seen up for just under an hour  
 a school is starting to come in  
 it hasn't yet begun to eat its  
 school will be in for 10 days  
 working for another few minutes  
 it takes me some time to get  
 out of the line but with  
 at swimming with me

Yentsch, Mary C. Beaudry, 1992-08-11 The Art and Mystery of Historical Archaeology is essential reading for anyone concerned with the past In it archaeologists write of revolutions of the imagination and wrest secrets from old objects to recreate our multi cultured heritage Material culture is focal large cities small potsherds big and little bones The book is interdisciplinary and goes inside the process of artifact interpretation to reveal how artifacts talk about people The emphasis is context ethnography ordinary and extraordinary men women and children Here is local history in material form as well as stories of global expansion and culture contact The book draws on the seminal influence of James Deetz s work on American culture and merges history folklore anthropology African American Native American and gender studies The essays illustrate the power and potency of folk beliefs and how myths of the past are constantly remade The authors show how people use objects to converse about themselves their worlds and relationships with others They examine messages writ on brick and stone buried in earth and passed in legend They then demonstrate how archaeologists historians museologists and students of material culture can read these to bring the past to light Here Be Dragons David Koerner, Simon LeVay, 2001-11-15 The discovery of life on other planets would be perhaps the most momentous revelation in human history more disorienting and more profound than either the Copernican or Darwinian revolutions which knocked the earth from the centre of the universe and humankind from its position of lofty self regard In Here Be Dragons astronomer David Koerner and neurobiologist Simon LeVay offer a scientifically compelling and colourful account of the search for life beyond Earth The authors survey the work of biologists cosmologists computer theorists NASA engineers SETI researchers roboticists and UFO enthusiasts and debunkers as they attempt to answer the greatest remaining question facing humankind Are we alone From their safe haven

of scepticism the authors venture into the rough seas of speculation where theory and evidence run the gamut from hard science to hocus pocus Arguing that the universe is spectacularly suited for the evolution of living creatures Koerner and LeVay give us ringside seats at the great debates of Big Science The contentious arguments about what really happens in evolution the acrimonious UFO controversy and the debate over intelligence versus artificial intelligence shed new light on the wildly divergent claims about the universe and life's place in it The authors argue that while no direct evidence of extraterrestrial life yet exists habitats and chemical building blocks for life abound in the universe A wealth of new astronomical techniques and space missions may provide this evidence early in the next century Lucidly written and scientifically rigorous Here Be Dragons presents everything we know thus far about the emergence of intelligent life here on Earth and perhaps beyond

Landon Carter's Uneasy Kingdom Rhys Isaac, 2004-07-15 Landon Carter a Virginia planter left behind one of the most revealing of all American diaries In this astonishingly rich biography Isaac mines this remarkable document and many other sources to reconstruct Carter's interior world as it plunged into revolution The aging patriarch though a fierce supporter of American liberty was deeply troubled by the rebellion and its threat to established order His diary originally a record of plantation business began to fill with angry stories of revolt in his own little kingdom Carter writes at white heat his words sputtering from his pen as he documents the terrible rupture that the Revolution meant to him Indeed Carter felt in his heart that he was chronicling a world in decline the passing of the order that his revered father had bequeathed to him Not only had Landon's king betrayed his subjects but Landon's own household betrayed him his son showed insolent defiance his daughter Judith eloped with a forbidden suitor all of his slaves conspired constantly and eight of them made an armed exodus to freedom The seismic upheaval he helped to start had crumbled the foundations of Carter's own home In *Landon Carter's Uneasy Kingdom* Rhys Isaac unfolds not only the life but also the mental world of our countrymen in a long distant time Moreover in this presentation of Landon Carter's passionate narratives the diarist becomes an arresting new character in the world's literature a figure of Shakespearean proportions the Lear of his own tragic kingdom This long awaited work will be seen both as a major contribution to Revolution history and a triumph of the art of biography

*Pistols in St Paul's* Fiona Smyth, 2024-09-24 A ground breaking account of the scientists and architects who pioneered acoustics in twentieth century Britain On a winter's night in 1951 shortly after Evensong the interior of St Paul's Cathedral echoed with gunfire This was no act of violence but a scientific demonstration of new techniques in acoustic measurement It aimed to address a surprising question could a building be a musical instrument *Pistols in St Paul's* tells the fascinating story of the scientists architects and musicians who set out to answer this question Beginning at the turn of the century their innovative experiments which took place at sites ranging from Herbert Baker's Assembly Chamber in Delhi to Abbey Road Studios and a disused munitions factory near Perivale would come to define the field of architectural acoustics They culminated in 1951 with the opening of the Royal Festival Hall the first building to be designed for musical tone Deeply

researched and richly illustrated Pistols in St Paul s brings to light a scientific quest spanning half a century one that demonstrates the power of international cooperation in the darkest of times High-Water Mark Nicole Dixon,2012-10-15 Ten varied stories many published in Canada s best literary journals of contemporary women learning what they want from sex love and partnership make up the debut collection from Bronwen Wallace Award winner Nicole Dixon

**Paleoclimatology** Colin P. Summerhayes,2020-06-10 Life on our planet depends upon having a climate that changes within narrow limits not too hot for the oceans to boil away nor too cold for the planet to freeze over Over the past billion years Earth s average temperature has stayed close to 14 15 C oscillating between warm greenhouse states and cold icehouse states We live with variation but a variation with limits Paleoclimatology is the science of understanding and explaining those variations those limits and the forces that control them Without that understanding we will not be able to foresee future change accurately as our population grows Our impact on the planet is now equal to a geological force such that many geologists now see us as living in a new geological era the Anthropocene Paleoclimatology describes Earth s passage through the greenhouse and icehouse worlds of the past 800 million years including the glaciations of Snowball Earth in a world that was then free of land plants It describes the operation of the Earth s thermostat which keeps the planet fit for life and its control by interactions between greenhouse gases land plants chemical weathering continental motions volcanic activity orbital change and solar variability It explains how we arrived at our current understanding of the climate system by reviewing the contributions of scientists since the mid 1700s showing how their ideas were modified as science progressed And it includes reflections based on the author s involvement in palaeoclimatic research The book will transform debate and set the agenda for the next generation of thought about future climate change It will be an invaluable course reference for undergraduate and postgraduate students in geology climatology oceanography and the history of science A real tour de force An outstanding summary not only of the science and what needs to be done but also the challenges that are a consequence of psychological and cultural baggage that threatens not only the survival of our own species but the many others we are eliminating as well Peter Barrett Emeritus Professor of Geology Antarctic Research Centre Victoria University of Wellington New Zealand What a remarkable and wonderful synthesis it will be a wonderful source of paleoclimate information and insights Christopher R Scotese Professor Department of Earth and Planetary Sciences Northwestern University Evanston IL USA French and Italian Notebooks ; Tales and Sketches Nathaniel Hawthorne,1913
