Motion Toward Perfection The Achievement Of Joseph Priestley:

Motion Toward Perfection Albert Truman Schwartz, John G. McEvoy, 1990 Ten authors follow Priestley's 1733-1804 evolution from Calvinism to Unitarianism *The Enlightened Joseph Priestley* Robert E. Schofield, 2010-11 Joseph Priestley 1733-1804 is one of the major figures of the English Enlightenment A contemporary and friend of Benjamin Franklin and Thomas Jefferson he exceeded even these polymaths in the breadth of his curiosity and learning Yet no one has attempted an all inclusive biography of Priestley probably because he was simply too many persons for anyone easily to comprehend in a single study Robert Schofield has devoted a lifetime of scholarship to this task The result is a magisterial book covering the life and works of Priestley during the critical first forty years of his life Although Priestley is best known as a chemist this book is considerably more than a study in the history of science As any good biographer must Schofield has thoroughly studied the many activities in which Priestley was engaged Among them are theology electricity chemistry politics English grammar rhetoric and educational philosophy Schofield situates Priestley the provincial dissenter within the social political and intellectual contexts of his day and examines all the works Priestley wrote and published during this period Schofield singles out the first forty years of Priestley's life because these were the years of preparation and trial during which Priestley qualified for the achievements that were to make him famous The discovery of oxygen the defenses of Unitarianism and the political liberalism that characterize the mature Priestley all are foreshadowed in the young Priestley A brief epilogue looks ahead to the next thirty years when Priestley was forced out of England and settled in Pennsylvania the subject of Schofield's next book But this volume stands alone as the definitive study of the making of Joseph Priestley **Joseph Priestley, Radical Thinker** Chemical Heritage Foundation, 2005 Joseph Priestley Radical Thinker offers a unique look into the achievements of this scientific giant whose work helped provide the foundation for chemistry research The book is the catalog that accompanies an exhibit of historical images and artifacts that commemorated the 200th anniversary of the death of Priestley and includes essays by historian Robert Anderson and Marjorie Gapp curator of art and images at Chemical Heritage Foundation Gapp and Mary Ellen Bowden with Lisa Rosner also examine the historical significance of the many objects and artifacts found in this fascinating collection **Taste and Experience in Eighteenth-Century British Aesthetics** Dabney Townsend, 2022-06-02 Taste and Experience in Eighteenth Century Aesthetics acknowledges theories of taste beauty the fine arts genius expression the sublime and the picturesque in their own right distinct from later theories of an exclusively aesthetic kind of experience By drawing on a wealth of thinkers including several marginalised philosophers Dabney Townsend presents a novel reading of the century to challenge our understanding of art and move towards a unique way of thinking about aesthetics Speaking of a proto aesthetic Townsend surveys theories of taste and beauty arising from the empiricist shift in philosophy A proto aesthetic was shaped by the philosophers who followed Locke and accepted that theories of taste and beauty must be products of experience alone Francis Hutcheson David Hume Alexander Gerard and

Thomas Reid were among the most important advocates joined by others who re thought traditional topics Featuring chapters tracing its philosophical principles issues raised by the subjectivity of the empiricist approach and the more academic proto aesthetic formed toward the end of the century Townsend argues that Lockean empiricism laid the foundations for what we now call aesthetics *Joseph Priestley* Isabel Rivers,David L. Wykes,2008-01-17 Joseph Priestley was one of the most remarkable thinkers of the eighteenth century Best known today as the scientist who discovered oxygen he also made major contributions in the fields of education politics philosophy and theology This collection of essays by a team of experts covers the full range of Priestley s work and provides a new and up to date account of all his activities together with a summary of his life and an account of his last years in America The book will re establish him as a major intellectual figure in Britain and America in the second half of the eighteenth century **The Scientific Background to Modern Philosophy** Michael R. Matthews,2022-11-21 Through a collection of works from key thinkers in natural philosophy the second edition of *The Scientific Background to Modern Philosophy* illuminates the central role scientific writing played in developing modern philosophical thought This revised and expanded edition includes many new translations and incorporates works by foundational eighteenth and nineteenth century thinkers not in the first edition including selections from works by Jean Baptiste le Rond d Alembert Denis Diderot milie Du Ch telet Jean Jacques Rousseau Joseph Priestley Immanuel Kant Carl Linnaeus William Paley and Charles Robert Darwin These new additions provide students with a more comprehensive understanding of the scientific context in which the major philosophical works of the modern era were written and complement the selections from works by Nicolaus Copernicus Francis Bacon Galileo Galilei Ren Descartes Robert Boyle Christiaan Huygens and Isaac Newton that are retained from the first edition Imagining Religious Toleration Alison Conway,David Alvarez,2019-08-31 Formerly a site of study reserved for intellectual historians and political philosophers scholarship on religious toleration from the perspective of literary scholars is fairly limited Largely ignored and understudied techniques employed by writers to influence cultural understandings of tolerance are rich for exploration In investigating texts ranging from early modern to Romantic Alison Conway David Alvarez and their contributors shed light on what literature can say about toleration and how it can produce and manage feelings of tolerance and intolerance Beginning with an overview of the historical debates surrounding the terms toleration and tolerance this book moves on to discuss the specific contributions that literature and literary modes have made to cultural history studying the literary techniques that philosophers theologians and political theorists used to frame the questions central to the idea and practice of religious toleration Tracing the rhetoric employed by a wide range of authors the contributors delve into topics such as conversion as an instrument of power in Shakespeare the relationship between religious toleration and the rise of Enlightenment satire and the ways in which writing can act as a call for tolerance *The Historiography of the Chemical Revolution* John G McEvoy,2015-10-06 This study offers a critical survey of past and present interpretations of the Chemical Revolution

designed to lend clarity and direction to the current ferment of views *Reconstructing Nature* John Hedley Brooke, John Brooke, Geoffrey Cantor, 2000-02-10 Shortlisted for the Templeton Foundation Prize for Outstanding Books in Theology and Natural Sciences John Brooke and Geoffrey Cantor discuss exciting developments in the sciences whether in Big Bang cosmology chaos theory or genetic engineering in relation to moral and spiritual questions Contemporary discussion can however be blind if it ignores previous forms of engagement between science and religion In their Gifford Lectures the authors argue that not one but several historical approaches are required to achieve critical perspective and balanced understanding Accordingly each chapter demonstrates the value of a particular historical method Ranging from alchemy to new age philosophies from the Galileo affair to the Darwinian controversies this is an indispensable and highly accessible book for all interested in science and religion *Evangelicals and Science in Historical Perspective* David N. Livingstone, Darryl G. Hart, Mark A. Noll, 1999 Comprising papers by such distinguished scholars as John Headley Brooke James R Moore Ronald Numbers and George Marsden this collection shows that questions of science have been central to evangelical history in the United States as well as in Britain and Canada *Science, Worldviews and Education* Michael Matthews, 2009-07-14 This book has its origins in a special issue of the journal *Science Education* Volume 18 Numbers 6 7 2009 The essay by Costas Skordoulis *Science and Worldviews in the Marxist Tradition* did not appear in that special issue due to a mistake in production scheduling It was published in an earlier issue of the journal Volume 17 Number 6 2008 but has been included in this book version of the special issue As explained in the Introduction the catalyst for the journal special issue was the essay on *Science Worldviews and Education* submitted to the journal by Hugh G Gauch Jr This was circulated to the other contributors who were asked to write their own contribution in the light of the arguments and literature contained in the paper Hugh made brief Responses and Clarifications after the papers were written However the Tanis Edis article on Islam and my own article on Priestley were processed too late to benefit from Hugh's appraisal The journal is associated with the International History Philosophy and Science Teaching Group which was formed in 1987 The group stages biennial international conferences and occasional regional conferences details can be found at www.ihpst.org The group though the journal conferences and its electronic newsletter at www.ihpst.org *Science Teaching* Michael R. Science Without God? Peter Harrison, Jon H. Roberts, 2019-01-03 Can scientific explanation ever make reference to God or the supernatural The present consensus is no indeed a naturalistic stance is usually taken to be a distinguishing feature of modern science Some would go further still maintaining that the success of scientific explanation actually provides compelling evidence that there are no supernatural entities and that true science from the very beginning was opposed to religious thinking Science without God Rethinking the History of Scientific Naturalism shows that the history of Western science presents us with a more nuanced picture Beginning with the naturalists of ancient Greece and proceeding through the middle ages the scientific revolution and into the nineteenth century the contributors examine past ideas about nature and the supernatural Ranging over different scientific disciplines and historical periods they show how past thinkers often relied upon theological ideas and presuppositions in their systematic investigations of the world In addition to providing material that contributes to a history of nature and naturalism this collection challenges a number of widely held misconceptions about the history of scientific naturalism

John Jebb and the Enlightenment Origins of British Radicalism Anthony Page, 2003-03-30 A supporter of the American rebellion and advocate of radical ideas on religion philosophy education law medicine and politics John Jebb 1736 1786 provides an ideal case to examine the nature of radicalism in 18th century Britain Jebb began his career as a clergyman and academic at Cambridge in the 1760s and died as a doctor and leading figure among political reformers in Enlightenment London Profoundly influenced by David Hartley's attempt to combine a Christian theology of universal salvation with a materialist and determinist account of the mind Jebb's philosophical and religious radicalism inspired him to work tirelessly for reform This is the first modern extended study of his life While at Cambridge Jebb provoked strong conservative opposition to his religious views and proposals for academic reform Increasingly marginalized in church and university as a tide of loyalism swept the country in response to rebellion in America Jebb resigned as a clergyman and moved to London to work as a doctor As the American war dragged on with no end in sight a popular movement urging political reform developed Jebb became a leader of this movement and was instrumental in establishing a platform that called for universal suffrage and annual elections British radicals would continue to campaign for this platform until the mid 19th century

History, Philosophy and Science Teaching: A Personal Story Michael R. Matthews, 2021-06-02 This book is an historical narrative of academic appointments significant personal and collaborative research endeavours and important editorial and institutional engagements For forty years Michael Matthews has been a prominent international researcher author editor and organiser in the field of History Philosophy and Science Teaching He has systematically brought his own discipline training in science psychology philosophy of education and the history and philosophy of science to bear upon theoretical curricular and

pedagogical issues in science education The book includes accounts of philosophers who greatly influenced his own thinking and who also were personal friends Wallis Suchting Abner Shimony Robert Cohen Marx Wartofsky Israel Scheffler Michael Martin and Mario Bunge It advocates the importance of clear writing and avoidance of faddism in both philosophy and in education It concludes with a proposal for informed and enlightened science teacher education Religious Dissent and the Aikin-Barbault Circle, 1740-1860 Felicity James,Ian Inkster,2011-11-03 Recent criticism is now fully appreciating the nuanced and complex contribution made by Dissenters to the culture and ideas of the eighteenth and nineteenth centuries in Britain This is the first sustained study of a Dissenting family the Aikins from the 1740s to the 1860s Essays by literary critics historians of religion and science and geographers explore and contextualize the achievements of this remarkable family including John Aikin senior tutor at the celebrated Warrington Academy and his children poet Anna Letitia Barbault and John Aikin junior literary physician and editor The latter s children in turn were leading professionals and writers in the early Victorian era This study provides new perspectives on the social and cultural importance of the family and their circle an untold story of collaboration and exchange and a narrative which breaks down period boundaries to set Enlightenment and Victorian culture in dialogue **The Love of God Holds Creation Together** Ryan P. Hoselton,2018-02-26 The English Baptist Andrew Fuller 1754 1815 is well known today for his nuanced Evangelical answer to the Modern Question against hyper Calvinism founding and leading the Baptist Missionary Society and his exemplary pastoral ministry In his day however he was also esteemed as a formidable apologist for Christian orthodoxy especially in the area of moral reasoning Following in the footsteps of his theological mentor Jonathan Edwards Fuller labored to defend the moral goodness and salutary nature of Christian doctrine against the new moral philosophy of the Enlightenment As optimism in the moral potential of human nature waxed reliance on God for truth and virtue waned Echoing a long tradition of classical theologians Fuller wished to declare afresh that the love of God as manifested in the gospel furnished humankind s only hope for virtue excellence and happiness In this concise study Hoselton looks to recover the importance of ethical reasoning in Fuller s theology and ministry and reflect on its merit for today **Reordering Nature** Celia Deane-Drummond,Bronislaw Szerszynski,Robin Grove-White,2003-02-01 In this book experts in the environment theology and science argue that the challenge posed to society by biotechnology lies not only in terms of risk benefit analysis of individual genetic technologies and interventions but also has implications for the way we think about human identity and our relationship to the natural world Such a profound they would suggest religious challenge requires a response that is genuinely interdisciplinary in nature a conversation that draws as much on expertise in theology and philosophy as on the natural sciences and risk assessment techniques They argue that an adequate response must also be sociologically informed in at least two ways First it must draw on contemporary sociological insights about contemporary cultural change the complex role of expert knowledge in modern complex society and the specific social dynamics of contemporary technological risks Secondly it must endeavour to pay

sensitive attention to the voice of the lay public in the current controversy over the new genetics This book attempts to realise such an aim as a contribution not just to academic scholarship but also to the public debate about biotechnology and its regulation Thus the collection includes contributions from scholars in a range of intellectual domains indeed many of the chapters themselves draw on more than one discipline in new and challenging ways The book invites the reader to enter into this conversation in a creative way and come to appreciate more fully the many sided nature of the debate Development

C. F. Goodey, 2021-06-10 This book traces the historical roots of psychology's developmental idea back to Christian beliefs from the past two millennia **Development** Christopher Goodey, 2021-06-10 This book details the history of the idea of psychological development over the past two millennia The developmental idea played a major part in the shift from religious ways of explaining human nature to secular modern ones In this shift the elect chosen by God became the normal and grace was replaced by cognitive ability as the essentially human quality A theory of psychological development was derived from theories of bodily development leading scholars describe human beings as passing through necessary stages of development over the lifespan By exploring the historical and religious roots of modern psychological concepts and theories this book demonstrates that history is a method for standing outside psychology and thereby evaluating its fundamental premises It will spark new interest in the history sociology and philosophy of the mind sciences as well as in the rights of children and developmentally disabled people
