Maps of Time David Christian,2011-10-03 An introduction to a new way of looking at history from a perspective that stretches from the beginning of time to the present day Maps of Time is world history on an unprecedented scale Beginning with the Big Bang David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna including human beings Cosmology geology archeology and population and environmental studies all figure in David Christian s account which is an ambitious overview of the emerging field of Big History Maps of Time opens with the origins of the universe the stars and the galaxies the sun and the solar system including the earth and conducts readers through the evolution of the planet before human habitation It surveys the development of human society from the Paleolithic era through the transition to agriculture the emergence of cities and states and the birth of the modern industrial period right up to intimations of possible futures Sweeping in scope finely focused in its minute detail this riveting account of the known world from the inception of space time to the prospects of global warming lays the groundwork for world history and Big History true as never before to its name

Building the New World Erik Olssen,2013-10-01 These essays are the result of a study of the Dunedin working class suburb of Caversham Olssen discusses a number of important theoretical issues the writing of history the question of class the role of gender the nature of work and the growth of the labor movement are all explored *Historical Sociology in India* Hetukar Jha,2017-07-05 This book is a comprehensive study of historical sociology and its development especially in the Indian context It looks at the works of Indian sociologists and analyses their approaches in terms of book view normative and field view descriptive history The volume critically appraises reports of empirical surveys conducted during early colonial rule including those by H T Colebrooke Francis Buchanan William Adam engages with the works of sociologists such as M N Srinivas Ramkrishna Mukherjee Louis Dumont Nicholas Dirks Bernard Cohn Yogendra Singh D N Dhanagare A M Shah T K Oommen among others and shows how historical perspective has been adopted in understanding aspects of Indian society villages castes traditions socio cultural change education peasants and their movements etc Presenting an alternative idea of social reality this book will deeply interest students and scholars of sociology social theory and social history Thinking History Globally Diego

Olstein,2014-11-04 The book brings together many recent trends in writing history under a common framework thinking history globally By thinking history globally the book explains applies and exemplifies the four basic strategies of analysis the big C s comparing connecting conceptualizing and contextualizing using twelve different branches of history **Time and the Shape of History** P. J. Corfield,2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by

the terms of the loan agreement Shylock is able to demand a pound of Antonio's flesh Portia cleverly intervenes and all ends well except of course for Shylock **Eurasia at the Dawn of History** Manuel Fernández-Götz, Dirk Krausse, 2017-01-16

Our current world is characterized by life in cities the existence of social inequalities and increasing individualization When and how did these phenomena arise What was the social and economic background for the development of hierarchies and the first cities The authors of this volume analyze the processes of centralization cultural interaction and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia from the Atlantic coasts to China The chronological framework spans a period from the Neolithic to the Late Iron Age with a special focus on the early first millennium BC By adopting an interdisciplinary approach structured around the concepts of identity and materiality this book addresses the appearance of a range of key phenomena that continue to shape our world *The Oxford Handbook of Max Weber* Dr. Edith Hanke, Dr. Lawrence A. Scaff, Dr. Sam Whimster, 2019-12-04

Active at the time when the social sciences were founded Max Weber's social theory contributed significantly to a wide range of fields and disciplines Considering his prominence it makes sense to take stock of the Weberian heritage and to explore the ways in which Weber's work and ideas have contributed to our understanding of the modern world Using his work as a point of departure *The Oxford Handbook of Max Weber* investigates the Weberian legacy today identifying the enduring problems and themes associated with his thought that have contemporary significance the nature of modern capitalism neo liberal global economic policy nationalism religion and secularization threats to legality the culture of modernity bureaucratic rule and leadership politics and ethics the value of science power and inequality These problems are global in scope and the Weberian approach has been used to address them in very different societies Thus the Handbook also features chapters on Europe Turkey Islam Judaism China India and international politics The Handbook emphasizes the use and application of Weber's ideas It offers a journey through the intellectual terrain that scholars continue to explore using the tools and perspectives of Weberian analysis The essays explore how Weber's concepts hypotheses and perspectives have been applied in practice and how they can be applied in the future in social inquiry not only in Europe and North America but globally The volume is divided into six parts exploring in turn Capitalism in a Globalized World Society and Social Structure Politics and the State Religion Culture and Science and Knowledge *Companion to Historiography* Michael Bentley, 2006-02-27

This Companion presents a clear thematic overview of historiography explored through a series of stimulating and wide ranging articles Compiled by experts in the field the Companion is fully indexed for ease of access *Politics and Religion in the United Kingdom* Steve Bruce, 2013-07-03 This important new volume seeks to provide significant contribution to our understanding of religion and politics demonstrating through comparisons with other countries the unusually complex nature of the interaction of religion and politics in the United Kingdom Bruce provides a detailed and comprehensive analysis of the field covering key topics including Religion and Violence in Northern Ireland A UK US comparison of the relationship

between the church and the nation state Links between Protestantism and the rise of modern democracy The relationship between Methodism and Socialism The impact that ethnic minority status and religious values have on political alignment This work will be of great interest to students and scholars of religion politics and religious sociology *The Sociology of War and Violence* Siniša Malešević, 2010-06-10 War is a highly complex and dynamic form of social conflict This book demonstrates the importance of using sociological tools to understand the changing character of war and organised violence The author offers an original analysis of the historical and contemporary impact that coercion and warfare have on the transformation of social life and vice versa Although war and violence were decisive components in the formation of modernity most analyses tend to shy away from the sociological study of the gory origins of contemporary social life In contrast this book brings the study of organised violence to the fore by providing a wide ranging sociological analysis that links classical and contemporary theories with specific historical and geographical contexts Topics covered include violence before modernity warfare in the modern age nationalism and war war propaganda battlefield solidarity war and social stratification gender and organised violence and the new wars debate **The Cold War and After** Sean M. Lynn-Jones, Steven E. Miller, 1993 The Cold War and After presents a collection of well reasoned arguments selected from the journal International Security on the causes of the Cold War and the effect of its aftermath on the peaceful coexistence of European states This new edition includes all of the material from the first edition plus four new articles The Unipolar Illusion Why New Great Powers Will Rise Christopher Layne International Primacy Is the Game Worth the Candle Robert Jervis Why International Primacy Matters Samuel P Huntington and International Relations Theory and the End of the Cold War John Lewis Gaddis Sean M Lynn Jones is Managing Editor of International Security Steven E Miller is Director of Studies at the Center for Science and International Affairs Harvard University **Modernity and the Victorians** Angus Hawkins, 2022 Modernity and the Victorians lays out in sweeping terms an alternative conception of the political and social dynamics of the period centred on the past morality and community It offers a deliberately bracing challenge to a swathe of received wisdoms which it asserts have fatally misled students of modern Britain **Critical Reflections on Indigenous Religions** James L. Cox, 2016-04-22 The study of indigenous religions has become an important academic field particularly since the religious practices of indigenous peoples are being transformed by forces of globalization and transcontinental migration This book will further our understanding of indigenous religions by first considering key methodological issues related to defining and contextualizing the religious practices of indigenous societies both historically and in socio cultural situations Two further sections of the book analyse cases derived from European contexts which are often overlooked in discussion of indigenous religions and in two traditional areas of study South America and Africa Comparing Globalizations Thomas D. Hall, 2017-11-17 This work explores essential debates on globalization and world systems analysis It begins with a review of theoretical insights from world systems analysis and explains the evolution of its terminology The book subsequently seeks to

answer several important questions When did globalization begin and what insights into contemporary globalization may be gained from older forms How does globalization differ in different places and how can different instances of globalization be compared Who is affected by globalization how are they affected and how do these effects vary if at all over time and space As world systems analysis and studies of globalization require interdisciplinary expertise the contributing authors draw on many fields including anthropology economics geography philosophy political science sociology and world history The book's overall goal is to facilitate the dialogue between approaches that at times seem to talk at cross purposes and to extend an invitation to scholars from many different areas to explore globalization *Globalism, Nationalism, Tribalism* Paul

James, 2006-04-20 Paul James has written a magnificent account of the world's current condition one that highlights the complexities and contradictions with which people communities and nations must contend and that does so in a compelling and creative style Stressing the interaction between global and local forces his writing style is lively and compelling as well as peppered with a wide range of citations from *Woman's Day* to the *Cambodian Daily* on the same page James N Rosenau University Professor of International Affairs The George Washington University *Globalism Nationalism Tribalism* establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization from genocide and terrorism to television and finance capital *Globalism* is treated as an uneven and layered process of spatial expansion not simply one of disorder fragmentation or rupture Nor is it simply a force of homogenization *Nationalism* is taken seriously as a continuing and important formation of contemporary identity and politics James rewrites the modernism theories of the nation state without devolving into the postmodernist assertion that all is invention or surface gloss *Tribalism* is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life from the villages of Rwanda to the cities of the West Theoretically adept and powerfully argued this is the first comprehensive analysis that brings these crucial themes of contemporary life together *Soft Boundaries* Claire

Detels, 1999-11-30 American education and culture are suffering from a terrible soul numbing imbalance in which there is an overemphasis on basic quantifiable skills and knowledge and a de emphasis of more creative areas of the humanities especially the arts and aesthetics Detels indicates that the marginalization of the arts and aesthetics in American education has been caused by a hard boundaried paradigm that has come to dominate American education According to this paradigm the arts are wrongly viewed and taught as separate unconnected disciplines of music visual arts dance and theater while their intimate connections to each other and to aesthetic experience and life in general are completely unrepresented The way out of this crisis is to change paradigms from a hard boundaried single minded valuation of specialization to a more soft boundaried curriculum that allows for specialized education in individual art forms as well as widespread interdisciplinary integration of the arts with each other and with general education at the K 12 and college levels Without such a change we

will be unable to equip our students with the necessary skills to understand and communicate about the increasingly complex sensually immersive artistic media and forms of the future The Prospect of Global History James Belich, John Darwin, Margret Frenz, Chris Wickham, 2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional history and from the United States across South Asia to China
