Rational Lives Norms And Values In Politics And Society:

Rational Lives Dennis Chong, 2011-03-15 Those who study value conflicts have resisted rational choice approaches in the social sciences contending that political conflict over cultural values is best explained by group loyalties symbolic motives and other nonrational factors However Chong shows that a single model can explain how people make decisions across both social and economic realms He argues that our preferences result from a combination of psychological dispositions which are shaped by social influences and developed over the life span Chong's book yields insights about the circumstances under which preferences beliefs values norms and group identifications are formed It offers a provocative explanation of how ingrained social norms and values can change over time despite the forces maintaining the status quo Going beyond the tired polemics on both sides Chong constructs a new interpretation of human behavior in which culture and individual rationality both matter The synthesis is a more comprehensive and powerful explanatory framework than either side could have produced and Chong's creativity should influence subsequent interpretations of our social life in fundamental ways

Christopher H Achen University of Michigan Paradoxes Of China's Prosperity: Political Dilemmas And Global Implications

Guoguang Wu, 2015-01-15 The world seems divided to either applaud or fear the rise of China but this book probes deeper by investigating three aspects of the phenomenon in detail 1 the institutional dilemmas of the prosperity as it integrates Asian authoritarianism with globalizing capitalism to create economic accomplishments 2 the political struggles alongside the prosperity as Chinese citizens begin to demand equality rights and justice that might be viewed to disturb the continuity of stability and development and 3 the global implications entailed by the prosperity not only in power politics war and peace or competitions among nations but especially on global public goods termed human security Articles included here combine political economic analyses lens with historical depth and global concerns to add a perspective that highlights the paradoxes of prosperity surrounding the ongoing debate on the rise of China and its global ramifications Readers will find an analysis that goes beyond the dichotomy viewing the rise of China either in positive or negative perspectives Investigations on the internal dilemmas and the global implications of the rise of China are well situated in the historical context of China's own search for modernization since the late 19th century This is one of the few books in which China's rise is examined from a global perspective rather than from a national perspective of China the United States or any other specific nation a global perspective that addresses the challenges facing all human societies with the rise of China *Multi-Level Governance and European Integration*

Liesbet Hooghe, Gary Marks, 2002-05-30 European politics has been reshaped in recent decades by a dual process of centralization and decentralization At the same time that authority in many policy areas has shifted to the supranational level of the European Union so national governments have given subnational regions within countries more say over the lives of their citizens At the forefront of scholars who characterize this dual process as Omulti level governance OLiesbet Hooghe and Gary Marks argue that its emergence in the second half of the twentieth century is a watershed in the

political development of Europe Hooghe and Marks explain why multi level governance has taken place and how it shapes conflict in national and European political arenas Drawing on a rich body of original research the book is at the same time written in a clear and accessible style for undergraduates and non experts

Nuclear Proliferation and the Psychology of Political Leadership Kelly O'Reilly, 2014-09-15 This book offers a novel approach to understanding the puzzle of nuclear proliferation by examining how leaders beliefs and perceptions about the international system influence states decisions to acquire nuclear weapons Today there is a persisting dilemma over the spread of nuclear weapons for both practitioners and scholars of international affairs Uncertainty remains whether determined proliferators can be stopped as shown by the cases of North Korea and Iran These instances of proliferation raise questions about regional stability the use of pre emptive military action and the potential for reactive proliferation by neighbouring countries Despite the serious implications surrounding the spread of these weapons proliferation scholarship has thus far failed to solve what has been described as the proliferation puzzle why do some countries choose nuclear weapons while others do not The author argues that understanding basic psychological motivations such as the role of power and perceptions of self and others forms a strategic context which provides answers about a leader s willingness to proliferate Proliferation willingness is a critical yet frequently overlooked part of the proliferation equation Ultimately it is the combination of willingness and proliferation opportunity i e technical and scientific capabilities that determines whether a country goes nuclear By examining several historical instances of proliferation decision making in South Africa India Libya and Australia the book s findings highlight the fundamental role of leaders beliefs in shaping proliferation outcomes This book will be of much interest to students of nuclear proliferation political psychology security studies and IR in general

Embedding Global Markets John Gerard Ruggie, 2008 John Ruggie introduced the concept of embedded liberalism in a 1982 article that has become one of the most frequently cited sources in the study of international political economy Here leading scholars combine to offer a better understanding of what embedded liberalism means why it matters and how to reconstitute it The contributors contextualize the current challenge historically and theoretically so that students scholars and policy makers alike are reminded of what is at stake and what is required

Democracy, Intermediation, and Voting on Four Continents Richard Gunther, Jose Ramon Montero, Hans-Jürgen Puhle, 2007-02-08 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents It is based on national election surveys held in old and new democracies in Europe Germany Britain Spain Greece Italy Portugal Bulgaria North and South America the United States Chile and Uruguay and Asia Hong Kong between 1990 and 2004 It is methodologically innovative notwithstanding the fact that its core concern with political intermediation i e the flow of political information from parties and candidates to voters through the mass communications media membership in secondary associations and direct face to face contacts within interpersonal networks was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s In addition to

reviving that long neglected analytical framework this book breaks new ground by systematically exploring the impact of socio political values on electoral behavior It also analyzes the role of political intermediation in forming basic attitudes towards democracy which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior So too are socio political values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project

Human Rights and Community-led Development Ben Cislighi, 2018-03-07 Provides cross disciplinary perspectives on the study of animals in humanities

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe s government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe s findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

Enemies of the American Way David Bell Mislán, 2012-05-24 Why do presidents when facing the same circumstances focus on different threats to national security Enemies of the American Way attempts to answer this question by investigating the role of identity in presidential decision making The book explains why presidents disagree on what constitute a threat to the US security via the study of three US presidencies in the 19th century Cleveland Harrison and McKinley These case studies help draw a theory of threat identification to understand how and why specific actions are taken including the decision to wage war Using a constructivist approach the book develops a rule based identity theory to posit that American identity defines potential national security threats i e how a policymaker defines Americans also defines the threats to Americans Enemies of the American Way offers a new means of understanding a key period when America rose to prominence in international relations while proposing a template that can be used to explain American foreign policy today It will appeal to students of international relations and foreign policy

Social Construction of International Politics Ted Hopf, 2002 In this deeply researched book Ted Hopf challenges contemporary theorizing about international relations He advances what he believes is a commonsensical notion a state's domestic identity has an enormous effect on its international policies Hopf argues that foreign policy elites are inextricably bound to their own societies in order to understand other states they must first understand themselves To comprehend Russian and Soviet foreign policy it is just as important to read what is being consumed on the Moscow subway as it is to conduct research in the Foreign Ministry archives the author says Hopf recreates the major currents in Russian Soviet identity reconstructing the identity topographies of two profoundly important years 1955 and 1999 To provide insights about how Russians made sense of themselves in the post Stalinist and late Yeltsin periods he not only uses daily newspapers and official discourse but also delves into works intended for mass consumption popular novels film reviews ethnographic journals high school textbooks and memoirs He explains how the different identities expressed in these varied materials shaped the worldviews of Soviet and Russian decisionmakers Hopf finds that continuous renegotiations and clashes among competing domestic visions of national identity had a profound effect on Soviet and Russian foreign policy Broadly speaking Hopf shows that all international politics begins at home
