

Endangered Animals

There are millions of different types of animal on the planet. Some animals are struggling to survive in the wild and are at risk of disappearing from the world forever. These animals are endangered.

How do animals become endangered?

Animals can become endangered when their habitat is destroyed or changed.

They can also be endangered by pollution or disease.

Humans can endanger animals by hunting or overfishing.

Endangered animals can become extinct.

Which animals are at risk?

One of the world's most endangered animals is the Javan rhino. There may be less than 80 still living in the wild.

Amur leopards are the most endangered big cats. They can only be found in parts of Russia and China.

Hawksbill turtles, African forest elephants, mountain gorillas and Javan rhinos are also critically endangered.

How can we protect them?

Lots of charities work to protect endangered animals and their habitats. People can help by donating money or volunteering.

Animals can be protected by making outdoor spaces friendly to wildlife with plants and places to shelter.

Putting your rubbish in the bin and recycling as much as possible can also make a big difference.

extinct: Has died out and no longer exists.

overfishing: Catching too many fish from the same area.

Illustration: Animals and habitats are under increasing pressure from human activities. The Javan rhino is one of the most endangered animals in the world. It is now extinct.

Endangered Species Act Lowell E. Baier,2023-07-25 The Endangered Species Act of 1973 ESA is one of the most cherished and reviled laws ever passed It mandates protection and preservation of all the nation s species and biodiversity whatever the cost It has been a lightning rod for controversy and conflicts between industry business and environmentalists The year 2023 marks the 50th anniversary of this law and provides an opportunity for a measured and thorough evaluation thereof We cannot know today s challenges and opportunities without understanding their histories This book is the most comprehensive history of the ESA ever published and the first to consider the entire history of the law from all angles in a single volume The history of the ESA has been one of increasing impact complexity and controversy In 1978 the Supreme Court declared that Congress intended for the U S government to save all species at any cost and thereafter application of the ESA became steadily more controversial as seen in the example of the northern spotted owl and the timber wars in the Pacific Northwest in the late 1980s and early 90s and then everywhere as the ESA became a political football in the highly partisan environment of the late 1990s and amendments to the law ceased This book is not only a history but a call to action It will take more conservation more funding and more innovative solutions if we are to save our wildlife and biodiversity It will take the engagement to every American to muster the collective will to meet this challenge The hope of this book is that we will be able to look back and say that we accomplished more in the second 50 years of the ESA than we did in the first
