*The Nitty-Gritty in the Life of a University* William J. Adams, 2007 An esteemed professor and one time chairman of the mathematics department at New York's Pace University Adams interested in all facets of university administration has produced an almost Jeffersonian volume of correspondence from his tenure His views on textbook selection collective bargaining and the proper role of the university have all flowed from his notebook and no problem was too minute to evade his scope The frivolity of some of these papers is balanced by Adams's opinions on weightier issues including sexual harassment and compensation in higher education His approach and forward manner on these situations despite how genuine sometimes engendered resentment from his fellow faculty But for those interested in the particulars of an academic career this book offers a glimpse of what life may really be like inside the ivory tower Kirkus Discoveries

*Neuroscience in Education* Sergio Della Sala, Mike Anderson, 2012-04-05 In the past ten years there has been growing interest in applying our knowledge of the functioning of the human brain to the field of education including reading learning language and mathematics This has resulted in the development of a number of new practices in education some good some bad and some just crazy The good is nearly always sound cognitive research that has clear implications for educational practice The bad is the use of neuroscience jargon to lure the unwary and to give an apparent scientific aura to flawed educational programs with no evidence base and which no reputable neuroscientist would endorse The ugly is simplistic interpretation and misapplication of cognitive theories leading to errors in their application More and better could be done if neuroscientists and educationalists acknowledge the limits of their disciplines and start listening to each other Neuroscience in Education brings together an international group of leading psychologists neuroscientists educationalists and geneticists to critically review some of these new developments examining the science behind these practices the validity of the theories on which they are based and whether they work It will be fascinating reading for anyone involved in education including teachers psychologists neuroscientists and policy makers as well as interested parents
