Global Land Grabs Marc Edelman,Carlos Oya,Saturnino M. Borrás Jr.,2016-03-22 Since the 2008 world food crisis a surge of land grabbing swept Africa Asia and Latin America and even some regions of Europe and North America Investors have uprooted rural communities for massive agricultural biofuels mining industrial and urbanisation projects Water grabbing and green grabbing have further exacerbated social tensions Early analyses of land grabbing focused on foreign actors the biofuels boom and Africa and pointed to catastrophic consequences for the rural poor Subsequently scholars carried out local case studies in diverse world regions The contributors to this volume advance the discussion to a new stage critically scrutinizing alarmist claims of the first wave of research probing the historical antecedents of today's land grabbing examining large scale land acquisitions in light of international human rights and investment law and considering anew longstanding questions in agrarian political economy about forms of dispossession and accumulation and grassroots resistance Readers of this collection will learn about the impacts of land and water grabbing the relevance of key theorists including Marx Polanyi and Harvey the realities of China's involvement in Africa how contemporary land grabbing differs from earlier plantation agriculture and how social movements and rural people in general are responding to this new threat This book was published as a special issue of Third World Quarterly

Social Science Perspectives on Managing Agricultural Technology , Small Farmers, Big Business David Glover,Ken Kusterer,2016-07-27 This book deals with an agricultural production and marketing system known as contract farming CF In

this system a public or private agency purchases the crops of independent farmers through contracts often providing inputs technical assistance and marketing CF has a long history in developed countries and has spread to the Third World The book uses case studies from North America Latin America and Africa to assess the experience to date and provide guidelines for the use of CF in the future **Oyster Mushroom, 1979-1987** Jerry Rafats,1988 *Culture And Change Along The Blue Nile* Lina Fruzzetti,2019-04-11 This book aims to bring a concern with cultural values and meanings closer to the study of the economic political jural and religious change and development in the Sudan It concentrates on sections of Sudanese society caught in the rapid changes of the 1970 s **Confronting Historical Paradigms** Frederick Cooper,1993 Confronting Historical Paradigms argues that confrontation with major paradigms of world history has marked the fields of African and Latin American history during the last quarter century and that the process has dramatically restructured historical and theoretical understanding of peasantries labor and the capitalist world system Moreover it maintains the intellectual reverberations within and across the African and Latin American fields constitute a challenging and underappreciated counterpoint to laments that contemporary historical knowledge has suffered a splintering so extreme that it undermines larger dialogue and meaning The authors in their substantive essays synthesize order and evaluate the significance of the enormous resonating literatures that have come to exist for Africa and Latin America on the themes of the capitalist world system labor and peasantries They historicize these literatures by analyzing an entire cycle of critical dialogue and confrontation with historical paradigms and the professional upheavals that accompanied them They review the initial confrontations with frameworks of historical knowledge that erupted in the 1960s and the early 1970s the emergence of new dissident paradigms the outpouring of subsequent scholarship on peasants labor and capitalism that began to unravel the newly proposed paradigms by the 1980s and 1990s and the outlines of the new interpretive frameworks that tended to displace both the traditional and early dissident paradigms They also suggest possible outlines of a new cycle of Third World confrontations with paradigm anchored in themes such as gender and ethnicity Confronting Historical Paradigms employs a historicized awareness of intellectual networks conversations and history theory dialogues The result is a critical analysis and synthetic presentation of substantive advances that have preoccupied scholarship on Africa and Latin America in recent decades and a powerful challenge to notions that new fields of history have ended up destroying intellectual coherence and community Solar Energy Update ,1983 **Whitaker's Books in Print** ,1990 **Quick Bibliography Series** ,1976 Agrindex ,1982 **British Books in Print** ,1986 **African Studies Review** ,1991 **Reading about the Environment** P. E.
