Rationality and Belief Ralph Wedgwood, 2023 This book gives a general theory of rational belief Although it can be read by itself is a sequel to the author's previous book *The Value of Rationality* Oxford 2017 It takes the general conception of rationality that was defended in that earlier book and combines it with an account of the varieties of belief and of what it is for these beliefs to count as correct to develop an account of what it is for beliefs to count as rational According to this account rationality comes in degrees the degree to which one's beliefs counts as rational is determined by their distance from a corresponding probability function where this distance is measured by those beliefs expected degree of incorrectness according to the probability function the account also involves an explanation of what determines exactly which probability function plays this role in each case and of why this probability function should play this role In developing and defending this account new light is shed on several central epistemological issues These issues include the distinction between propositional and doxastic justification the debates between internalism and externalism and between foundationalism and coherentism the significance or lack of it of the notion of evidence the relationship between credences full belief inference and suspension of judgment the nature of the kind of possibility that is presupposed by the relevant sort of probability and whether rationality is diachronic so that the beliefs that it is rational for us to have now depend in part on the beliefs that we held in the past Finally some suggestions are made about how this theory bears on a range of further topics including the defeasibility of inference scepticism and the analysis of knowledge

Rational Belief Robert Audi, 2015 This book is a wide ranging treatment of central topics in

epistemology It provides conceptions of belief and knowledge offers a theory of how they are grounded in our experience and in the social context of testimony and connects them with the will and with action moral responsibility and intellectual virtue

The Aim of Belief Timothy Hoo Wai Chan, 2013 The Aim of Belief is the first book devoted to the question what is belief Eleven newly commissioned essays by leading authors reflect the state of the art and further advance the current debate The book will be key reading for researchers working on philosophy of mind and action epistemology and meta ethics

Rational Belief Albert Myrton Frye, Albert William Levi, 1949 **Religious Faith and Intellectual Virtue** Laura Frances Callahan, Timothy O'Connor, 2014-06 Is religious faith consistent with being an intellectually virtuous thinker In this volume 14 original essays written by a diverse and distinguished group of thinkers offer new approaches to the central issues and controversies surrounding the place of intellectual virtue in religious faith **Rationality and Coordination** Cristina

Bicchieri, 1997-03-28 This major new book will be of particular interest not only to philosophers but to decision theorists political scientists economists and researchers in artificial intelligence The Routledge Companion to Epistemology Sven Bernecker, Duncan Pritchard, 2011-01-19 Epistemology the philosophy of knowledge is at the core of many of the central debates and issues in philosophy interrogating the notions of truth objectivity trust belief and perception The Routledge Companion to Epistemology provides a comprehensive and the up to date survey of epistemology charting its history providing a thorough account of its key thinkers and movements and addressing enduring questions and contemporary research in the field Organized thematically the Companion is divided into ten sections Foundational Issues The Analysis of Knowledge The Structure of Knowledge Kinds of Knowledge Skepticism Responses to Skepticism Knowledge and Knowledge Attributions Formal Epistemology The History of Epistemology and Metaepistemological Issues Seventy eight chapters each between 5000 and 7000 words and written by the world s leading epistemologists provide students with an outstanding and accessible guide to the field Designed to fit the most comprehensive syllabus in the discipline this text will be an indispensable resource for anyone interested in this central area of philosophy The Routledge Companion to Epistemology is essential reading for students of philosophy **Evolutionary Debunking Arguments** Diego E. Machuca, 2022-09-09

Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for

reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs. The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics, metaphysics and epistemology. The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry. The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains.

Rationality and Relativism I.C. Jarvie, 2015-07-03. Anthropology revolves round answers to problems about the nature, development and unity of mankind, problems that are both philosophical and scientific. In this book, first published in 1984, Professor Jarvie applies Popper's philosophy of science to understanding the history and theory of anthropology. Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism, that is, that truth varies with the cultural framework. He shows how philosophers as various as Peter Winch, W.V.O. Quine, W.T. Jones, Nelson Goodman and Richard Rorty were influenced by this doctrine. Yet these philosophers also accept the value of rational argument. Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument. Forced by the contradiction to choose between rationality and relativism, he argues strongly that logical, scientific and moral considerations favour rationality and urge repudiation of relativism. The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers.

Behavioural Economics and Business Ethics Philip Alexander Rajko, 2013-03-01. Economics and moral philosophy have in recent years been considered to be distinct and separate fields. However, behavioural economics has started to reconcile various aspects of morality and economics, which has offered new conceptual opportunities to advance economics, ethics and business ethics. This book aims to advance economic ethics and business ethics by combining normative principles and empirical evidence grounded on the key motivational forces in economic decision making. It has three core objectives: to assess order ethics as a theory of both economic ethics and business ethics; using behavioural economics methods and evidence to identify cardinal virtues for modern business ethics; to set up valuable guidelines for the implementation of economic ethics and business ethics.

The Order of Public Reason Gerald Gaus, 2010-12-13. In this innovative and important work, Gerald Gaus advances a revised and more realistic account of public reason liberalism, showing how, in the midst of fundamental disagreement about values and moral beliefs, we can achieve a moral and political order that treats all as free and equal moral persons. The first part of this work analyzes social morality as a system of authoritative moral rules. Drawing on an earlier generation of moral philosophers such as Kurt Baier and Peter Strawson, as well as current work in the social sciences, Gaus argues that our social morality is an evolved social fact which is the necessary foundation of a mutually beneficial social order. The second part considers how this system of social moral authority can be justified to all moral persons. Drawing on the tools of game theory, social choice theory, experimental

psychology and evolutionary theory Gaus shows how a free society can secure a moral equilibrium that is endorsed by all and how a just state respects and develops such an equilibrium

Uncertainty, Rationality, and Agency Wiebe van der Hoek, 2006-08-18 This book collects all the papers that appeared in 2005 in Knowledge Rationality and Action KRA a journal published as a special section of Synthese which addresses contemporary issues in epistemic logic belief revision game and decision theory rational agency planning and theories of action As such the special section appeals to researchers from Computer Science Game Theory Artificial Intelligence Philosophy Knowledge Representation Logic and Agents addressing issues in artificial systems that have to gather information reason about it and then make a sensible decision about what to do next It will be clear already from the contents pages that this book indeed reflects the core of KRA the papers in this volume address degrees of belief or certainty and rational agency The latter has several manifestations often constraints on the agent's belief behaviour or decision making Moreover this book shows that KRA indeed represents a loop in the behaviour of the agent after having made a decision the life of the agent does not end rather it will do some sensing or collect otherwise the outcome of its decision to update its beliefs or knowledge accordingly and make up its mind about the next decision task

The Logic of the History of Ideas Mark Bevir, 2002-06-20 Human cultures generate meanings and the history of ideas broadly conceived is the study of these meanings An adequate theory of culture must therefore rest on a suitable philosophical enquiry into the nature of the history of ideas Mark Bevir's book explores the forms of reasoning appropriate to the history of ideas enhancing our understanding by grappling with central questions such as What is a meaning What constitutes objective knowledge of the past What are beliefs and traditions How can we explain why people held the beliefs they did The book ranges widely over issues and theorists associated with post analytic philosophy post modernism hermeneutics literary theory political thought and social theory

The ABCs of REBT Revisited Windy

Dryden, 2012-11-09 The cornerstone of Rational Emotive Behavior Therapy is its ABC framework which helps therapists make sense of clients problems As it turns out however this model is often misunderstood by both clients and professionals Research investigation on this misunderstanding forms the basis of this book It addresses the doubts reservations and objections clients had to the ABC framework in a research study of an REBT based program in a psychiatric hospital Additionally errors and confusions on the part of those writing about the therapy is reviewed Further study was made on the accuracy of REBT therapists themselves in teaching this therapy to students Also included is an analysis of how Albert Ellis himself has explicated the ABC's This book is the first to systematically study how different groups conceptualise the ABCs of REBT and the errors that are commonly made in interpreting and putting them into practice It will be of value to students and practitioners of REBT and those teaching REBT in academic settings
