Operation of Fire Protection Systems Arthur E. Cote, 2003 Fire Science FESHE The Logoarchetype Daniel Deleanu, 2003-03-23 Daniel Deleanu's new book continues the logosophistic investigation started in *Principles of Logosophism*. The Logoarchetype is written in the same logosophistic English, an original metalanguage which makes English foreign to itself while returning to its unconscious archetypal roots. The author links C G Jung's notion of archetype with the archaic concept of Logos as it appears in Plato, Zeno, Philo of Alexandria, The Gospel of John, the philosophic work of the Romanian poets Mihai Eminescu and Lucian Blaga, and in all the major religions from the primitive to the modern ones. Deleanu's original concept of logoarchetype searches out hidden etymologies, lost meanings, and unconscious senses of being. Daniel Deleanu breaks all the boundaries of human knowledge with this extremely innovative scholarly system called logosophism, whose most important achievement is the discovery of the logoarchetype. **Logosophistic Investigations** Daniel Deleanu, 2003-05-26 Inspired by such philosophers of the Word as Plato, Zeno, the Stoic Philo of Alexandria, John the Evangelist, and Ludwig Wittgenstein, as well as by the works of C G Jung, Daniel Deleanu continues in his new book the logosophistic adventure started in *Principles of Logosophism* and *The Logoarchetype*. Logosophistic Investigations is written in the same logosophistic English, an original metalanguage with archetypal roots. The author makes English foreign to itself while returning to its unconscious sources. In this new volume, Daniel Deleanu rewrites Wittgenstein's *Tractatus Logico Philosophicus* from a logosophistic perspective at the same time concentrating on a heuristic exploration of the fascinating realm of the Logos. **Bulletin** Orange Free State (South Africa). Epilepsy and the Corpus Callosum Alexander G. Reeves,2013-11-11 InJuly 1982 the first Dartmouth workshop on the corpus callosum took place A nucleus of basic and

clinical scientists was convened to give progress reports of their work on the corpus callosum This text was subsequently compiled by the various participants from these reports modified by a stimulating cross fertilization of ideas and subsequent studies Four and one half decades have intervened since Van Wagenen first sectioned the corpus callosum for epilepsy Van Wagenen and Herren 1940 and Erickson 1940 demonstrated that the corpus callosum is the major route for generalization of experimentally induced focal cortical epilepsy During the succeeding 45 years a handful of clinicians has pursued these leads to confirm the therapeutic value of callosotomy for some types of medically intractable generalized epilepsy Parallel experimental studies with a number of epilepsy models have indicated that the corpus callosum is indeed the major route for seizure generalization that the brainstem is a secondary and more resistant pathway for seizure generalization and that most if not all epileptic seizures originate from the cerebral cortex The unexpected clinical finding that even partial focal seizure incidence is modified by callosotomy now has been demonstrated in the laboratory The various contributors to the clinical and experimental epilepsy sections of this volume have been seminal in these elucidations as will be evident from their chapters The section on the development anatomy and physiology of the corpus callosum demonstrates that these basic areas of study have not been neglected
