Research in Education, 1974 Reading Development in a Second Language Elizabeth Buchter Bernhardt, 1991

Bernhardt advocates more principled research and instruction in second language literacy. This book is a personal statement based on her own theory and research as well as that of others. It provides a comprehensive review of what is known about the second language reading process based on principles drawn from the synthesis of empirical data. The discussion is set forth from four main perspectives: an examination of theoretical models of the reading process and their application to second language contexts; a synthesis of empirical data of second language reading research from 1973 to 1989; descriptions of reader-based interactions with second language texts and curriculum instruction and assessment. **Reading**

McLaughlin, 2013-10-28 First published in 1987, throughout human history learning a second language has been an important part of the educational process. From ancient times to the present, school children have had to struggle to learn a second language and in many cases third and fourth languages. To be educated meant to know a language other than the language of one's family and community. The contemporary American educational system is one of the few in recorded history that allows its products to remain monolingual. **Reading in a Second Language** William Grabe, 2009 Abstract
