in patriotic actions long believed to be the domain of men and challenged male centered accounts of US nation building their tales about the past reinforced traditional notions of femininity and masculinity reflecting a belief that any challenge to these conventions would jeopardize the country's stability. Similarly they frequently voiced support for inclusive civic nationalism but deliberately shaped historical memory to consolidate white supremacy. Using archival sources from across the country Wendt focuses on the DAR's most visible work after its founding in 1890 its commemorations of the American Revolution western expansion and Native Americans. He also explores the organization's post World War II history a time that saw major challenges to its conservative vision of America's imagined community. This book sheds new light on the remarkable agency and cultural authority of conservative white women in the twentieth century.
