Playground Design Outdoor Environments For Learning And Development:

Playground Design A. Eriksen, 1985 **Designing for Play** Ms Barbara E Hendricks, 2013-06-28 10 years ago Barbara Hendricks brought together thinking from child development and child psychology perspectives on play with practical issues confronted by designers and policy makers The result was a beautifully crafted well illustrated guide challenging established notions of play provision This second edition brings the text up to date from 2001 to 2010 with added discussion about new ideas for play area designs and what has not worked in the past decade **The Science of Play** Susan G. Solomon, 2014-11-04 Poor design and wasted funding characterize today's American playgrounds A range of factors including a litigious culture overzealous safety guidelines and an ethos of risk aversion have created uniform and unimaginative playgrounds These spaces fail to nurture the development of children or promote playgrounds as an active component in enlivening community space Solomon's book demonstrates how to alter the status quo by allying data with design Recent information from the behavioral sciences indicates that kids need to take risks experience failure but also have a chance to succeed and master difficult tasks learn to plan and solve problems exercise self control and develop friendships Solomon illustrates how architects and landscape architects most of whom work in Europe and Japan have already addressed these needs with strong successful playground designs These innovative spaces many of which are more multifunctional and cost effective than traditional playgrounds are both sustainable and welcoming Having become vibrant hubs within their neighborhoods these play sites are models for anyone designing or commissioning an urban area for children and their families The Science of Play a clarion call to use playground design to deepen the American commitment to public space will interest architects landscape architects urban policy makers city managers local politicians and parents *Designing for Play* Barbara Hendrickson, 2018-12-13 This title was first published in 2001 Architects landscape designers builders gardeners and teachers have all at some time been called upon to design a play area Unfortunately this diversity has not resulted in a similar diversity of design solutions for this very problematic task Despite a proliferation of how to books on this subject playgrounds have remained virtually the same throughout the world since their creation over a century ago This is not a how to design book Instead based on thirty years experience as a specialist play area designer Barbara Hendricks details a radically new approach applying cutting edge thinking from child development and child psychology to find innovative design solutions challenging the established notions of play provision Covering key sociological public policy environmental and design issues this book provides designers with an exploration of and guide to designing from a child's eye view of the world Beautifully crafted and copiously illustrated with numerous examples of recently designed playgrounds this book is not only stimulating and informative but fun to read and seriously playful in itself **Children on Playgrounds** Craig H. Hart, 1993-01-01 This book focuses on key issues and current research evidence of links between children's behavior in outdoor play environments and children's development Specific attention is given to ways that outdoor play environments

are extensions of other development settings like the classroom or family Since most work up to this point has focused on development in indoor classroom settings or in other developmental contexts this book makes an important contribution
