The Second World Wars Victor Davis Hanson, 2017-10-17 A breathtakingly magisterial account of World War II by America's preeminent military historian Wall Street Journal World War II was the most lethal conflict in human history Never before had a war been fought on so many diverse landscapes and in so many different ways from rocket attacks in London to jungle fighting in Burma to armor strikes in Libya The Second World Wars examines how combat unfolded in the air at sea and on land to show how distinct conflicts among disparate combatants coalesced into one interconnected global war Drawing on 3 000 years of military history bestselling author Victor Davis Hanson argues that despite its novel industrial barbarity neither the war's origins nor its geography were unusual Nor was its ultimate outcome surprising The Axis powers were well prepared to win limited border conflicts but once they blundered into global war they had no hope of victory An authoritative new history of astonishing breadth The Second World Wars offers a stunning reinterpretation of history's deadliest conflict **The Organization and Order of Battle of Militaries in World War II** Charles D. Innovating Victory Vincent O'Hara, Leonard R Heinz, 2022-04-15 *Innovating Victory* Naval Technology in Three Wars studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology's best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed *Innovating Victory* shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O'Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today's navies which face challenges and questions even greater than those of 1904 1914 and 1939

The Allied Defense of the Malay Barrier, 1941-1942 Tom Womack, 2015-12-01 Though few realize it the Netherlands East Indies were the object of Japan's attack on Pearl Harbor in December 1941 Likewise their invasions of Guam Wake Island

and the Philippines were mainly diversionary operations to safeguard their main assault on Dutch and British colonies Since the end of World War I Japan had coveted the vast East Indies oil reserves and the colony had feared invasion since Germany overran Holland in May 1940 Isolated politically the weakly defended archipelago was a tempting prize The East Indies government initially maintained a strict policy of neutrality while desperately working to build up its military strength As Japanese actions pushed the region toward war the Dutch reluctantly embraced closer ties with America and Britain For a brief period the East Indies were key players in Pacific War strategy This book details for the first time in English the Dutch prewar strategy their efforts to counter Japanese espionage and their sizable though largely forgotten military contribution in the early months of the Pacific War
