Sense At War With Soul English Poetics 186519:

A New English Dictionary on Historical Principles, 1893 **A New English Dictionary on Historical Principles**
James Augustus Henry Murray, 1893 **The Compact Edition of the Oxford English Dictionary** Sir James Augustus
Henry Murray, 1971 Micrographic reproduction of the 13 volume Oxford English dictionary published in 1933 **Signs of
War in Old English Poetry** Max William Ashton, 2019 Signs of War in Old English Poetry demonstrates how Anglo Saxon
poets conceived of war as a distinct category of conflict with its own particular morality As devised in Anglo Saxon
historiography hagiography law and political philosophy war was large in scale the prerogative of a Christian king served the
interests of a people eod and was the most dramatic earthly working of God's will by human agents This idea of war
approximates the classical Roman bellum publicum and resembles common present day perceptions of what war is or ought
to be I argue that representing war was an issue for Anglo Saxon poets composing vernacular poetry in the traditional heroic
style which idealized and aestheticized the heroic violence that sustained through plunder a migration era lord and his
personal retinue or comitatus This violence is small in scale the prerogative of any ambitious warrior and principally serves
the interests of the few men comprising the comitatus Poets not only recognized but highlighted tensions between the moral
limits of Christian warfare and the idealization of heroic violence I argue that this discord is a hallmark of Old English heroic
poetry compared to other early medieval vernacular traditions My first two chapters focus on Beowulf and participate in a
generations long argument about the moral status of heroism in the poem My primary intervention is to use the model
outlined above to deconstruct the poem's notion of violence which has traditionally been discussed monolithically I argue the
conceptual complexity of violence in Beowulf is obscured by lexical ambiguity Old English has no singular word
corresponding to the modern English word war though Anglo Saxons called it bellum in Latin I explain the effect of this
undiscussed semantic quirk on criticism of Beowulf while showing how the poem does differentiate between heroic violence
and war and how that difference enables a structural strategy whereby the poem devalues its own signs not to ultimately
condemn heroism but to confine its value to an artificial space My third chapter argues that the Exeter Book riddles whose
solutions are weapons use personification to tally an account of the human cost of war that is radical among early medieval
poetry for reckoning that cost according to the bodily and psychological toll exacted from its participants This chapter
engages with critical discussions of the formal possibilities of the riddle genre itself by showing how the transference of
psychology between the personified weapons the riddles solutions and their wielders the metaphorical focus formally
objectify warrior subjectivity to create vivid lyrical expressions of pain regret and hardship My final chapter uses my theories
about war and representation to interpret the historical sense of The Battle of Maldon The expanded military responsibility of
tenth and eleventh century Kings of England demanded a clarified ethic of war growing monastic power and literary
production helped define it These poems stage contemporary events as trials of the capacity of the new ethic to

accommodate both traditional images of heroic violence and an expanded religious sense
