**The Everyday Atlantic** Tania Gentic, 2013-12-02 In The Everyday Atlantic Tania Gentic offers a new understanding of the ways in which individuals and communities perceive themselves in the twentieth century Atlantic world She grounds her study in first time comparative readings of daily newspaper texts written in Spanish Portuguese and Catalan Known as chronicles these everyday literary writings are a precursor to the blog and reveal the

ephemerality of identity as it is represented and received daily Throughout the text Gentric offers fresh readings of well known and lesser known chroniclers cronistas including Eugeni d Ors Catalonia Germ n Arciniegas Colombia Clarice Lispector Brazil Carlos Monsiv is Mexico and Brazilian blogger Ricardo Noblat While previous approaches to the Atlantic have focused on geographical crossings by subjects Gentric highlights the everyday moments of reading and thought in which discourses of nation postcolonialism and globalization come into conflict Critics have often evaluated in isolation how ideology ethics affect and the body inform identity however Gentric skillfully combines these approaches to demonstrate how the chronicle exposes everyday representations of self and community     *Re-Defining Legitimate Statehood* Obiora Chinedu Okafor,2021-10-18 The purpose of this volume is dual The first is to provide information about the question of the role that doctrines and practices of international law have played in the emergence and persistence of the phenomenon of socio cultural fragmentation and therefore of inter group conflict within African states The second is to provide original thought about the ways in which prompted by the emergent turn in our time to minority and group rights international law and multilateral African states have begun the long journey toward modifying those doctrines and practices that have led to such unfortunate results and have thereby begun to make very valuable contributions to the effort to prevent and or reduce the incidence of inter group strife in specific African contexts The book is not however limited in scope by its utilisation of Africa as a case study The book s core is based on analysis of traditional and contemporary international legal doctrines and practices their effects in specific contexts as well as on the role of multilateral institutions in the prevention of internecine conflict within established states It is hoped that with the use of African states as case studies the book will be a contribution to the advancement of scholarly knowledge regarding the general question of the relationship among the doctrines of international law the activities of multilateral institutions and the management of the problems of fragmentation and internecine strife within established states the world over This volume is relevant to international lawyers specialists in international politics diplomats theorists minority and group rights scholars historians and human rights activists in general It is particularly relevant to the African studies specialist the statesman and the diplomat     Information Modelling and Knowledge Bases XI Eiji Kawaguchi,Hannu Kangassalo,H. Jaakkola,2000 This is the tenth volume in a series on information modelling and knowledge bases The topics of the articles cover a wide variety of themes in the domain of information modelling design and specification of information systems and knowledge bases ranging from foundations and theories to systems construction and application studies The contributions in this volume represent the following major themes models in intelligent activity concept modelling and conceptual modelling conceptual modelling and information requirements specification collections of concepts knowledge base design and database design human computer interaction and modelling software engineering and modelling and applications     **The Essence of History** Aaron Turner,2025-09-25 This book brings together historical thinkers from diverse disciplinary backgrounds to offer original interpretations of the essence of

history It addresses why the essence of history itself cannot be so easily thematised or conceptualised Restating the question of the essence of history is necessary as it has been largely forgotten today Since antiquity history has been inextricably bound up with the problem of truth Contemporary philosophy of history and historiography have branched out in many different directions This complexity has made it nearly impossible for historical thinkers to engage outside of their own field The relentless advancement of historical thought has almost completely neglected the question of the essence of history The chapters in this volume respond to questions such as What is history What in the progress of historical thought from antiquity to modernity did we lose along the way And what does it mean if it means anything at all to have history to be historical The Essence of History will be of interest to scholars and graduate students working in philosophy of history historical theory and historiography and ancient history
