Insects

Story by Andrew Frinkle

Insects are a kind of animal. Insects are also known as bugs. Insects can be found all over the world. Crickets, ants, grasshoppers, butterflies, ladybugs, and bees are some common insects.

Insects are invertebrates, so they do not have backbones. They have exoskeletons. This means they have their bones on the outside, like a shell. That makes them similar to crustaceans. Some insects, like butterflies, can change as they grow.

Insects always have six legs. If something has eight legs, like a spider, it is not an insect. Insects usually have three body segments. The head is where the eyes, mouth, and brains are. The thorax is where the legs and wings connect. The abdomen is where the guts and organs are.

Reading About Insects:

What Bug Am I? Skye Wade, 2020-10-15 If your kids are interested in bugs they'll definitely buzz with laughs and literacy over this engaging informative and science STEM book. This funny bug story offers interesting and kid-friendly facts about insects, diverse features, and their unique ways of life. The little spider doesn't initially know who he is. Yet with the ladybug's help, he meets different backyard bugs to understand who he looks like. By merging nonfiction and fiction, the author cleverly soars and scores in this nature book. **DO INSECTS SCARE YOUR CHILDREN?** Fizzle the fear factor associated with bugs with this amazing book. All characters are cute and relatable without evoking fear or disgust. They're specifically endowed with human traits and emotions, and at the same time, the structure of their bodies is realistic. The book teaches friendship, benevolence, compassion, empathy, self-care, and cooperation. It positively shows insects, indicates their role in nature, and benefits to humans and demonstrates how to purge young readers' fears associated with them. Besides, each character within the book has its own info spread with large photos and interesting facts that even adults don't know. At the same time, the book isn't too scientific and isn't overloaded with information. Fictional and educational spreads follow each other cohesively and creatively. They're separated so it's easy to skip educational ones for younger kids. Your kids will have fun. They'll also learn more about bugs than their peers while also mastering key literacy skills. This book provides a hive of activity as exhibited below. Large book format, appealing illustrations, and alluring photographs. The colorful illustrations take up the entire spread and contain a large number of details that are interesting to study. The book is designed for a wide range of ages and will last a long time. Babies can examine the illustrations, older children can read for themselves and study the facts. Special book formatting: paperback only so that the child can read easily, paragraphs instead of solid blocks of text, double spaces between sentences, semantic hyphenations. Characters are personified to also teach critical social skills and socioemotional development. Perfect gift for any holiday, birthday, classroom gift for teachers, home library, etc. Pick up your copy today and make your young bug enthusiast happy, informed, and empowered. Get busy as a bee and buzz with reading.

The Insect World, 1902 *First Facts: Bugs* DK, 2011-07-18 Children reach an age when suddenly they want to simply learn. Everywhere they look, it's how, why, where, what. Studies suggest that between the ages of 4 and 7, children's brains are the most like sponges, absorbing information at an extraordinary rate. Children at this age have grown out of flaps and other novelties and are perhaps only just learning to read; they need a range of books covering a lot of topics that suit this pre-reading and early reading level. At preschool, the emphasis is on play; going on to learning how to read and write, so home is where their interests can be really indulged. This is an age where learning is pure fun, so the titles of the books reflect this. The *First Facts* books are small springboards that eventually lead onto a bigger picture. **The Insects** P. J.
