**Sg-Anthropology** Haviland, 2002-08-01 The Study Guide revised by M L Miranda of the University of Nevada at Las Vegas includes chapter synopses chapter goals lists of key terms and questions to guide students in their reading of chapter material Each chapter also includes practice tests consisting of fill in the blank multiple choice matching true false and essay questions *A Companion to Paleoanthropology* David R. Begun, 2012-12-20 A Companion to Paleoanthropology presents a compendium of readings from leading scholars in the field that define our current knowledge of the major discoveries and developments in human origins and human evolution tracing the fossil record from primate and hominid origins to the dispersal of modern humans across the globe Represents an accessible state of the art summary of the entire field of paleoanthropology with an overview of hominid taxonomy Features articles on the key discoveries in ape and human evolution in cranial postcranial and brain evolution growth and development Surveys the breadth of the paleontological record from primate origins to modern humans Highlights the unique methods and techniques of paleoanthropology including dating and ecological methods and use of living primate data to reconstruct behavior in fossil apes and humans

The Paleobiology of Australopithecus Kaye E. Reed, John G Fleagle, Richard E Leakey, 2013-03-15 Australopithecus species have been the topic of much debate in palaeoanthropology since Raymond Dart described the first species Australopithecus africanus in 1925 This volume synthesizes the geological and paleontological context of the species in East and South Africa covers individual sites such as Dikika Hadar Sterkfontein and Malapa debates the alpha taxonomy of some of the species and addresses questions regarding the movements of the species across the continent Additional chapters discuss the genus in terms of sexual dimorphism diet reconstruction using microwear and isotopic methodologies postural and locomotor behavior and ontogeny **Hominin Postcranial Remains from Sterkfontein, South Africa, 1936-1995** Bernhard Zipfel, Brian G.

Richmond, Carol V. Ward, 2020-05-07 The 1924 African discovery of an early hominin child's skull referred to as Australopithecus africanus by Raymond Dart was a major event in the history of paleoanthropology This provided the first evidence of early hominins in Africa and overturned conventional ideas about human evolution Subsequent discoveries of A africanus fossils notably from cave deposits at Sterkfontein yielded the first evidence that early hominins were habitual bipeds Fifty years after this the discovered wealth of fossil evidence in eastern Africa of the slightly older and craniodentally more primitive taxon A afarensis catalyzed debates about the origin and evolution of human gait and the phylogenetic relationships among early hominins This formed the main basis of our understanding of early hominin bipedality and paleobiology Little attention has been paid to the variation among species in postcranial anatomy and locomotion although intriguing hints are beginning to appear in the literature Did multiple varieties of bipedality evolve Did australopithecus species differ in positional or manipulative abilities body proportions or patterns of sexual dimorphism These are critical questions for understanding the evolution of australopithecus and hominin locomotion In this book Bernhard Zipfel Brian Richmond Carol

Ward and the most knowledgeable scholars in their respective fields provide groundbreaking accounts for each postcranial fossil and expert examinations into the background of each fossil. The chapters include standardized high quality photographs and anatomical descriptions to allow readers to read the book entirely or learn by comparing features across chapters.

**Hominin Postcranial Remains from Sterkfontein South Africa 1936 1995** is an evolutionary history of South African hominins and it offers readers an orientation and introduction to the field. This is an important reference book for professional paleontologists, paleobiologists, anthropologists, geologists, students and historians interested in human evolution. Asian Paleoanthropology Christopher J. Norton, David R. Braun, 2010-08-26. This volume brings together a group of authors that address the question of the first out of Africa into Asia c 2 Ma. The scope of the book is comprehensive as it covers almost every major region of Asia. The primary goal of this volume is to provide an updated synthesis of the current state of the Asian paleoanthropological and paleoenvironmental records. Papers include detailed studies of the theoretical constructs underlying the move out of Africa including detailed reconstructions of the paleoenvironment and possible migration routes. Other papers detail the Plio-Pleistocene archaeological and hominin fossil records of particular regions. **S. G. Anthropology** Barnouw, 1979-01-01. *Cantonese Society in Hong Kong and Singapore* Marjorie Topley, Jean DeBernardi, 2011-01-01. The volume collects the published articles of Dr Marjorie Topley who was a pioneer in the field of social anthropology in the postwar period and also the first president of the revived Hong Kong Branch of the Royal Asiatic Society. Her ethnographic research in Singapore and Hong Kong set a high standard for urban anthropology and helped creating the fields of religious studies, migration studies, gender studies and medical anthropology focusing on topics that remain current and important in the disciplines. The essays in this collection showcase Dr Topley's groundbreaking contributions in several areas of scholarship. These include Chinese Women's Vegetarian Houses in Singapore 1954 and The Great Way of Former Heaven: A Group of Chinese Secret Religious Sects 1963, both important research on the study of subcultural groups in a complex urban society; Marriage Resistance in Rural Kwangtung 1978, now a classic in Chinese anthropology and women's studies; her widely known and cited article Cosmic Antagonisms: A Mother-Child Syndrome 1974, which investigates widely shared everyday practices and cosmological explanations that Cantonese mothers invoked when they encountered difficulties in child rearing; and Capital Saving and Credit among Indigenous Rice Farmers and Immigrant Vegetable Farmers in Hong Kong's New Territories 2004. **A Companion to Biological Anthropology** Clark Spencer Larsen, 2010-02-22. An extensive overview of the rapidly growing field of biological anthropology. Chapters are written by leading scholars who have themselves played a major role in shaping the direction and scope of the discipline. Extensive overview of the rapidly growing field of biological anthropology. Larsen has created a who's who of biological anthropology with contributions from the leading authorities in the field. Contributing authors have played a major role in shaping the direction and scope of the topics they write about. Offers discussions of current issues, controversies and future directions.

within the area Presents coverage of the many recent innovations and discoveries that are transforming the subject

**Bodies, Ontology, and Bioarchaeology** Ann M. Palkovich, 2024-05-11 This volume introduces the place of Arroyo Hondo Pueblo in our understanding of Southwestern Archaeology in the Northern Rio Grande The author discusses the reanalysis of the skeletal and mortuary remains that draws on a half century of research since the original excavations were conducted by the School of American Research from 1970-1974 under the direction of Douglas W. Schwartz The volume offers a close read of the mortuary evidence at Arroyo Hondo Pueblo and integrates ideas about corn as a central feature of Tewa cosmology with this crop as the paramount dietary staple The author discusses the health consequences of dry farming subsistence and present evidence for malnutrition and other dietary issues and finally describes the impact of malnutrition and other maladies on the everyday lives of Arroyo Hondo's villagers This volume is for readers interested in bioarchaeology, paleopathology and Southwestern Archaeology

**Primate Neuroethology** Asif A. Ghazanfar, 2012-08-16 This edited volume is the first of its kind to bridge the epistemological gap between primate ethologists and primate neurobiologists Leading experts in several fields review work ranging from primate foraging behavior to the neurophysiology of motor control from vocal communication to the functions of the auditory cortex

**Chinese Spirit-Medium Cults in Singapore** Alan Elliott, 2020-08-19 The concentration of this monograph on Chinese spirit mediumship in Singapore is chiefly a device for focussing attention upon the most typical although rather extreme manifestation of the major religious orientation of the overseas Chinese The accounts given here may chiefly be of value as a detailed record of religious rites but it is hoped that the rites shown in their institutional context can also throw some light upon the wider ramifications of culture and society among the Chinese

**The Contemporary Family in Singapore** Eddie C. Y. Kuo, Aline K. Wong, 1979 Twelve essays on the sociology of the family in Singapore in the modern period

**The Political Theory of Tyranny in Singapore and Burma** Stephen McCarthy, 2006-04-18 Covering various fields in political science this new book presents an historical and political cultural analysis of Buddhism and Confucianism Using Singapore and Burma as case studies the book questions the basic assumptions of democratization theory examining the political science of tyranny and exploring the rhetorical manipulation of religion for the purpose of political legitimacy A welcome addition to the political science and Asian studies literature McCarthy addresses many of the current issues that underlie the field of democratization in comparative politics and discusses the issue of imposing Western cultural bias in studying non-Western regimes by analyzing rhetorical traits that are universally regular in politics

**Improving Medical Education** Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Behavioral and Social Sciences in Medical School Curricula, 2004-07-28 Roughly half of all deaths in the United States are linked to behavioral and social

factors The leading causes of preventable death and disease in the United States are smoking sedentary lifestyle along with poor dietary habits and alcohol consumption To make measurable improvements in the health of Americans physicians must be equipped with the knowledge and skills from the behavioral and social sciences needed to recognize understand and effectively respond to patients as individuals not just to their symptoms What are medical schools teaching students about the behavioral and social sciences In the report the committee concluded that there is inadequate information available to sufficiently describe behavioral and social science curriculum content teaching techniques and assessment methodologies in U S medical schools and recommends development of a new national behavioral and social science database The committee also recommended that the National Board of Medical Examiners ensure that the U S Medical Licensing Examination adequately cover the behavioral and social science subject matter recommended in this report **The First Humans**

Frederick E. Grine, John G. Fleagle, Richard E. Leakey, 2009-05-24 There are some issues in human paleontology that seem to be timeless Most deal with the origin and early evolution of our own genus something about which we should care Some of these issues pertain to taxonomy and systematics How many species of Homo were there in the Pliocene and Pleistocene How do we identify the earliest members the genus Homo If there is more than one Plio Pleistocene species how do they relate to one another and where and when did they evolve Other issues relate to questions about body size proportions and the functional adaptations of the locomotor skeleton When did the human postcranial Bauplan evolve and for what reasons What behaviors and what behavioral limitations can be inferred from the postcranial bones that have been attributed to Homo habilis and Homo erectus Still other issues relate to growth development and life history strategies and the biological and archeological evidence for diet and behavior in early Homo It is often argued that dietary change played an important role in the origin and early evolution of our genus with stone tools opening up scavenging and hunting opportunities that would have added meat protein to the diet of Homo Still other issues relate to the environmental and climatic context in which this genus evolved Annual Report of the Board of Regents of the Smithsonian Institution Smithsonian Institution. Board of Regents, 1880
