Traditional Forms and Cosmic Cycles René Guénon, 2003 Ren Gu non 1886 1951 is undoubtedly one of the luminaries of the twentieth century whose critique of the modern world has stood fast against the shifting sands of recent philosophies His oeuvre of 26 volumes is providential for the modern seeker pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese the Hellenic and Judaic the Christian and Islamic and including also Alchemy Hermeticism and other esoteric currents at the same time it directs the reader to the deepest level of religious praxis emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization Traditional Forms and Cosmic Cycles is a wide ranging collection of articles that could just as well have been called Fragments of an Unknown History Although they must remain fragments as Gu non did not return to many of these themes again it would have been regrettable to leave such fascinating articles buried in old journals and so this posthumous collection is now offered to Anglophone readers for the first time The book opens with the key article The Doctrine of Cosmic Cycles followed by two pieces on Atlantis and Hyperborea Two sections follow concerned respectively with the Hebrew Tradition and the Egyptian Tradition The former comprises five articles concerned primarily with the Kabbalah and the Science of Numbers and the latter includes three articles on Hermes and the Hermetic Tradition Book reviews are inserted at relevant points To lend the collection coherence no other spiritual Traditions are here represented A list of the Collected Writings of Ren Gu non has been provided for those who wish to investigate Gu non s metaphysical expositions on such topics as Christianity Islam the Greco Latin Traditions Celtism etc
