Preventing Crime and Violence Brent Teasdale, Mindy S.

Bradley, 2016-11-29 This insightful volume integrates criminological theories, prevention science, and empirical findings to create an up-to-date survey of crime prevention research and strategies. Its interdisciplinary perspective expands on our knowledge of risk factors to isolate the malleable mechanisms that produce criminal outcomes and can therefore be targeted for intervention. In addition, the text identifies developmental lifespan and social areas for effective intervention. Reviews of family, community, and criminal justice-based crime prevention approaches not only detail a wide gamut of successful techniques but also provide evidence for why they succeed. And as an extra research dimension, the book's chapters on methodological issues and challenges uncover rich possibilities for the next generation of crime prevention studies. Included in the coverage: Integrating criminology and prevention research; Social disorganization theory, its history, and relevance to crime prevention; Research designs in crime and violence prevention; Macro and micro approaches to crime prevention and intervention programs; Implications of life course approaches for prevention science; Promising avenues for prevention, including confronting sexual victimization on college campuses; Spotlights on current progress and continuing evolution of the field. Preventing Crime and Violence will enhance the work of researchers, practitioners, academicians, and policymakers in public health, prevention science, criminology, and criminal justice, as well as students interested in criminology and criminal justice. Sexual Assault and the Justice Gap: A Question of Attitude Jennifer Temkin, Barbara Krahé, 2008-04-15 This book is

set against the background of the justice gap in sexual assault cases: the dramatic gap between the number of offences recorded by the police and the number of convictions. It seeks to examine the attitudinal problems which bedevil this area of law and possible strategies for addressing them. Written by a professor of law and a professor of psychology, it reviews evidence from socio-legal and social cognition research and presents new data drawn both from interviews with judges and barristers and from studies with prospective lawyers and members of the public. In the final part, it considers different ways in which rape trials could be improved and suggests steps that could be taken to change public attitudes about sexual assault.

Research Awards Index, 1978 Looting and Rape in Wartime Tuba Inal, 2013-03-15 Women were historically treated in wartime as property. Yet in the Hague Conventions of 1899 and 1907, prohibitions against pillaging property did not extend to the female body. There is a gap of nearly a hundred years between those early prohibitions of pillage and the prohibition of rape finally enacted in the Rome Statute of 1998. In Looting and Rape in Wartime, Tuba Inal addresses the development of these two separate prohibition regimes, exploring why states make and agree to laws that determine the way war is conducted and what role gender plays in this process. Inal argues that three conditions are necessary for the emergence of a global prohibition regime: first, a state must believe that it is necessary to comply with the prohibition and that to do

otherwise would be costly second the idea that a particular practice is undesirable must become the norm finally a prohibition regime emerges with state and nonstate actors supporting it all along the way These conditions are met by the prohibition against pillage which developed from a confluence of material circumstances and an ideological context the nineteenth century fostered ideas about the sanctity of private property which made the act of looting seem more abhorrent Meanwhile the existence of conscripted and regulated armies meant that militaries could take measures to prevent it In that period however rape was still considered a crime of passion or a symptom of behavioral disorder in other words a distortion of male sexuality and outside of state control and it would take many decades to erode the grip of those ideas Only toward the end of the twentieth century did transformations in gender ideology and the increased participation of women in politics bring about broad cultural shifts in the way we perceive sexual violence women and women s roles in policy and lawmaking In examining the historical and ideological context of how these two regimes evolved Looting and Rape in Wartime provides vital perspective on the forces that block or bring about change in international relations **Sexual Violence Bill**

Conway,Pamela Cox,Patricia Cook-Craig,Sandra Ortega,Theresa Armstead,2013-10-31 Over the past 25 years developing coordinated responses to intimate partner violence and sexual violence has improved both perpetrator accountability and victim safety and self determination However preventing intimate partner violence and sexual violence from occurring is beyond the ability of any one type of organization Preventing this violence requires a network of individuals groups and

Raczynski, Ralph J. DiClemente, 2013-11-11 The idea for this volume developed when we were co teaching our introductory master's level course in the Department of Health Behavior at the UAB School of Public Health a core course for all masters of public health students in the school regardless of the department in which they enrolled or the focus of their studies Hence in the course we sought to provide both students in our department as well as those who might not ever again take a health behavior course with an overview that would both truly represent the field and substantially provide educational research and public health practice benefits This was and continues to be a challenge with the diversity of students specializing in fields that include not only health behavior but also bio statistics environmental health sciences epidemiology health care organization and policy international health and maternal and child health The course that we taught attempted to provide the students with an overview of some of the important health promotion and disease prevention theories methods and policy issues while reviewing applications of these theories and methods to promoting health and preventing disease through a variety of channels for a variety of disease outcomes and among a variety of populations Since no one text provided this variety of readings we depended on readings and guest lectures
