International Library of Masterpieces, Literature, Art and Rare Manuscripts Harry Thurston Peck, 1901 **The Disaster Profiteers** John C. Mutter, 2015-08-11 Natural disasters don't matter for the reasons we think they do They generally don't kill a huge number of people Most years more people kill themselves than are killed by Nature's tantrums And using standard measures like Gross Domestic Product GDP it is difficult to show that disasters significantly interrupt the economy It's what happens after the disasters that really matters when the media has lost interest and the last volunteer has handed out a final blanket and people are left to repair their lives What happens is a stark expression of how unjustly unequal our world has become The elite make out well whether they belong to an open market capitalist democracy or a closed authoritarian socialist state In Myanmar a country ruled by a xenophobic military junta the generals and their cronies declared areas where rice farms were destroyed by Cyclone Nargis as blighted and simply took the land In New Orleans the city was re-shaped and gentrified post Katrina making it almost impossible for many of its poorest mostly black citizens to return In *The Disaster Profiteers* John Mutter argues that when no one is looking disasters become a means by which the elite prosper at the expense of the poor As the specter of increasingly frequent and destructive natural disasters looms in our future this book will ignite an essential conversation about what we can do now to create a safer more just world for us all

The Rise of the Modernist Bookshop Huw Osborne,2016-03-09 The trade in books has always been and remains an ambiguous commercial activity associated as it is with literature and the exchange of ideas This collection is concerned with the cultural and economic roles of independent bookstores and it considers how eight shops founded during the modernist era provided distinctive spaces of literary production that exceeded and yet never escaped their commercial functions As the contributors show these booksellers were essential institutional players in literary networks When the eight shops examined first opened their doors their relevance to literary and commercial life was taken for granted In our current context of box stores online shopping and ebooks we no longer encounter the book as we did as recently as twenty years ago By contributing to our understanding of bookshops as unique social spaces on the thresholds of commerce and culture this volume helps to lay the groundwork for comprehending how our relationship to books and literature has been and will be affected by the physical changes to the reading experience taking place in the twenty first century *The People's Cyclopedia of Universal Knowledge* ,1900 **Rare Diseases in Pediatrics** Mr. Rohit Manglik,2024-07-30 This book provides comprehensive coverage of rare pediatric diseases including etiology diagnosis and management strategies helping pediatricians navigate challenging cases effectively The Ecological Crisis and the Logic of Capital Xueming Chen,2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective The Ecological Crisis and the Logic of Capital explores the logic of capitalism as a fundamental cause of today s environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes

toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism
