Responding To Troubled Youth:

Responding to Troubled Youth Cheryl L. Maxson, Malcolm W. Klein, 1997-06-12 This book provides an overview of the dominant philosophical approaches and practices in handling status offenders those children who habitually resist the control of their parents and schools who run away from home who drink and stay out after curfew The three basic and competing social philosophies in responding to these troubled and troublesome youths discussed at length in this book are known as the treatment deterrence and normalization rationales In examining these philosophies the authors consider the quality and quantity of response to and for status offenders at local community service outlets in seven different cities In this way Maxson and Klein are able to determine whether such response practices conform with the ideological thrusts embedded in state legislation The results will surprise many legislative and youth service policy professionals Agency characteristics service delivery patterns and youth clients do indeed reflect the treatment deterrence and normalization rationales but in ways that have little bearing on the dominant philosophies embodied by state legislation Special chapters are devoted to those minors most likely to slip through the safety net of youth service chronic runaways and street kids The authors discuss the implications of their findings for lawmakers and policy developers *And Therefore Choose Life - A Jewish Response to Teens in Crisis* ,

Restorative Justice & Responsive Regulation John Braithwaite, 2002 Braithwaite's argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims offenders and communities better than existing criminal justice practices Counterintuitively he also shows that a restorative justice system may deter incapacitate and rehabilitate more effectively than a punitive system This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails and incapacitation only after escalated deterrence fails Braithwaite's empirical research demonstrates that active deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports is far more effective than the passive deterrence that is notable in the stricter sentencing grid of current criminal justice systems *Responding to Gangs* , 2002
