Excerpt promising some part of its original pretensions But Hegel saw this undeniable characteristic of the world we live in in a non empirical light Let the mental idea of the thing work in your thought all alone he fancied and just the same consequences will follow It will be negated by the opposite ideas that dog it and can survive only by entering along with them into some kind of treaty This treaty will be an instance of the so called higher synthesis of everything with its negative and Hegel s originality lay in transporting the process from the sphere of percepts to that of concepts and treating it as the universal method by which every kind of life logical physical or psychological is mediated Not to the sensible facts as such then did Hegel point for the secret of what keeps existence going but rather to the conceptual way of treating them Concepts were not in his eyes the static self contained things that previous logicians had supposed but were germinative and passed beyond themselves into each other by what he called their immanent dialectic In ignoring each other as they do they virtually exclude and deny each other he thought and thus in a manner introduce each other So the dialectic logic according to him had to supersede the logic of identity in which since Aristotle all Europe had been brought up This view of concepts is Hegel s revolutionary performance but so studiously vague and ambiguous are all his expressions of it that one can hardly tell whether it is the concepts as such or the sensible experiences and elements conceived that Hegel really means to work with The only thing that is certain is that whatever you may say of his procedure some one will accuse you of misunderstanding it

Entangled Worlds Catherine Keller,Mary-Jane Rubenstein,2017-08-08 Historically speaking theology can be said to operate materiaphobically Protestant Christianity in particular has bestowed upon theology a privilege of the soul over the body and belief over practice in line with the distinction between a disembodied God and the inanimate world He created Like all other human social and natural sciences religious studies imported these theological dualisms into a purportedly secular modernity mapping them furthermore onto the distinction between a rational enlightened Europe on the one hand and a variously emotional primitive and animist non Europe on the other The new materialisms currently coursing through cultural feminist political and queer theories seek to displace human privilege by attending to the

agency of matter itself Far from being passive or inert they show us that matter acts creates destroys and transforms and as such is more of a process than a thing Entangled Worlds examines the intersections of religion and new and old materialisms Calling upon an interdisciplinary throng of scholars in science studies religious studies and theology it assembles a multiplicity of experimental perspectives on materiality What is matter how does it materialize and what sorts of worlds are enacted in its varied entanglements with divinity While both theology and religious studies have over the past few decades come to prioritize the material contexts and bodily ecologies of more than human life Entangled Worlds sets forth the first multivocal conversation between religious studies theology and the body of the new materialism Here disciplines and traditions touch transgress and contaminate one another across their several carefully specified contexts And in the responsiveness of this mutual touching of science religion philosophy and theology the growing complexity of our entanglements takes on a consistent ethical texture of urgency

Pragmatism and Sociology Emile Durkheim, 1983-04-21 [Around the Day in Eighty Worlds](#) Martin Savransky, 2021-04-19 In *Around the Day in Eighty Worlds* Martin Savransky calls for a radical politics of the pluriverse amid the ongoing devastation of the present Responding to an epoch marked by the history of colonialism and ecological devastation Savransky draws on the pragmatic pluralism of William James to develop what Savransky calls a pluralistic realism an understanding of the world as simultaneously one and many ongoing and unfinished underway and yet to be made Savransky explores the radical multifariousness of reality by weaving key aspects of James's thought together with divergent worlds and stories of Magellan's circumnavigation sorcery in Mozambique God's felt presence among a group

of evangelicals in California visible spirits in Zambia and ghosts in the wake of the 2011 tsunami in Japan Throughout he experiments with these storied worlds to dramatize new ways of approaching the politics of radical difference and the possibility of transforming reality By exploring and constructing relations between James s pluralism and the ontological turn in anthropology Savransky offers a new conceptualization of the pluriverse that fosters modes of thinking and living otherwise
