*Wings That Stay on* Edward V. Coggins, 2000-05-01 From the Preface This book was required As a former professor of military history at the American Military University AMU and a retired USAF Colonel I wanted to teach a course on the effects of fighter aviation in war In addition I wanted to create a course that was a hands on approach to fighter aviation history Having flown USAF fighters for more than 20 years I felt I had a good working knowledge of fighter aviation but when I researched the subject I found I would have to ask my students to read scores of books to provide the background

they would need There was no single source book that covered everything I wanted to cover I determined to write that book I wanted to write a straightforward book in plain language that would not bore fighter pilots and at the same time that would be simple enough to be attractive to laymen as well as air power historians That is what I have done I have covered some detailed thoughts about fighter flying in what Southern Americans might call biscuits and gravy language The overriding premise of the text is that the fighter has been the key element in the air power equation and continues in that role today although this role may be changing with the advent of good reliable beyond visual range air to air missies This view has not been universally held over the years however it is a view that has been held by fighter pilots since the advent of the fighter More and more historians are beginning to support this view Table of Contents World War I Fighter Development Between Wars The Air Wars Between World Wars Fighter Development In World War II The Korean War The Fighter In The Vietnam War The Arab Israeli Wars The India Pakistani Conflicts The Air War In The Falklands Soviet Experience In Afghanistan The Persian Gulf War The Future Summary And Conclusions Appendices Definitions *Florida School Bulletin* ,1924 *Year Book* National Council of Teachers of Mathematics,1926 **A General Survey of Progress in the Last Twenty-five Years** National Council of Teachers of Mathematics,1926 **Aero Digest** ,1926 **U.S. Air Services** ,1926
