not one of them Late bloomers on the other hand are undervalued in popular culture by educators and employers and even unwittingly by parents Yet the fact is a lot of us most of us do not explode out of the gates in life We have to discover our passions and talents and gifts That was true for

author Rich Karlgaard who had a mediocre academic career at Stanford which he got into by a fluke and after graduating worked as a dishwasher and night watchman before finding the inner motivation and drive that ultimately led him to start up a high tech magazine in Silicon Valley and eventually to become the publisher of Forbes magazine There is a scientific explanation for why so many of us bloom later in life The executive function of our brains doesn't mature until age twenty five and later for some In fact our brain's capabilities peak at different ages We actually experience multiple periods of blooming in our lives Moreover late bloomers enjoy hidden strengths because they take their time to discover their way in life strengths coveted by many employers and partners including curiosity insight compassion resilience and wisdom Based on years of research personal experience interviews with neuroscientists psychologists and countless people at different stages of their careers Late Bloomers reveals how and when we achieve our full potential Praise for Late Bloomers The underlying message that we should consider a kinder clock for human development is a compelling one Financial Times Late Bloomers spoke to me deeply as a parent of two millennials and as a coach to many new college grads the children of my friends and associates It's a bracing tonic for the anxiety they are swimming through with a facts based approach to help us all calm down Robin Wolaner founder of Parenting magazine

The Tyranny of the Meritocracy Lani Guinier, 2016-01-12 A fresh and bold argument for revamping our standards of merit and a clear blueprint

for creating collaborative education models that strengthen our democracy rather than privileging individual elites Standing on the foundations of America's promise of equal opportunity our universities purport to serve as engines of social mobility and practitioners of democracy But as acclaimed scholar and pioneering civil rights advocate Lani Guinier argues the merit systems that dictate the admissions practices of these institutions are functioning to select and privilege elite individuals rather than create learning communities geared to advance democratic societies Having studied and taught at schools such as Harvard University Yale Law School and the University of Pennsylvania Law School Guinier has spent years examining the experiences of ethnic minorities and of women at the nation's top institutions of higher education and here she lays bare the practices that impede the stated missions of these schools Goaded on by a contemporary culture that establishes value through ranking and sorting universities assess applicants using the vocabulary of private highly individualized merit As a result of private merit standards and ever increasing tuitions our colleges and universities increasingly are failing in their mission to provide educational opportunity and to prepare students for productive and engaged citizenship To reclaim higher education as a cornerstone of democracy Guinier argues that institutions of higher learning must focus on admitting and educating a class of students who will be critical thinkers active citizens and publicly spirited leaders Guinier presents a plan for considering democratic merit a system that measures the success of higher education not by the personal qualities of the students who enter but by the work and service performed by the graduates who leave Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's merit but on the collaborative strength of a group learning and working together supporting members and evolving into powerful collectives Examples are taken from across the country and include a wide range of approaches each innovative and effective Guinier argues for reformation not only of the very premises of admissions practices but of the shape of higher education itself

The Death of "Why?" Andrea Batista Schlesinger, 2009-07-13 Obsessed with answers we have lost sight of the power and value of questions Debates over globalization climate change health care and poverty will not be solved with simple answers but that's what Americans are being trained to expect Andrea Batista Schlesinger argues that we're besieged by cultural forces that urge us to avoid critical thinking and independent analysis The media reduces politics to a spectator sport standardized tests teach students to fill in the dots instead of opening their minds and even the Internet promotes habits that discourage looking deeper But the situation isn't hopeless Schlesinger profiles individuals and institutions renewing the practice of inquiry particularly in America's youth at a time when our society demands such activity from us all Our resilience will depend on our ability to struggle with what we don't know to live and think outside comfortable bubbles of sameness and ultimately to ask questions
