# Reading Strategies: Making Connections

## Making Connections

Good readers relate what they read to other experiences and knowledge.

There are three types of connections:

- Text-to-Self -- connections between the text and the reader's life and experiences
- Text-to-Text -- connections between the text and other books, movies, songs, articles
- Text-to-World -- connections between the text and events in the real world and history

**Directions:** Record the connection you made while reading. Be sure to include the page or paragraph number.

**Handbook of Reading Research, Volume IV** Michael L. Kamil,P. David Pearson,Elizabeth Birr Moje,Peter Afflerbach,2011-03-17 The Handbook of Reading Research is the research Handbook for the field Each volume has come to define the field for the period of time it covers Volume IV follows in this tradition The editors extensively reviewed the reading research literature since the publication of Volume III in 2000 as portrayed in a wide array of research and practitioner based journals and books to identify the themes and topics covered As in previous volumes the focus is on reading research rather than a range of literate practices When taken as a set the four volumes provide a definitive history of reading research Volume IV brings the field authoritatively and comprehensively up to date

*Associations between Reading and Mathematics: Genetic, Brain Imaging, Cognitive and Educational Perspectives* Sarit Ashkenazi,Orly Rubinsten,Bert De Smedt,2017-10-05 Converging evidence demonstrates a strong link between reading and mathematics multiple cognitive processes are shared between reading and mathematics including the representation and retrieval of symbolic information attention working memory and cognitive control Additionally multiple brain networks are involved in both math and reading and last common genetic factors might influence both reading and math Hence it comes as no surprise that there are meaningful associations between aspects of math and reading abilities Moreover comorbidity rates between math learning disabilities MD and reading disabilities RD are high up to 66% and prevalence rate of the comorbid condition is reported to be more common than the prevalence rate of isolated

math learning disabilities Accordingly the goal of the research topic is to explore the underline mechanisms of this overlap between reading and math The research topic aims to include the following topics Genetics it has been found that both RD and MD are based on genetic factors and run in families Moreover math problem solving shares significant genetic overlap with general cognitive ability and reading decoding whereas math fluency shares significant genetic overlap with reading fluency and general cognitive ability Hence this topic will explore the shared and unique genetic risk factors to RD and MD In addition to shared and unique genetic influence on reading and math Neural perspective converging evidence from both structural and multiple functional imaging studies involving a wide range of numerical tasks points to the intraparietal sulcus IPS as a core region that involve in quantity manipulation However several additional brain areas such as frontoparietal and temporoparietal areas were found to be involved in numerical tasks Individuals with MD show deficits in a distributed set of brain regions that include the IPS fusiform gyrus in posterior brain regions and pre frontal cortex regions Similarly converging evidence indicate that the left hemisphere regions centered in the fusiform gyrus temporoparietal cortex and pre frontal cortex regions are strongly involve in typical reading and present lower activity connectivity or abnormal structure in RD Thus there is a meaningful neural overlap between reading and math Hence the authors can submit empirical studies on the role of several of brain regions that are involved in math and reading commonality and diversity both in the typical and a typical development Cognitive factors that play role in mathematics and reading and comorbidity between RD and MD There is a long lasting debate whether MD and RD originate from unique cognitive mechanisms or not Multiple cognitive processes are shared between reading and mathematics Therefore impairments in any one of domain general skills could conceivably play an important role in both pure and comorbid conditions Moreover it has been suggested that phonological processing has a significant role in some aspects of numerical processing such as retrieval of arithmetical facts Education it will be interesting to look at the effect of interventions that aim to improve reading such as phonological awareness and there transfer effect on improving mathematical processing Alternatively it will be good to test whether math interventions will improve reading *Resources in Education* ,1997

### **The Cognitive Development of Reading and Reading**

**Comprehension** Carol McDonald Connor,2016-02-26 Learning to read may be the most complex cognitive operation that children are expected to master and the latest research in cognitive development has offered important insights into how children succeed or fail at this task The Cognitive Development of Reading and Reading Comprehension is a multidisciplinary evidence based resource for teachers and researchers that examines reading comprehension from a cognitive development perspective including the principal theories and methods used in the discipline The book combines research into basic cognitive processes genetics perception memory executive functioning and language with an investigation of the effects that context and environment have on literacy outcomes making clear how factors such as health family life community policy and ecology can influence children s cognitive development

### **High Attention Reading** Elizabeth Hale,2022 High Attention

Reading offers a new way to get students of all reading levels to independently read informational texts with more effort and stamina. Hale argues that increasing the number of informational texts children read is important but not enough to achieve this goal. In order to prepare students for the reading demands of high school, it is essential that we provide strategic scaffolding for the habits of mind required to read this genre at a high level and the motivation to do so. The author introduces elementary and middle school teachers to a format called HART (High Attention Reading through Talking) that uses purposeful intermittent student talk to heighten engagement and accountability during independent reading. The book includes easy-to-implement lessons to get started with HART as well as discussions about the relationships among motivation, engagement, and content area reading. Chapters describe how HART scaffolds and supports student ownership of background knowledge, content vocabulary, and critical thinking about texts. Teachers will learn how to create conditions that foster motivation and engagement with informational text while also creating authentic accountability to help students read to their potential.

**Book Features:** An approach to independent reading that can be incorporated into any reading curriculum from reading workshop to more structured comprehensive programs. Practical information for how to impact a difficult-to-reach aspect of reading: the internal effort students make while reading complex text independently. Strategies for building students' critical thinking through discussion and writing. Guidance for how to increase student ownership of attending to background knowledge and content vocabulary. A framework that can be used by reading and content science and social studies teachers in both elementary and middle school. Dedicated discussions on how to differentiate HART for English Learners. Lessons that include descriptive transcripts, reproducible supportive materials, and access to downloadable PowerPoints.
