Motivation and Cognitive Control Todd S. Braver, 2015-12-22 Individuals do not always perform to their full capability on cognitive tasks When this occurs the usual explanation is that the individual was not properly motivated But this begs the important question How and why does motivation interact with and influence cognitive processing and the control processes that regulate it What are the underlying mechanisms that govern such interactions Motivation has been an important component of psychology and neuroscience throughout the history of the field but has recently been rejuvenated by rapidly accelerating research interest in the nature of motivation cognition interactions particularly as they impact control processes and goal directed behavior This volume provides an up to date snapshot of the state of research in this exciting expanding area The contributors to the volume are internationally renowned researchers that lead the field in conducting groundbreaking studies Moreover they represent a variety of research perspectives and traditions cognitive psychology and neuroscience animal learning social affective and personality psychology and development lifespan and aging studies This book summarizes our current state of understanding of the relationship between motivation and cognitive control and serves as an essential reference for both students and researchers

Motivation and Agency Alfred R. Mele, 2003-01-02 What place does motivation have in the lives of intelligent agents Mele's answer is sensitive to the concerns of philosophers of mind and moral philosophers and informed by empirical work He offers a

distinctive comprehensive attractive view of human agency This book stands boldly at the intersection of philosophy of mind moral philosophy and metaphysics Understanding Motivation and Emotion Johnmarshall Reeve,2018-02-15 The past ten years have seen an explosion of useful research surrounding human motivation and emotion new insights allow researchers to answer the perennial questions including What do people want and Why do they want what they want By delving into the roots of motivation the emotional processes at work and the impacts on learning performance and well being this book provides a toolbox of practical interventions and approaches for use in a wide variety of settings In the midst of the field s golden age there has never been a better time to merge new understanding and practical application to improve people s lives Useful in schools the workplace clinical settings health care sports industry business and even interpersonal relationships these concepts are profoundly powerful incorporated into the state of the art intervention programs detailed here they can enhance people s motivation emotion and outlook while answering the core questions of any human interaction

Individual Differences: From Neurobiological Bases to New Insight on Approach and Avoidance Behavior Daniela Laricchiuta,2016-01-22 The superordinate division of emotions is distributed along a bipolar dimension of affective valence from approaching rewarding situations to avoiding punitive situations Avoiding and approaching behaviors determine the disposition to the primary emotions of fear and attachment and the behavioral responses to the environmental stimuli of danger novelty and reward Approach or avoidance behaviors are associated with the brain pathways controlling cognitive and attentional function reward sensitivity and emotional expression involving prefrontal cortex amygdala striatum and cerebellum Individual differences in approach and avoidance behavior might be modulated by normal variance in the level of functioning of different neurotransmitter systems such as dopaminergic serotonergic noradrenergic and endocannabinoid systems as well as many peptides such as corticotropin releasing hormone These substances act at various central target areas to increase intensity of appetitive or defensive motivation Physiologically personality temperaments of approach and avoidance are viewed as instigators of propensity They produce immediate affective cognitive and behavioral inclinations in response to stimuli and orient individuals across domains and situations in a consistent fashion Although the action undoubtedly emerges directly from these temperamental proclivities ultimate behavioral outcomes are often a function of the integration among goal pursuit self regulation and temperament trait Defective coping strategies to aversive or rewarding stimuli characterize the patho physiology of anxiety and stress related disorders or compulsive and addiction behaviors respectively Individuals with neuropsychiatric symptoms such as depression suicidal behavior bipolar mania schizophrenia substance use disorders pathological gambling and anxiety disorders have scores which fall at the extreme tails of the normal distribution for a specific temperamental trait The present Research Topic on the individual differences in emotional and motivational processing emphasizes the link between neuronal pattern and behavioral expression The Topic includes experimental and clinical researches addressing the individual differences related to approach and avoidance and their

behavioral characterization structural and neurochemical profiles synaptic connections and receptor expressions Studies are organized in a framework that puts in evidence the phenotypic expression and neurobiological patterns characterizing the individual differences and their biological variance Motivation and Action Heinz Heckhausen, 2012-12-06 The translation of this volume has been a long and sometime arduous journey giving nearly literal meaning to the Latin term *translatulus* meaning to carry across In fact it required many journeys both geographically between Canada and Germany and figuratively between German and English language thought and culture between the mind of a German professor and that of his American colleague Whether or not it was all worthwhile must be left to the reader's judgment but let me outline the rationale for embarking on this venture When the first German edition of this book appeared in 1980 it was acclaimed not only by German scholars but by those outside the German speaking community as well In fact it received extremely favorable reviews even in English language journals which is unusual for a foreign text It was recognized that this was far more than just another text book on motivation For one thing it exposed and examined the multi faceted roots that have contributed to contemporary theory and research in motivation The author skillfully examined the motivational concepts theories and research that have emanated from many areas of psychology such as learning theory social psychology personality psychoanalysis and clinical psychology Motivation Stephen B. Klein, 1982 **Motivation and Action** Jutta Heckhausen, 2025-09-30 This fourth edition provides translations of all chapters of the most recent sixth German edition of *Motivation and Action* including one entirely new chapter This volume provides comprehensive coverage of the history of motivation and introduces up to date theories and new research findings Early sections offer a broad introduction to and deep understanding of the field of motivation psychology mapping out different perspectives and research traditions Subsequent chapters examine major themes of human motivation including achievement affiliation and power motivation as well as the fundamentals of motivation psychology such as motivated and goal oriented behaviors implicit and explicit motives and the regulation of development In addition the book discusses the roles of motivation in three practical fields school and college the workplace and sports Topics featured in this text include Dynamic between person and situation in motivating behavior Conscious and unconscious motivators of behavior Drives and incentives in the fields of achievement intimacy sociability and power How the biochemistry and structures of our brain shapes motivated behavior How to engage in intentional goal directed behavior The potential and limits of motivation and self direction in shaping our lives *Motivation and Action* Fourth Edition is a must have resource for undergraduate and graduate students as well as researchers in the fields of motivation psychology cognitive psychology and social psychology as well as personality psychology and agency

Research Grants Index National Institutes of Health (U.S.). Division of Research Grants, 1964 Cause Lawyering Austin Sarat, Stuart Scheingold, 1998-01-08 Why do some lawyers devote themselves to a given social movement or political cause How are such deeds of individual commitment and personal belief justly executed given the ideals of disinterested

professional service to which lawyers are in theory at least supposed to adhere What can we learn from such lawyers about the relationship between law and politics Cause Lawyering is a wise and varied collection of responses to these questions featuring a number of distinguished legal scholars concerned with anti poverty lawyers lawyers who work against capital punishment immigration lawyers and other lawyers working to end oppression Editors Austin Sarat and Stuart Scheingold have assembled here a valuable cross national portrait of lawyers compelled to sacrifice financial gain so as to use their legal skills in the promotion of a more just society These telling and important essays fully explore the relationship between cause lawyering and the organized legal professions of many different countries the US England South Africa Israel Cuba and so forth They describe the utility of law as a resource in political struggles and conversely highlight the constraints under which lawyers necessarily operate when they turn to politics Some provide broad theoretical overviews others present rich case studies Advancing a fundamental argument about the very nature of the legal profession this book explains the strategies that cause lawyers deploy as well as the challenges they face in trying to be legally astute and effective while remaining politically devoted and aware Although it is a controversial way of practicing law cause lawyering as explicated in the essays in this volume is indeed indispensable to the legitimization of professional authority Human Motivation and Emotion Ross Buck,1988-03-03 Examines basic biological and physiological systems underlying motivational and emotional responses arguing that in the course of human evolution increasingly complex social influences have liberated most human behavior from direct biological physiological control
