Playing By The Rules Sport Society And The State:

Playing by the Rules John Wilson, 1994 Sport while it has its origins in the love of play and the desire to be entertained and diverted is a social institution with important political economic and social consequences Playing by the Rules describes how the relation between sport and the state has developed over the last one hundred years and how largely by indirection and accident a public policy with respect to sport has emerged Apart from the debate as to whether sport and politics should mix in the first place John Wilson considers the process whereby sport has become a public policy domain just like energy health transportation and agriculture He argues that while all modern societies have evolved both sports complexes and extensive states Americans have developed their own unique kind of relationship This relationship grants considerable freedom for commercialized sports to develop at the expense of more state administered forms At the same time this arrangement allows commercialized sports to benefit from state protection and guarantees all in the interest of the public good a system that is highly characteristic of public policy in liberal democratic societies where individual freedom is a paramount value Wilson traces the impact of liberal democratic politics through a number of discrete but related fields from the struggle to secure equality of opportunity for all individuals to participate in sport to the evolution of contractual freedom for professional athletes and the role played by unions in securing these freedoms He then examines the impact of state actions mainly judicial on the structure of the sports industry principally the impact of the state on the relation between firms or franchises ability to control players entry into the league movement of franchises and relations with the mass media Playing by the Rules also defines the relation between sport and the state more broadly Assuming that the state is interested in nation building to legitimate its practices Wilson explores the role sport has played in this nation building in the United States the perceived relation between sport and citizenship the part sport has been asked to play in the national task of assimilating immigrants and the efforts the state has made to control and regulate sport in the interest of promoting national and citizenship values Beyond that Wilson addresses the impact on sport of the United States participation in the emerging global order the effect on amateur athletics of the state s need to protect national interests and secure defense in the United States and the extent to which a global order of sport has emerged that now transcends national boundaries and weakens the control of the state over sport

Sports, Jobs, and Taxes Roger G. Noll, Andrew Zimbalist, 2011-03-01 America is in the midst of a sports building boom Professional sports teams are demanding and receiving fancy new playing facilities that are heavily subsidized by government In many cases the rationale given for these subsidies is that attracting or retaining a professional sports franchise even a minor league baseball team or a major league pre season training facility more than pays for itself in increased tax revenues local economic development and job creation But are these claims true To assess the case for subsidies this book examines the economic impact of new stadiums and the presence of a sports franchise on the local economy It first explores such general issues as the appropriate method for measuring economic benefits and costs the source of the bargaining power of teams in obtaining subsidies from local government the local politics of attracting and retaining teams the relationship between sports and local employment and the importance of stadium design in influencing the economic impact of a facility The second part of the book contains case studies of major league sports facilities in Baltimore Chicago Cincinnati Cleveland Indianapolis San Francisco and the Twin Cities and of minor league stadiums and spring training facilities in baseball The primary conclusions are first sports teams and facilities are not a source of local economic growth and employment second the magnitude of the net subsidy exceeds the financial benefit of a new stadium to a team and third the most plausible reasons that cities are willing to subsidize sports teams are the intense popularity of sports among a substantial proportion of voters and businesses and the leverage that teams enjoy from the monopoly position of professional sports leagues
