

- **Gamma rays** are extremely high energy radiation that can penetrate human tissues. Gamma rays are used to sterilize medical equipment. Doctors use them to kill a maximum number of cancerous cells and a minimum number of healthy cells.

Technicians who work with X-rays and gamma rays must wear shields, to protect themselves from radiation. Gamma rays are produced within our galaxy and in other galaxies by phenomena such as neutron stars and black holes

**Phenomena with X-Rays** Bernhard Adams, 2012-12-06 Nonlinear Optics Quantum Optics and Ultrafast Phenomena with X Rays is an introduction to cutting edge science that is beginning to emerge on state of the art synchrotron radiation facilities and will come to flourish with the x ray free electron lasers currently being planned It is intended for the use by scientists at synchrotron radiation facilities working with the combination of x rays and lasers and those preparing for the science at x ray free electron lasers In the past decade synchrotron radiation sources have experienced a tremendous increase in their brilliance and other figures of merit This progress driven strongly by the scientific applications is still going on and may actually be accelerating with the advent of x ray free electron lasers As a result a confluence of x ray and laser physics is taking place due to the increasing importance of laser concepts such as coherence and nonlinear optics to the x ray community and the importance of x ray optics to the laser generation of ultrashort pulses of x rays *Charged and Neutral Particles Channeling Phenomena* Sultan B. Dabagov, 2010 The book Channeling 2008 Charged and Neutral Particles Channeling Phenomena is formed by the same title conference contributions This volume includes papers by leading researchers from different world centers Their recent results on the coherent phenomena of charged and neutral particles propagating through the structures of various sizes and periodicities are included here along with historical reviews by pioneers of coherent Bremsstrahlung and channeling radiation as well as crystal channeling collimation **Microphysics of Atmospheric Phenomena** Boris M. Smirnov, 2016-08-29 This book investigates elementary processes in the Earth s atmosphere involving photons electrons ions radicals and aerosols It is based on global atmospheric models such as the standard atmospheric model with averaged atmospheric parameters across the globe and over time the Earth s energetic balance and the global electric circuit that allows to analyze fundamental atmospheric properties to be analyzed Rate constants of elementary processes in the Earth s atmosphere together with measured atmospheric parameters and existing concepts of atmospheric phenomena are used in the analysis of global and local atmospheric processes Atmospheric photoprocesses result from the interaction of solar radiation with the atmosphere and processes involving ions oxygen atoms excited atomic particles and ozone molecules Atmospheric electricity as a secondary phenomenon to atmospheric water circulation results in a chain of processes that begins with collisions of water aerosols in different aggregate states Cosmic rays are of importance for atmospheric electricity as they create positive and negative ions in the air Air breakdown in an electric field of clouds in the form of lightning may develop under the influence of cosmic ray created seed electrons which are necessary for electron multiplication in ionization wave streamers The upper atmosphere ionosphere is formed under solar radiation in a vacuum ultraviolet spectrum and absorption of this radiation leads to air photoionization The greenhouse effect is determined by atmospheric water whereas transitions between a water vapor and aerosols may lead to a change in

atmospheric optical depth Carbon dioxide contributes in small portions to the atmospheric greenhouse effect Cosmic rays are of importance for atmospheric discharge the origin of lightning and cloud formation in the first stage of aerosol growth This book provides a qualitative description of atmospheric properties and phenomena based on elementary processes and simple models
